

# **LEKWA LOCAL MUNICIPALITY**

## **FINAL INTEGRATED DEVELOPMENT PLAN**

### **2023/24 REVIEW**

2022-27 IDP - YEAR 2 OF 5

*"To be the leading, people centered municipality  
excelling in economic growth, development and  
governance"*

## Table of Contents

<b>1. CHAPTER ONE: INTRODUCTION AND BACKGROUND.....</b>	<b>1</b>
1.1 Lekwa Local Municipality in context .....	1
1.2 What is the Integrated Development Plan? .....	2
1.3 The IDP Process.....	2
1.4 Structure of the 2023/24 IDP document.....	3
<b>2 CHAPTER TWO: LEGISLATIVE AND POLICY IMPERATIVES .....</b>	<b>5</b>
2.1 Legal framework and mandate .....	5
2.2 2023/24 IDP Review Process .....	20
2.3 2023/24 IDP Process Plan Implementation .....	23
<b>3 CHAPTER THREE: LEADERSHIP AND GOVERNANCE.....</b>	<b>25</b>
3.1 Institutional Overview.....	25
3.2 Lekwa LM Council .....	25
3.3 Lekwa LM Organizational Structure .....	25
3.4 Departments Within The Municipality .....	26
<b>4 CHAPTER FOUR: SITUATIONAL ANALYSIS .....</b>	<b>28</b>
4.1 Lekwa Local Municipality At A Glance.....	28
4.2 Economic Landscape .....	48
4.3 Status Quo Assessment Of Spatial Rationale .....	56
4.4 Status Quo Assessment Of Local Economic Development .....	94
4.5 Status Quo Assessment Of Basic Service Delivery And Infrastructure Development .....	114
4.6 Status Quo Assessment Of Community Services .....	116
4.7 Environment And Climate Change In Lekwa .....	123
4.8 Status Quo Assessment Of Public Participation And Good Governance.....	131
4.9 Status Quo Assessment Of Municipal Transformation And Institutional Development ...	138
4.10 Status Quo Of Office Of The Municipal Manager.....	143
4.11 Status Quo Assessment Of Financial Viability And Management .....	145
4.12 Community Consultation .....	156
4.13 Swot Analysis.....	165
<b>5 CHAPTER FIVE: DEVELOPMENT OF STRATEGIES .....</b>	<b>167</b>
5.1 Vision .....	167
5.2 Mission.....	167
5.3 Corporate Values .....	167
5.4 Strategic Goals.....	167

5.5	Strategic Objectives.....	167
5.6	Key Performance Areas .....	168
<b>6</b>	<b>CHAPTER SIX: INTEGRATED HUMAN SETTLEMENTS CHAPTER.....</b>	<b>169</b>
6.1	Housing Vision, Mission, and Development .....	169
6.2	Implementation Strategy .....	170
<b>7</b>	<b>CHAPTER SEVEN: IMPLEMENTATION PLANS PER KPA .....</b>	<b>191</b>
7.1	KPA 1: Basic Service Delivery And Infrastructure Delivery.....	191
7.2	KPA 2: Municipal Transformation And Institutional Development.....	208
7.3	KPA 3: Spatial Rationale .....	217
7.4	KPA 4: Local Economic Development .....	225
7.5	KPA 5: Good Governance And Public Participation .....	230
7.6	KPA 6: Financial Viability And Management .....	243
<b>8</b>	<b>CHAPTER EIGHT: PROGRAMMES AND PROJECTS – YEAR 2 OF 5 IMPLEMENTATION .....</b>	<b>249</b>
8.1	Internally Funded Projects.....	249
8.2	MIG & INEP Allocation For 2023/24.....	249
	WSIG & RBIG Projects .....	249
	MIG Projects.....	250
	INEP Projects.....	251
	Spatial Rationale Projects .....	252
	Spatial Rationale Projects Cont. ....	253
	Gert Sibande District Municipality Projects .....	255
8.3	Sector Department Projects .....	256
i.	Department Of Human Settlements .....	256
ii.	Department Of Water And Sanitation.....	256
iii.	Department Of Agriculture, Land Reform And Rural Development .....	257
iv.	Department Of Agriculture Rural Development, Land And Environmental Affairs .....	257
v.	Department Of Community Safety, Security And Liaison.....	258
vi.	Office Of The Premier – Mega.....	258
vii.	Department Of Community Safety, Security And Liaison .....	259
viii.	Departmentt Of Culture, Sports, And Recreation .....	260
ix.	Department Of Economic Development And Tourism .....	263
x.	Cooperative Governance And Traditional Affairs .....	264
8.4	Social Labour Plans Projects .....	265
8.5	Catalytic Projects.....	265
<b>9</b>	<b>CHAPTER NINE: ORGANIZATIONAL STRUCTURE 2023/24-2026/27 .....</b>	<b>266</b>

9.1	Human Resource Strategy .....	266
9.2	Human Resource Plan .....	269
9.3	Workplace Skills Development Plan for the 2023/24 Financial Year.....	275
9.4	Organizational Structure 2023/24 .....	277
<b>10</b>	<b>CHAPTER TEN: MUNICIPAL BUDGET 2023/24-2026/27 .....</b>	<b>294</b>
10.1	2023 - 2024 Budget/ Medium Term Revenue and Expenditure Framework (MTRF) .....	294
10.2	Progress on the implementation of the Financial Recovery .....	295
<b>11</b>	<b>CHAPTER ELEVEN: DISASTER MANAGEMENT PLAN .....</b>	<b>321</b>
	Disaster Management Plan .....	321

# FORWARD BY EXECUTIVE MAYOR

**Honourable Cllr. D.L Thabethe**

This IDP Document for the financial years 2022/2023-2026/2027 is in accordance with section 25 (1) of Municipal Systems Act 32 of 2000. The IDP is informed by the new political, social, and economic developments in the Lekwa Local Municipality. The Local Government Elections (LGE) that were held on 01 November 2021 brought about change in political office as well as a new mandate. These changes have as purpose to meet the set national key performance areas of Good Governance and Public Participation, Municipal Transformation and Organisational Development, Financial Viability, Local Economic Development, Basic Service Delivery and Infrastructure Development, and Spatial Rationale. Our IDP is also informed by the Financial Recovery Plan (FRP) and the District Development Model's (DDM) One Plan.

The strategic objective of the FRP is to address the current financial distress by focusing on improving the short-term financial liquidity of the municipality and by improving the long-term financial sustainability of the municipality. This will be achieved in a phased approach, with the focus on high level targets to be achieved in each phase. Issues pertaining to governance, institutional stability and service delivery will also be addressed in so far as they undermine the financial recovery of the municipality. The DDM "will enable us to have line of sight of exactly where the challenges are to resolve them and to ensure there is proper implementation through synchronised planning across all spheres of government" (President Cyril Ramaphosa on the launch of the flagship municipal support programme, 2019).

Through the involvement and participation of our stakeholders, we have prioritized needs in compliance with the above-mentioned legislation and programmes. A greater emphasis will be placed on inter-programme collaboration between departments and with our social partners. We hope to see this impacting positively on the day-to-day lives of our people. In conclusion, I think the beautiful words of former President Nelson Rolihlahla Mandela in his book, *Long Road to Freedom*, should focus us to the realities and challenges of our municipality. Madiba writes,

*"I have walked that long road to freedom. I have tried not to falter; I have made missteps along the way. But I have discovered the secret that after climbing a great hill, one only finds that there are many more hills to climb. I have taken a moment here to rest, to steal a view of the glorious vista that surrounds me, to look back on the distance I have come. But I can only rest for a moment, for with freedom comes responsibilities and I dare not linger for my long walk is not ended."*

So let us not linger any further, for the long walk is not yet ended, and there is much work to be done. Let us determine our destiny with pride for I believe we shall!

**SIYAQHUBA**

# MUNICIPAL MANAGER OVERVIEW

**Mr. MJ Lamola**

The Municipal Systems Act (No 32 of 2000) compels all municipal councils to develop and adopt five-year Integrated Development Plan (IDP) which must be reviewed annually. The act purports that a municipality must undertake development-oriented planning to ensure that it; (a) strives to achieve the objects of local government as set out in section 152 of the constitution; (b) gives effect to its developmental duties as required by section 153 of the constitution; and (c) together with other organs of the state contribute to the progressive realization of the fundamental rights contained in sections 24, 25, 26, 27 and 29 of the constitution.

Consistent with the above legislation, the Lekwa Local Municipality developed and adopted an Integrated Development Plan document which serves as a five-year strategic planning document, tailored to provide an outline of how the municipality plans to achieve its strategic objectives. The plans encapsulated in the IDP put the residents of Lekwa at the center of development, consistent with the adage, *"development is about people."*

Over the last few years, the residents of Lekwa had to endure a plethora of challenges which include, but are not limited to poor roads, constant power outages, inconsistent water supply and degraded living environment, among others.

Through this living document, the municipality reaffirms its resolute determination in addressing these, and many other perennial challenges that plague our community to restore the dignity of the residents by providing reliable services to those who have them and to those who have not had them.

As a living document, and consistent with the requirements of the Municipal Systems Act, the IDP is reviewed in consultation with the communities and stakeholders to reflect the expectations and aspirations of the intended beneficiaries of the contemplated development. To this end, several engagements were held to ensure that the IDP is informed as far as possible by the residents and stakeholders of the municipality. The IDP spells out the Key Performance Areas (KPA), Key Performance Indicators (KPI), targets, and outcomes as well as inputs and activities which are critical in both monitoring and implementing developmental programmes during the period under review.

Our immediate responsibility as the administration of the Lekwa Local Municipality is to ensure that the delivery of basic service continues unabated and that the perennial infrastructure challenges and the backlog thereof are addressed in a sustainable manner.

## 1.

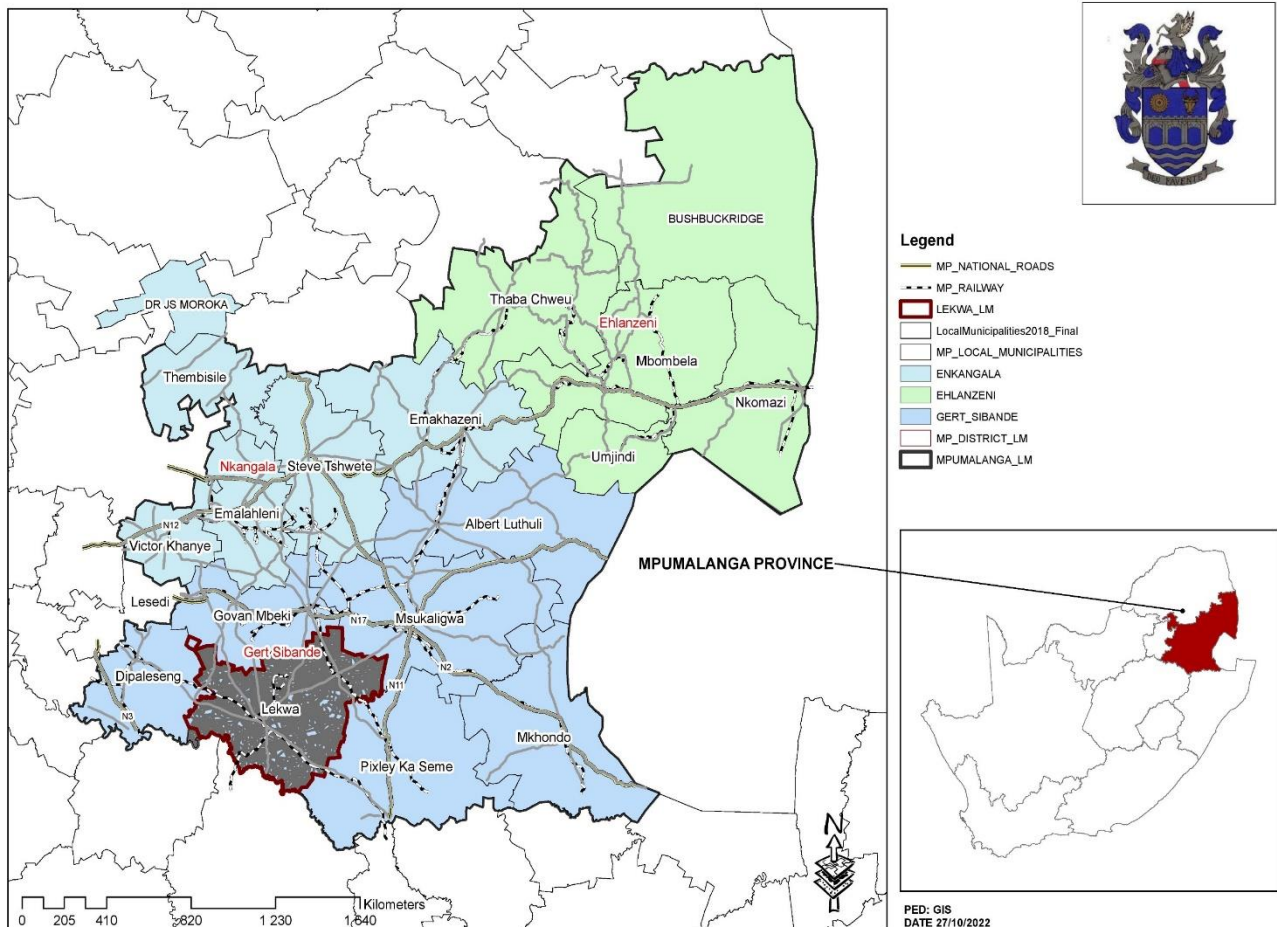

## CHAPTER ONE: INTRODUCTION AND BACKGROUND

## 1.1 Lekwa Local Municipality in context

Lekwa Local Municipality is situated within Mpumalanga province, and is one of seven municipalities in the Gert Sibande District. Lekwa Local Municipality is regarded as a category B municipality as it shares municipal executive and legislative authority with a category C municipality which is the Gert Sibande district. Lekwa Local Municipality was established on the 5<sup>th</sup> of December 2000 after the amalgamation of three former transitional local councils namely, Standerton, Sakhile and Morgenzon. It covers a total area of 4585km<sup>2</sup> and is rural in character.

Lekwa Local municipality lies in the large open plains of the highveld region, characterised by tall grass and the Vaal River which transverses the municipality in a western direction. The municipality is named after the Vaal River which is commonly known as Lekwa (The Sesotho name for Vaal River). It is in the south west of the district, and serve as the immediate entrance to KwaZulu-Natal (Newcastle), Gauteng (Heidelberg), and Free State (Vrede). Lekwa Local Municipality is bounded by Govan Mbeki Local Municipality to the north, Pixley Ka Isaka Seme and Msukaligwa Local Municipalities to the east and Dipaleseng Local Municipality to the west. Standerton serves as the major urban node, whilst Morgenzon located 45km north east of Standerton, serves as a satellite node.

Map 1: Lekwa Local Municipality Contextual Map

## 1.2 What is the Integrated Development Plan?

The Integrated Development Plan (IDP) is the central strategy of Lekwa Local Municipality. The IDP communicates to residents, businesses, and investors the municipality's long-term vision, and how the municipality plans to achieve it. It is required in terms of the Municipal Systems Act 32 of 2000, which defines the IDP as a municipality's principal strategic planning instrument that guides all municipal planning.

The IDP is made up of two parts – a strategic plan and an implementation plan. The strategic plan is informed by community needs, stakeholder inputs, a contextual analysis, and an evaluation of the existing state of Lekwa LM, to help identify challenges that the municipality needs to address to achieve its vision. A list of priorities and objectives are developed to provide focus in addressing the most critical strategic challenges.

The implementation plan, in turn, focuses on only those key strategic programmes, projects and initiatives that are critical to support the achievement of the strategic priorities during the current five-year term of office. The implementation plan also sets out which municipal departments are accountable for each programme.

Once the IDP has been adopted by Council, each department and entity must implement programmes aligned to the IDP. In-year monitoring occurs to ensure that the targets that the municipality sets out to achieve are on track, and if there are any challenges, these are detected through monitoring mechanisms and addressed accordingly. A reflective assessment against the IDP for the year is captured through the Integrated Annual Report. The outcomes for the year captured in the Integrated Annual Report serve as one source to inform the review of the IDP in the ensuing year.

## 1.3 The IDP Process

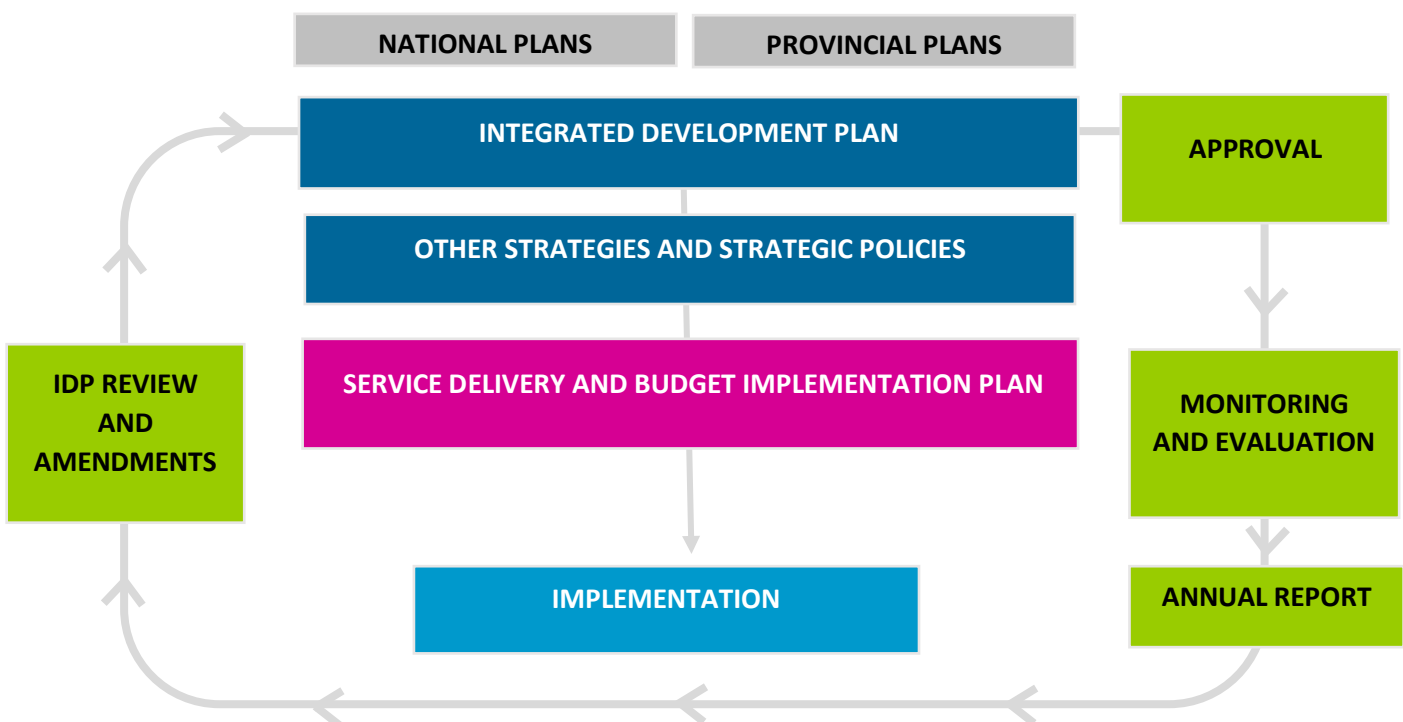

Figure 1: IDP Process

## **1.4 Structure of the 2023/24 IDP document**

### **Chapter 1: Introduction and background**

Provides the geographic context of Lekwa Local Municipality and background information pertaining to the concept of Integrated Development Planning.

### **Chapter 2: Legislative and policy imperatives**

Outlines the legislative and policy framework guiding socio-economic development in South Africa, with a particular focus on the local government sphere. Provisions of policy instruments such as the National Development Plan, Medium Term Strategic Framework, South African Economic Reconstruction and Recovery Plan amongst other. The chapter ends with the IDP processes and methodology followed in the development of the Integrated Development Plan.

### **Chapter 3: Leadership and governance**

Provides the leadership and governance of the municipality. This includes a brief overview of the Lekwa LM Council, mayoral committee, top management, and functions of the various departments within the municipality.

### **Chapter 4: Situational analysis**

Provides the situation of development including statistics for various indicators. The chapter also represents a multi-sectoral situational analysis highlighting some of the most salient features and key challenges of the municipality and progress made in addressing the key challenges. It also provides a brief summary of the priority issues reported by communities in the various Wards of the municipality.

### **Chapter 5: Development of strategies**

Reflects Strategy Development based on the "Vision" and "Mission" and Strategic Focus Areas of the Municipality.

### **Chapter 6: Integrated Human Settlements Chapter**

Provides an overview of the municipality's housing chapter. This includes a status quo on informal settlements, housing needs register, township establishment projects, land acquisition and matters related to the provision of housing within the municipality.

### **Chapter 7: Implementation Plans per KPA**

Reflects a synopsis of the various Departments Strategic Implementation Plans, Programmes and Projects aimed at addressing the priority issues identified in the municipal area.

### **Chapter 8: Programmes and Projects for 2023/24**

Reflect on all planned Programmes and Projects for 2023/24 financial year including projects planned by sector departments for the municipality.

### **Chapter 9: Organizational Structure**

A Consolidated Organizational Organogram in line with IDP and Budget.

**Chapter 10: Municipal Budget**

Municipal Budget for 2023/24.

**Chapter 11: Disaster Management Plan**

Reflects the Disaster Management Plan including emergency contact persons for each disaster.

## 2.

## CHAPTER TWO: LEGISLATIVE AND POLICY IMPERATIVES

**2.1 Legal framework and mandate**

The Municipal Systems Act, (No 32 of 2000), compels municipalities to prepare Integrated Development Plans (IDPs). The IDP serves as a tool for the facilitation and management of developments within the municipal area of jurisdiction. In conforming to the Act's requirements, the Council of Lekwa Local Municipality (LLM) has delegated the authority to the Municipal Manager to prepare the IDP.

The aim of the IDP for Lekwa Local Municipality (LLM) is to present a coherent plan in order to achieve the vision of the municipality. The intention of this IDP is to link, integrate and co-ordinate development plans for LLM which are aligned with national, provincial and district development plans as well as planning requirements binding on the municipality in terms of legislation. The planning context and policy context, within which the integrated development planning is undertaken, is established through national, provincial, and local policy and legislation. The major planning instruments BVF that have a critical impact on the IDP are: National Government, Provincial Government (Mpumalanga), District Municipal level and Local Municipal Level.

The Constitution further states that the three spheres of government are distinctive, inter-dependent and inter-related. They are autonomous but exist in a unitary South Africa and have to cooperate on decision-making and must co-ordinate budgets, policies, and activities, particularly for those functions that cut across the spheres.

Cooperative governance means that national, provincial, and local government should work together to provide citizens with a comprehensive package of services. They have to assist and support each other, share information, and coordinate their efforts. Implementation of policies and government programmes particularly require close cooperation between the three spheres of government. Several policies, strategies and development indicators have been developed in line with the prescriptions of legislation to ensure that all government activities are aimed at meeting the developmental needs of local government.

The following sections outline the national, provincial and district policy directives, sector plans and legislation that set the strategic direction and with which the Lekwa Local Municipality must align to ensure that government spending is directed at the pressing needs of the community and those that contribute towards economic growth.

**Figure 2: Local Government Legislations**

## National Development Plan

---

The South African Government through the Presidency has published a National Development Plan. The Plan aims to eliminate poverty and reduce inequality by 2030. The Plan has the target of developing people's capabilities to improve their lives through education and skills development, health care, better access to public transport, jobs, social protection, rising income, housing and basic services, and safety. It proposes the following strategies to address the above goals:

- Creating jobs and improving livelihoods;
- Expanding infrastructure;
- Transition to a low-carbon economy;
- Transforming urban and rural spaces;
- Improving education and training;
- Providing quality health care;
- Fighting corruption and enhancing accountability;
- Transforming society and uniting the nation

The National Development Plan 2030 has been adopted by the National Cabinet in August 2012 and this place an injunction on the state and its agencies (including municipalities) to implement the Plan. The Plan makes the following policy pronouncements and proposes performance targets that intersect with developmental mandates assigned to local government. Importantly, municipalities are expected to respond to these developmental imperatives when reviewing their Integrated Development Plan and developing the corresponding three-year Medium-term Revenue and Expenditure Frameworks.

- Youthful population presents opportunities to boost economic growth, employment and reduce poverty;
- Strengthen youth service programmes – community-based programmes to offer young people life skills training, entrepreneurship training;
- Increase employment from 13 million in 2010 to 24 million in 2030;
- Ensure that skilled, technical, professional, and managerial posts better reflect the country's racial, gender and disability makeup;
- Establish effective, safe, and affordable public transport;
- Produce sufficient energy to support industry at competitive prices;
- Ensure that all South African have access to clean running water in their homes;
- Make high - speed broadband internet universally accessible at competitive prices

The National Development Plan, 2030 committed to offering an ample life to all South Africans by 2030. The decent life that the NDP promised comprises of full employment, reduction of poverty and equality. South Africa is left with only 9 years to realise the objective of the 2030 blueprint for tackling the three challenges of unemployment, inequality, and poverty.

The main objective of the NDP is to underpin the objective of the Constitution of South Africa which is to bridge the gap caused by the apartheid era by promoting a society based on democratic values, social justices, and basic human rights. So much progress was recorded since the apartheid era. Between 2001 and 2017 the average annual rate of employment increased significantly in contrast to the period between 1960 to 1993. Access to municipal services such as housing, sanitation and electricity also increased between 1996 to 2017 (NPC,2020). However, this

is not the current status quo of South Africa as of recently, some of the progress made has since deteriorated, the rate of unemployment and poverty has increased. South Africa remains a divided society.

The National Planning Commission in 2020 prepared a report as part of the NPC Economy series on progress made towards the National Development Plan's vision 2030. According to the report the NDP was close to reaching its employment target between 2010-2015, however the employment rate has since stalled, employment growth has fallen to 41% of the targeted annual rate. The outbreak of Covid-19 pandemic has worsened the situation, more than a million jobs have been lost due to the pandemic (NPC, 2020).

### National Spatial Development Framework

The National Spatial Development Framework (NSDF) is a strategic long-term spatial plan towards 2050. The NSDF is legally mandated by the Spatial Planning and Land Use Management Act, 2013 (SPLUMA), and must be aligned with the 2030-National Development Plan (NDP).

The objective of the NSDF within the broader 'family' of strategic and sector plans of government is to:

- Target and direct all infrastructure investment and development spending decisions by all national sector departments and State-owned Enterprises (SOEs);
- Guide and align plan preparation, budgeting, and implementation across spheres and between sectors of government; and
- Frame and coordinate provincial, regional, and municipal spatial development frameworks.

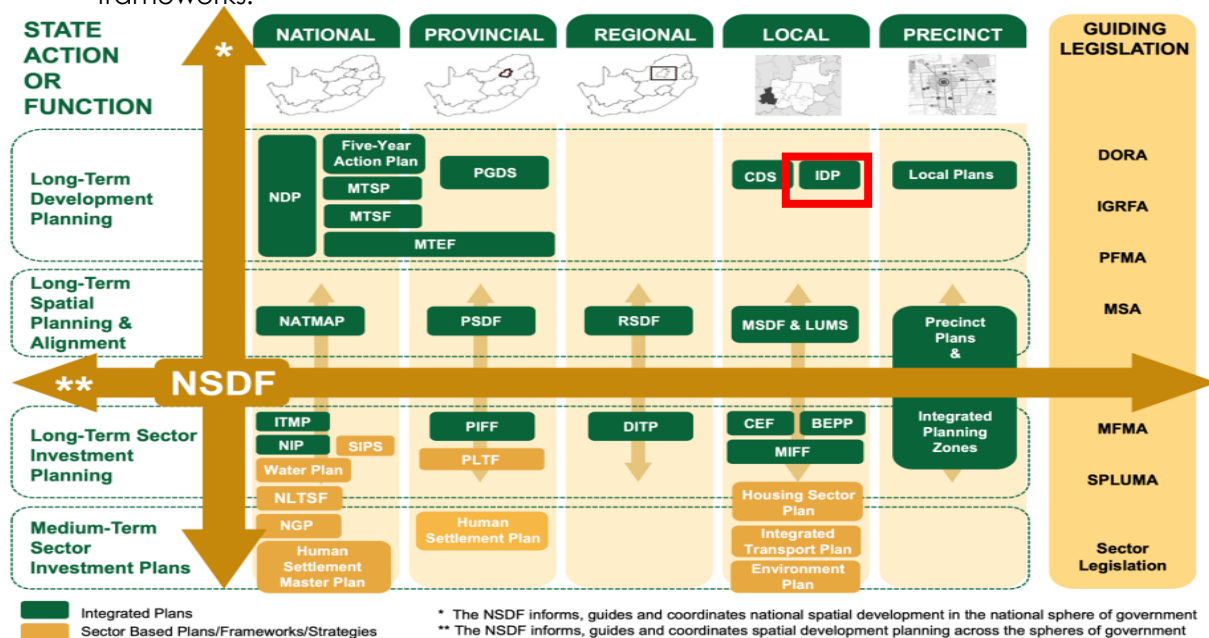

Figure 3: National Spatial Development Framework

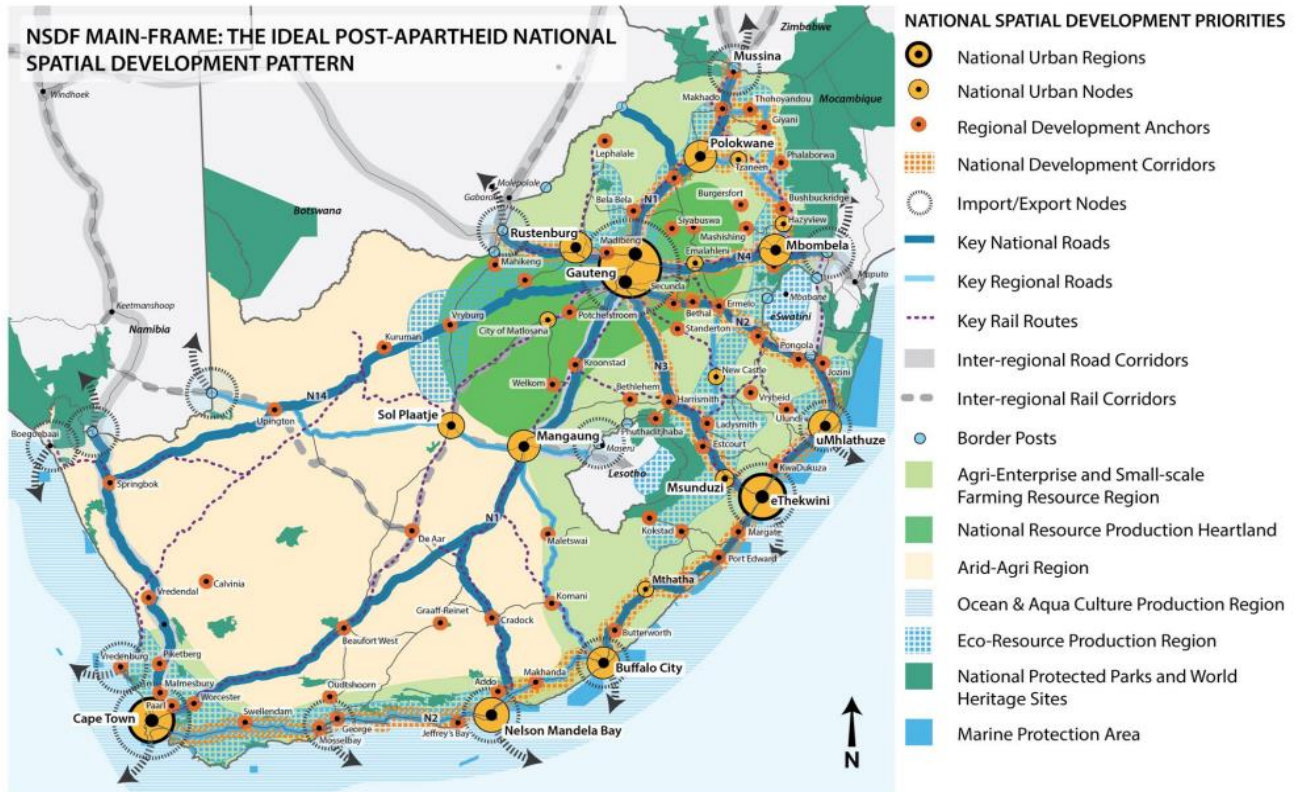

Figure 4: NSDF Main-frame: The ideal post-apartheid National Spatial Development Pattern, NSDF 2022

#### NSDF Implications for Lekwa Local Municipality

Key Area	KPA	Local Implications
Nodal & Corridor Development	Spatial Rationale	<input type="checkbox"/> Standerton: Regional Development Anchor <ul style="list-style-type: none"> <li><input type="checkbox"/> Transit Town</li> </ul> <input type="checkbox"/> Morgenzon: Rural Service Centre
Economic Transformation	Local Economic Development	<input type="checkbox"/> Agri-Enterprise and Small-Scale Farming Resource Region
Infrastructure Development	Basic Service Delivery and Infrastructure Development	<input type="checkbox"/> Key Rail Routes
Climate Change and Environmental Protection	Spatial Rationale	<input type="checkbox"/> Vaal Catchment Area <ul style="list-style-type: none"> <li><input type="checkbox"/> Climate change</li> </ul>

Table 1: NSDF Implications for Lekwa LM

**State of the Nation Address (SONA) and State of the Province Address (SOPA)**

<b>SONA 2023 Priorities</b>	<b>SOPA 2023 Nine-point programme of action</b>
<ul style="list-style-type: none"> <li>• Loadshedding</li> <li>• Unemployment</li> <li>• Poverty and the rising cost of living</li> <li>• Crime and corruption</li> </ul>	<ul style="list-style-type: none"> <li>▪ Just (Energy) Transition;</li> <li>▪ A Jobs War Room;</li> <li>▪ Infrastructure Showcasing;</li> <li>▪ A Response Mechanism for Disasters;</li> <li>▪ DDM and the State of Local Government;</li> <li>▪ SOE Performance Review and Repositioning;</li> <li>▪ Crime, Criminality, and Immigration; and</li> <li>▪ Operation Clean Audit (OPCA)</li> </ul>

**Table 2: SONA & SOPA Priorities****Implications for the municipality:**

- Diversify the local economy to cushion the impact of decommissioning Tutuka power station;
- Re-skill and upskill the most vulnerable in the labour force; and
- Support small businesses and co-operatives in local communities to access emerging opportunities in the green economy sector.
- Roll out green economy initiatives, industrialization through localization, employment stimulus initiatives, tourism and agriculture/ agro-processing.
- Work closely with our social partners in all sectors
- Continue with strategic infrastructure development initiatives to unlock investment and growth.
- Fill vacancies and professionalize the workforce

**Local Government Summit Resolutions 2022**

Resolutions applicable to municipalities:

- **Professionalization of local government** - Municipalities to ensure the appointment of capable and qualified officials. Skills audit to be conducted per municipality.
- **Local LED Units and Programmes** - Municipalities are to strengthen their LED Units and review the competency requirements whilst ensuring that they have research, evidence-based data and information gathering capacities
- **Partnership “Mobilisation Plan”** - Municipalities with the support of the Province and National must formulate partnerships with key stakeholders here and abroad, as we take advantage of continental programmes such as the Africa Continental Free Trade Area, to boost our local economies and development
- **Supporting localisation in mobilising investment** - Municipalities to strengthen their economic intelligence
- **SEZ (Special Economic Zones)** - Municipalities must provide equitable attention and support to identify and attract opportunities for anchor businesses with and value-chain opportunities for SMMEs
- **Land Use Framework** - Geo referencing economic activities and correlating it with community migratory patterns and trends. Department of Agriculture, Land Reform and Rural Development to support Municipalities in this regard.

- **Rural LED Programmes and Invest Rural**
- **Maintenance of the Yellow Fleet and Asset Management**
- **Vandalization and theft of infrastructure by community members**
- **Community Empowerment and Education** - Educate communities on how to become climate smart communities.

### Medium Term Strategic Framework 2019-2024

The MTSF 2019-2024 supports the NDP's objective to address the triple challenge of unemployment, inequality, and poverty, it aims to address the challenge through three pillars: Achieving a more capable state, driving a strong and inclusive economy, and building and strengthening the capabilities of South Africans. South Africa is left with only 10 years to reach the blueprint (NDP 2030) for tackling south Africa's challenges, a long-term vision for the country. The country has not made enough progress in reaching theses NDP targets. The Medium-Term Strategic Framework, 2019-2024 is a five-year implementation plan that will help the country to reach the 2030 targets.

The Medium-Term Strategic Framework comes with a package of interventions and programme that will advance the seven priorities adopted by council which are:

**Figure 5: 7 Priorities of the MTSF**

### South African Economic Reconstruction and Recovery plan

The Economic Reconstruction and Recovery Plan was developed to stimulate a fair and impartial inclusive economic growth. This was after the south African economy was found to be on a stagnation mode making it even for difficult to tackle the triple challenge of inequality, unemployment and poverty which came as a result of the apartheid era. the Economic challenges in South Africa were worsened by low levels of Gross Fix Capital Formation and growth.

Other challenges include revenue leakages, downgrade of state-owned enterprises, increased budget deficit and rising stock debt. The economy of the country was vulnerable when covid 19 pandemic reached the shores of south Africa, and as a result economic crisis deepened.

The South African Economic Reconstruction and Recovery Plan has three phases: Engage and Preserve - which includes a comprehensive health response to save lives and curb the spread of the pandemic; Recovery and Reform - which includes interventions to restore the economy while controlling the health risks; and lastly, Reconstruct and Transform - which entails building a sustainable, resilient, and inclusive economy.

The plan also has the following priority interventions:

- Aggressive infrastructure investment;
- Employment orientated strategic localization, reindustrialization, and export promotion;
- Energy security;
- Support for tourism recovery and growth;
- Gender equality and economic inclusion of women and youth;
- Green economy interventions;
- Mass public employment interventions;
- Strengthening food security; and
- Macro-economic interventions

Phase 1: Engage and Preserve	Phase 2: Recover and Reform	Phase 3: Reconstruct and transform
<ul style="list-style-type: none"> <li>• Saving lives</li> <li>• Macro Economic interventions</li> <li>• Saving distressed households, firms and jobs</li> <li>• Emphasizes both the economic and the social aspects of the crisis, including: a massive health care response and targeted support to employment preservation, SMEs, vulnerable households, firms and financial system.</li> <li>• Seeks to ensure social stability and food security</li> <li>• Also involves engaging social partners to drive recovery agenda on key policy initiatives</li> <li>• Support for households, firms and financial system continues</li> <li>• Fiscal reprioritization towards productive activities and in support of social obligations.</li> </ul>	<ul style="list-style-type: none"> <li>• Restart economy while controlling health risks to avoid a total collapse in employment, investment and production</li> <li>• strengthen SME supply chain inclusion</li> <li>• maintainance and roll out of infrastructure</li> <li>• Macro economic interventions</li> <li>• SOE, strategic sector reform package focusing on boosting industrial and trade competitiveness</li> <li>• public employment programmes</li> <li>• Transformation, strategic partnership and social compacting</li> <li>• Localization through industrialization</li> <li>• Support for tourism</li> <li>• Green economy interventions</li> <li>• energy and food security</li> </ul>	<ul style="list-style-type: none"> <li>• Public employment programmes</li> <li>• SMME development</li> <li>• infrastructure roll out</li> <li>• macro economic interventions</li> <li>• green economy intervention</li> <li>• localization through industrialization</li> <li>• support for tourism</li> <li>• energy and food security</li> <li>• transformation</li> <li>• digital economy</li> <li>• strategic partnerships and social compacting</li> </ul>

**Figure 6: South African ERRP phases**

## Responding to the negative impact of COVID 19

On 15 October 2020, President Ramaphosa detailed the Economic Reconstruction & Recovery Plan (ERRP) in Parliament as our national response to the negative impact of COVID-19. The following is a summary of the ERRP:

Broad Areas for Intervention	Priority Interventions	ERRP Targets
<ul style="list-style-type: none"> <li>Planned “massive” rollout of infrastructure across South Africa.</li> <li>Rapidly expand energy generation capacity.</li> <li>Drive for industrial growth; and</li> <li>Employment stimulus.</li> </ul>	<ul style="list-style-type: none"> <li>Infrastructure investment and delivery</li> <li>Sufficient, secure, and reliable energy supply and Green Economy initiatives</li> <li>Grow through industrialisation, localisation, and export promotion</li> <li>Employment stimulus</li> <li>Growth and recovery of tourism</li> <li>Agriculture and Food Security</li> <li>Gender and economic inclusion</li> </ul>	<ul style="list-style-type: none"> <li>Unlock more than R1 trillion in infrastructure investment over the next 4 years.</li> <li>Sufficient, secure, and reliable energy supply with two years.</li> <li>Reverse the decline of local manufacturing sector and promote reindustrialization through deeper levels of localisation and export.</li> <li>Create and support over 800, 000 work opportunities in the immediate to respond to job losses.</li> <li>Resuscitate vulnerable sectors such as tourism, which have been hard hit by the pandemic.</li> <li>Reduce data costs for every South African and expand broadband access to low-income households.</li> </ul>

**Figure 7: Responding to Covid 19 ERRP**

### MFMA Circular 88 – National Treasury

Circular 88 aims to support the alignment of planning and reporting instruments for a prescribed set of municipal performance indicators. The Municipal Systems Act (MSA) and the MFMA require alignment between planning and reporting instruments such as the Integrated Development Plan (IDP), the Service Delivery and Budget Implementation Plan (SDBIP) and the Annual Report

#### Implications for Lekwa LM:

The municipality has aligned outcome and outcome indicators to Circular 88 as reflected in the implementation plans in Chapter 8.

### Mpumalanga Vision 2030: Implementation Framework and Plan 2013-2030

The objective of the Implementation Framework and Plan is to ensure that all stakeholders approach the implementation of Vision 2030 through agreed strategies and programmatic interventions. The plan rests on a multidimensional framework that seeks to “bring about a virtuous cycle of development, with progress in one area supporting advances in others.” The focus plan is: “on rolling back poverty and inequality” by “raising living standards to a minimum and entails a

combination of interventions directed at increasing employment, improving quality of education, providing growth, a social wage and good quality public services."

The spatial implication towards the future development of Mpumalanga is determined by the collective application of the following identified key drivers:

- Key driver 1: Nodal development
- Key driver 2: Business, commercial and industrial development
- Key driver 3: Tourism development
- Key driver 4: Forestry development
- Key driver 5: Agricultural development
- Key driver 6: Mining and energy development
- Key driver 7: Urban development
- Key driver 8: Rural development

### **Mpumalanga Economic Reconstruction and Recovery Plan**

It is crucial for Mpumalanga to align with the national ERRP, however, prioritizing those areas that are relevant to the province, that is, it will also seek to address the negative impact of COVID-19 on provincial economy and livelihood, including stimulating growth and job creation through the implementation of key priority areas.

Unlike the national ERRP, the Mpumalanga ERRP Implementation Plan is predominantly project-based. The table below reflects catalytic projects taking place within the Gert Sibande District. Lekwa Local Municipality falls within projects that are district wide.

<b>Catalytic Project</b>	<b>Location</b>	<b>Strategic Objective</b>
Rehabilitation of the Coal Haulage Network	District Wide	To safeguard sustainable energy provision through rehabilitation and maintenance of the coal haulage road network
Improvement of tourism road infrastructure	District Wide	To facilitate easy access to tourism attractions and heritage sites
Secunda West / Langverwacht Integrated Human Settlement	Govan Mbeki	Addressing spatial disparities and creating functional and sustainable human settlements
Emzinoni Ext 11 and Ext 13 Integrated Human Settlement	Govan Mbeki	Addressing spatial disparities and creating functional and sustainable human settlements
Establishment of Petrochemical Industrial Technology Park	Govan Mbeki	To unlock industrial development opportunities throughout the entire value chain of the chemical industry within the Gert Sibande district.
Growing the circular economy	District wide	To promote industrial symbiosis, closed mine rehabilitation and mine water reclamation initiatives for sustainable and clean environment
The Green Cluster 'Just Transition' Programme	District Wide	Support the Carbon Capture and Utilisation Project in Govan Mbeki and Lekwa municipalities and intensify the industrial symbiosis and circular economy

Programmes to increase crop and livestock production	District Wide	To intensify crop & livestock production; enhance agro-processing & fresh produce for export, including support to small scale agri-businesses owned by youth & women.
Light Industrial Hubs	Municipalities in the District	To renovate & convert old buildings to industrial workshops to accommodate artisans, auto mechanics & other skilled business traders in all seven local municipalities in the District.
Digital Infrastructure development	Ermelo	To increase communications & inclusive growth of digital economy within the District.
Siyathuthuka Enterprise Development Programme	District Wide	To develop self-sustainable SMME's and co-operatives businesses that can create jobs for local communities

**Figure 8: Prioritised catalytic projects of the MERRP, SERO Report 2022**

### Some priority areas of the MERRP

- Rollout of infrastructure – i.e., improvement of tourism road infrastructure;
- Industrialisation through localisation and export promotion – the roll-out of the Mpumalanga Industrial Development Plan (MIDP) i.e., establishment of 3 Industrial Technology Parks, the Nkomazi SEZ as well as the Mpumalanga International Fresh Produce Market;
- Energy security and green economy – i.e., recycling and waste to energy;
- Employment stimulus – i.e., increased access to funding for SMMEs and Cooperatives;
- Tourism, cultural and creative industries – i.e., Barberton Makhonjwas Mountains World Heritage Site, and
- Agriculture and food security – i.e., increase in agricultural production (Zonda Indlala).

### Road map of the MERRP

**Figure 9: Roadmap of the MERRP**

## **Mpumalanga Human Settlements Master Plan**

---

The Department of Human Settlement introduced a programme for the compilation of in-situ upgrading plans for Lekwa and other municipalities in Mpumalanga Province as part of a national Upgrading of Informal Settlements Programme (UISP).

The objectives of the Mpumalanga Sustainable Human Settlement Master Plan can thus be summarised as follows:

- To ensure effective allocation of limited resources, financial and human, to a wide variety of potential development initiatives;
- To provide guidance in prioritising human settlement projects in order to obtain consensus for the timing and order of their implementation;
- To ensure more integrated development through co-ordinating cross-sector departments to aligning their development interventions and provincial priorities (like social infrastructure, economic infrastructure, basic services and non-motorized transport, public transport, and Transit-Oriented Development), into one plan;
- To ensure budget allocations are most effectively applied for maximum impact;
- To provide effective linkages between the Provincial, District and Local Spatial Development Frameworks and the location of human settlement projects which include a range of social, economic, environmental and infrastructure investments;
- To ensure there is a definite human settlement focus in the IDP's and SDF's of municipalities in the province with clear direction for future housing delivery across all social and economic categories and locations in the province;
- To provide the Mpumalanga Department of Human Settlement Budgeting process with adequate information about the human settlement plan, its choices, priorities, parameters as well as strategic and operational requirements; Ensure that the contents and process requirements of planning for human settlements are adequately catered for in the integrated development planning processes of provincial departments, district municipalities and local municipalities in the province.

Lekwa Local Municipality (Secondary Node) is listed as one of the priority areas for project implementation in the short, medium, and long term. One of the main objectives for this programme is the compilation of a database to determine the extent of the backlog in housing and to enable the unit to develop a detailed multi-year implementation programme. In the absence of such a plan the unit indicated that Lekwa is one of the third term priorities. It is reported by the Department that the Farm Residents Housing Assistance programme can be better implemented if an off-farm option is utilised. This would, however, require that the affected municipalities to avail suitable sites for this purpose. Another alternative could be the construction of houses for rental occupation (not full ownership) to provide residents the alternative of qualifying for another house should they leave that farm.

Lekwa Local Municipality will receive longer term priority attention. The public sector rental stock through the Community Residential Units (CRU) programme should provide affordable, good quality rental accommodation to a substantial number of the poor with an income of below R3500 per month. In certain areas it should also be utilised to relief slum conditions, Lekwa is one of the current focus areas for CRU funded projects. CRU funded projects in the short term will be focused around Lekwa and other Municipalities. Lekwa as a secondary area with a high demand of

backyard (rental, site, and service) and informal settlements should be high on the priority list. In terms of the Informal settlements' intervention, Lekwa is on the National Priority Areas in Mpumalanga as per the National Department of Human Settlement.

### **National Transport Master Plan (NATMAP) 2050**

---

The NATMAP 2050 vision reinforces that transport is the heartbeat of the economy and the fabric of our socio-economic development in South Africa. Vision - By 2050, transport in South Africa will meet the needs of freight and passenger.

#### **Objectives**

- Creating an improved sustainable public transport system that is sufficiently funded, which aims to reduce subsidy burden, better and safer access, more frequent and better-quality services, and facilities to an agreed standard;
- Supplementary mobility options especially for those who do not have cars;
- Non-motorized transport network development with improved infrastructure
- A transport system that promotes integration between land use planning and transport planning, in order to encourage densification and sustainable development in supporting high volumes of travel required for public transport;
- Upgraded infrastructure, maintained road and rail networks with proper management and operations practices that links and provides interchange opportunities for different modes of transport across the entire country; A transport system that considers of the needs of people living in different parts of South Africa, as well as the different affording abilities for travel;
- A transport system that charges the traveller a fair reflection of the costs of making a journey – financially, socially, and environmentally;
- A transport system that supports focused funding of transport priorities;
- A transport system that has sufficient human capital to drive the transport vision forward;
- A transport system that enables and supports rural development

### **Mpumalanga Tourism and Growth Path**

---

In the year 2017 the provincial government of Mpumalanga developed the Mpumalanga Tourism and Growth Strategy with the intension of developing the tourism sector as a driver of economic activity and diversification. The provincial government of Mpumalanga has established Tourism as a priority sector in Mpumalanga after realising that Mpumalanga has failed to translate its resource base into a significant tourism industry that could transform the economy of the province for good. Mpumalanga is considered a top-tier international tourism destination in South Africa comprising of a wealth of natural resources such as the world's 3rd largest canyon which is the Blyde River Canyon, the world acclaimed Kruger National Park, the breath-taking vistas from the Bulembu mountains, exposed rocks in Barberton and so much more.

The aim of the Tourism Strategy is to elaborate a framework to guide tourism initiatives and development providing the following:

- An integrated Tourism marketing plan
- A tourism human resource plan
- A tourism product development plan
- Proposal for an appropriate institutional framework
- An action plan for implementation
- Strengthen transformation

The goal is to achieve a target of R10 Million in tourism spending over the next coming 10 years starting from 2017. In order to achieve this target, Mpumalanga must move into an investment driven strategy. The objective of the strategy is to obtain sustainable benefits for the people of Mpumalanga by generating additional economic activity.

Ten strategic initiatives to deal with the issues confronting Mpumalanga tourism sector:

- Reorganise the institutional framework
- Improve air access
- Upgrade diversity and expand the product
- Attract tourism investment
- Improve Customer research
- Increase destination and product promotion
- Upgrade service skills
- Improve economic infrastructure

### **Gert Sibande District Development Model**

---

The concept of District Development Plan was instituted by the president of South Africa in 2019. The main objective of the DDM is to promote cooperative governance in the three spheres of government to ensure alignment in terms of development amongst the three spheres. The District Development Model will mainly focus on reprioritization and spatial development. It will mainly consist of stakeholders from local government, sector departments and other relevant stakeholders in development. COGTA will come with the hub that will interface with the district and the other relevant stakeholders to ensure cohesive, coordinated reprioritized spatial planning.

The DDM is an all-government approach to improve integrated planning and delivery across the three spheres of government. The District and Metropolitan spaces are focal points of government and private sector investment. It will assist monitoring Government's development programmes through the concept of a joint "One Plan" in relation to 52 development spaces/impact zones. This approach will help accelerate economic, social, and environmental impact and sustainability.

The GSDM is significant for fast-tracking service delivery and discard of the fragmented approach to development and service delivery. Also, it is critical to state the nature of the municipalities to ensure proper planning and policy formulation towards informed proactive decision making.

The District Development Model seeks to:

- Eradicate "Silo" Planning at different levels and facilitate joint planning

- Narrow the distance between the people and government by strengthening the coordination role and capacities at the district as it is the penultimate sphere closer to the people afterward and local structures
- Deliver Integrated Services whilst strengthening Monitoring and Evaluation and impact at district and local levels
- Maximising impact and aligning resources at our disposal
- Changing the face of our rural and urban landscapes by ensuring complementarity between urban and rural development, with a deliberate emphasis on Local Economic Development
- Ensure sustainable development whilst accelerating initiatives to promote poverty eradication, employment, and equality
- Coordinate government's response to poverty, unemployment, and inequality, notably among women, youth, and individuals with disabilities.
- Ensure that budgeting is based on the needs and aspirations of our people and communities at the local level to ensure inclusivity.
- Reduce the gap between citizens and government by strengthening the coordination role and capacities at the district.
- Encourage the development of a practical intergovernmental relations mechanism to jointly plan, budget, and implement in order to provide a coherent government for the people of the Republic;
- Through the development of "One District, One Plan, and One Budget," we can optimize impact and align plans and resources at our disposal.
- Generate additional capacity to assist municipalities.
- Strengthen monitoring and evaluation at district and local levels.
- Implement a balanced development strategy for urban and rural areas, and
- Oversee budgets and projects in a fair and equitable way.

#### **Gert Sibande District Development Model transformation areas**

**Figure 10: DDM Transformation Areas**

- **Governance and financial management**

The process by which leadership and management is exercised that planning, budgeting, procurement, delivery, financial and performance management takes place in an effective, efficient, accountable, and transparent manner. It also includes spatial governance, that is, the process by which the spatial transformation goals are achieved through assessing and directing land development and undertaking effective land use management and release of municipal/public land.

- **Demographics and district profile**

The process of understanding the current population profile and development dynamics and by which a desired demographic profile and radical improvement in the quality of life of the people is achieved through skills development.

- **Spatial restructuring**

The process by which a transformed, efficient, and environmentally sustainable spatial development pattern and form is created to support a competitive local economy and integrated sustainable human settlements. Spatial restructuring informs infrastructure investment in terms of quantum as well as location and layout of infrastructure networks.

- **Integrated services provisioning**

the process by which integrated human settlement, environmental management, community services, social development, security, and disaster management are delivered in partnership with communities to transform spatial patterns and integrated infrastructure network. This also requires holistic household level service delivery in the context of a social wage and improved jobs, livelihoods and quality of life and sustainable development.

- **Economic positioning**

The process by which a competitive edge is created that enables domestic and foreign investment attraction and job creation based on an inclusive and transformed economy. The economic positioning informs the spatial restructuring and must be sustained through protecting, nurturing, and harnessing natural environment and resources.

- **Infrastructure engineering**

the process by which infrastructure planning and investment especially bulk infrastructure installation occurs in order to support the transforming spatial pattern and form, meet the needs of a competitive and inclusive local economy and integrated human settlements, and ensure demand for housing and services is met in a sustainable way over the long-term.

## 2.2 2023/24 IDP Review Process

In August 2022, Lekwa LM adopted the 2023/24 IDP, Budget and PMS process plan in accordance with the Municipal Systems Act. The process plan provides a schedule of all activities involved in the 2023/24 review of the 5-year IDP. The table below provides a summary of activities and timeframes as per the approved process plan of the municipality.

Action/Project	Jul 2022	Aug 2022	Sept 2022	Oct 2022	Nov 2022	Dec 2022	Jan 2023	Feb 2023	March 2023	Apr 2023	May 2023	June 2023
Compilation and approval of 2023/24 IDP, Budget & PMS Process Plan												
Status Quo & Analysis												
Compilation and Finalization of Ward IDP documents												
Ward Committee public meetings (IDP)												
IDP Representative forum meetings												
Draft IDP & Budget document Completed												
Public meetings (Draft Budget)												
Draft IDP & Budget approved by Council												
Final Council approval												

**Table 3: 2023/24 IDP Review Timeframes**

## Roles and responsibilities in the IDP Review

Distribution of roles and responsibilities within the Municipality	
Municipal Council	<p>As the ultimate <b>political decision-making body</b> of the municipality, the Municipal Council must:</p> <ul style="list-style-type: none"> <li>Consider and adopt a Process Plan.</li> <li>Consider, adopt, and approve the IDP.</li> </ul>
Executive Committee or Mayor	<p>As the <b>senior governing body</b> of the municipality, they must:</p> <ul style="list-style-type: none"> <li>Decide on the Process Plan.</li> <li>Be responsible for the overall management, co-ordination and monitoring of the process and drafting of the IDP and Budget, or delegate this function to the Municipal Manager.</li> <li>Approve nominated persons to oversee the different roles, activities and responsibilities of the process and drafting.</li> </ul>
Ward Councillors	<p>Councillors are the major <b>link between the municipal government and the residents</b>. As such, their role is to:</p> <ul style="list-style-type: none"> <li>Link the planning process to their constituencies and/or wards.</li> <li>Be responsible for organising public consultation and participation.</li> <li>Ensure the annual business plans, and municipal budget are linked to and based on the IDP.</li> </ul>
Municipal Manager and/or IDP Manager	<p>The Municipal Manager or a senior official being charged with the function of an IDP Manager on his/her behalf must <b>manage and co-ordinate to IDP process</b>. This includes to:</p> <ul style="list-style-type: none"> <li>prepare the Process Plan;</li> <li>undertake the overall management and co-ordination of the planning process;</li> <li>ensure that all relevant actors are appropriately involved,</li> <li>nominate persons in charge of different roles;</li> <li>be responsible for the day- to-day management of the drafting process;</li> <li>ensure that the planning process is participatory, strategic and implementation orientated and is aligned with and satisfies sector planning requirements;</li> <li>respond to comments on the draft IDP from the public, horizontal alignment, and other spheres of government to the satisfaction of the municipal council;</li> <li>ensure proper documentation of the results of the planning of the IDP document; and</li> <li>adjust the IDP in accordance with the MEC for Local Government's proposals.</li> <li>Even if the Municipal Manager delegates some of these functions to an IDP Manager on his/her behalf, he/she is still responsible and accountable</li> </ul>
Heads of Departments and Officials	<p>As the persons in charge for implementing IDPs, the technical/sectional officers must <b>be fully involved in the planning process</b> to:</p>

	<ul style="list-style-type: none"> <li>▪ provide relevant technical, sector and financial information for analysis for determining priority issues;</li> <li>▪ contribute technical expertise in the consideration and finalization of strategies and identification of projects;</li> <li>▪ provide departmental operational and capital budgetary information;</li> <li>▪ be responsible for the preparation of project proposals, the integration of projects and sector programmes; and</li> <li>▪ be responsible for preparing amendments to the draft IDP for submission to the municipal council for approval and the MEC for Local Government for comments</li> </ul>
--	---

- Progress Reporting;
- Year Planner;
- Ward Analysis;
- Needs Collection;
- Integrating of Projects;
- Final Document Compilation;

## 2.3 2023/24 IDP Process Plan Implementation

### Community Consultations

Lekwa Local Municipality embarked on an all-inclusive and thorough public participation programme with its local community members in the process of reviewing the five-year 2022/27 IDP for the 2023/24 financial year. The public participation primarily focused on community engagements through physical meetings across all fifteen (15) wards. The Executive Mayor, councillors, Municipal Manager, Heads of Departments and Divisional Managers attended the various meetings. The meetings took place in the months of November and December 2022 during the situational analysis phase and during April and May to consult on the Draft IDP. The municipality used a hailing system to notify residents of the consultations. The schedule of meetings was also published on the municipality's social media page (Facebook).

### Summary of issues raised in November/December 2022 and April/May 2023 community consultations per ward

## CHAPTER THREE: LEADERSHIP AND GOVERNANCE

### 3.1 INSTITUTIONAL OVERVIEW

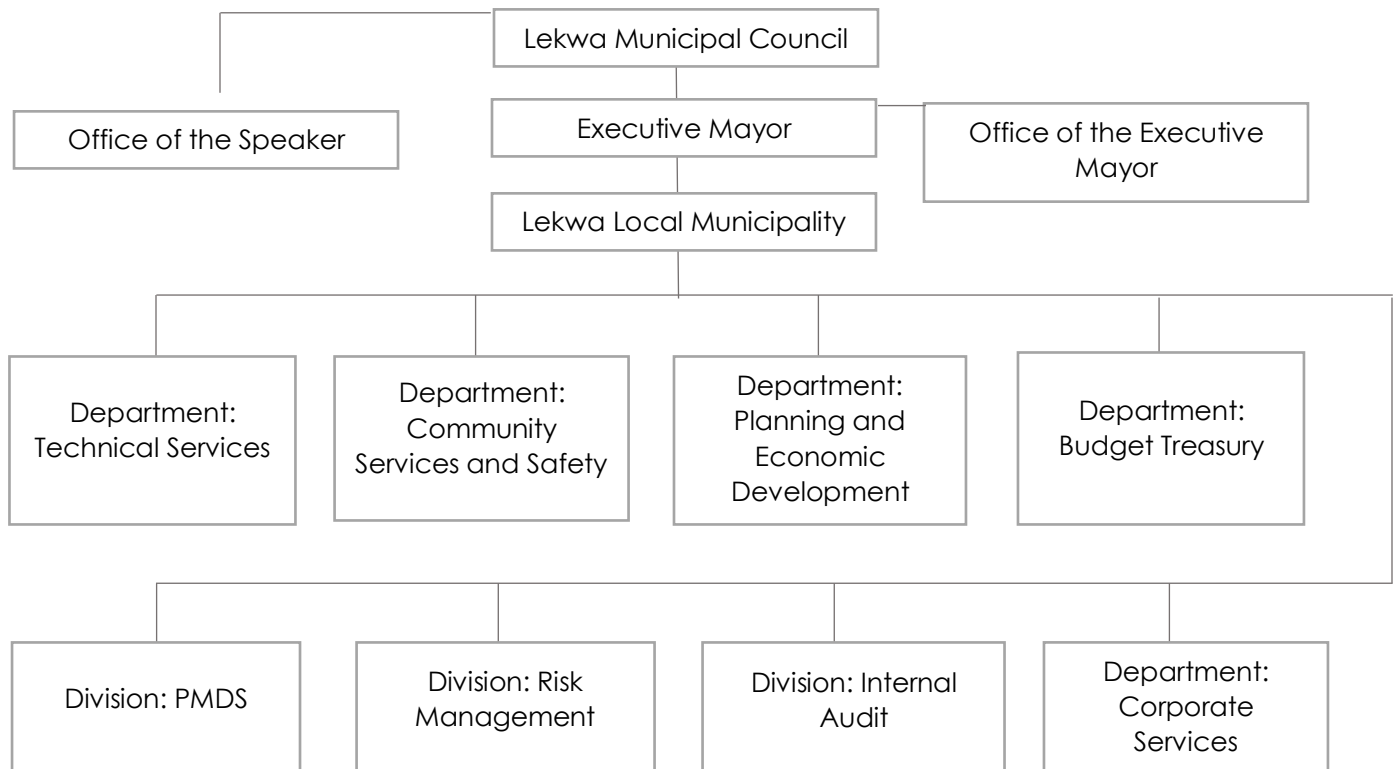

#### 3.2 Lekwa LM Council

Lekwa LM Council consists of thirty members. The council performs both legislative and executive functions. They focus on legislative, oversight and participatory roles. Their primary role is to debate issues publicly and to facilitate political debate and discussion. Apart from their functions as decision makers, councillors are also actively involved in community work and various social programmes in the municipal area.

**Table 5: Composition of Lekwa LM Council**

Political Party	Total Party Seats
ANC – African National Congress	13
LCF – Lekwa Community Forum	6
DA – Democratic Alliance	4
EFF – Economic Freedom Fighters	3
FF+ - Vryheidsfront Plus	3
ATM – African Transformation Movement	1
<b>Total</b>	<b>30</b>

#### 3.3 Lekwa LM Organizational Structure

**Figure 11: Lekwa Local Municipality Organizational Structure**

### 3.4 Departments within the Municipality

Manager	Department	Functions of the Department
Municipal Manager: Mr. Malusi Lamola	Office of the Municipal Manager	<ul style="list-style-type: none"> <li>Manage technical services</li> <li>Coordinate the provision of community services</li> <li>Coordinate municipal planning and economic development</li> <li>Manage financial matters</li> <li>Manage corporate services</li> <li>Render internal audit services</li> <li>Render risk management services.</li> <li>Manage performance management and development system</li> </ul>
Head of Department: Mr. Mthembeni Jiyane	Technical Services	<ul style="list-style-type: none"> <li>Provision Water and Sanitation Services.</li> <li>Provision of Reliable Electricity supply</li> <li>Provision of safe and dependable roads.</li> <li>Improve fleet management.</li> <li>Implementation of capital projects.</li> <li>Operation and maintenance (O&amp;M) of infrastructure e.g., water sanitation, electricity, roads &amp; storm-water, Municipal buildings and mechanical.</li> </ul>
Head of Department: Ms. Thobeka Mtshiselwa	Community Services and Safety	<ul style="list-style-type: none"> <li>Render traffic management and law enforcement services.</li> <li>Render fire and disaster management services.</li> <li>Coordinate waste management services.</li> <li>Coordinate the maintenance of parks, gardens, cemeteries and amenities.</li> <li>Manage transversal services.</li> <li>Render library and information services</li> <li>Render security services</li> </ul>

Head of Department: Mr. Mahlatse Phosa	Planning and Economic Development	<ul style="list-style-type: none"> <li>▪ Coordinate the development and implementation of integrated development plan;</li> <li>▪ Render spatial planning and land use management services;</li> <li>▪ Promote local economic development (LED);</li> <li>▪ Render sustainable and integrated human settlements planning</li> <li>▪ Render land and property management services;</li> </ul>
Head of Department: Ms. Lindiwe Khoza	Corporate Services	<ul style="list-style-type: none"> <li>▪ Render HRM and HRD services.</li> <li>▪ Render labour relations services.</li> <li>▪ Render legal services.</li> <li>▪ Render administrative support services.</li> <li>▪ Manage information and communication technology services.</li> <li>▪ Customer care and</li> <li>▪ Manage municipal communication services</li> </ul>
Chief Financial Officer: Mr. Kgomoiso Duba	Budget and Treasury Office	<ul style="list-style-type: none"> <li>▪ Manage municipal budget and financial reporting.</li> <li>▪ Render revenue management services.</li> <li>▪ Manage expenditure services.</li> <li>▪ Render supply chain management services.</li> <li>▪ Manage municipal assets</li> </ul>

Table 7: Socio-Economic Overview of Lekwa LM

## Population

According to Stats SA, the municipality's population for **2023** is **140 970** which makes up 10.8% of Gert Sibande's population. It is further projected that the municipality's population will increase to **155 094** in **2031**. The municipality will continue to experience population growth as per the table below. Lekwa LM will experience pressure on infrastructure, service delivery and the need for economic/employment opportunities.

Year	Estimated Population	Year	Estimated Population
<b>2021</b>	137 124	<b>2027</b>	148 176
<b>2022</b>	139 046	<b>2028</b>	149 892
<b>2023</b>	140 970	<b>2029</b>	151 626
<b>2024</b>	142 846	<b>2030</b>	153 366
<b>2025</b>	144 687	<b>2031</b>	155 094
<b>2026</b>	146 472		

**Table 8: Lekwa LM Population Figures, Stats SA 2021 Mid-year population estimates**

### Population growth rate

Population growth rate refers to how fast a population changes in size over time. A growth rate signifies that more people are settling in the municipality and a negative growth rate signifies that people are moving out of the municipality. The graph below indicates that the growth rate in Lekwa LM is positive, meaning that Lekwa's population is growing. However, it is growing at a slower pace than it was in the previous years. In the period 2021-2022 the population grew at a rate of 1.4, this has decreased to 1.3 in 2023-2024. It will further decrease to 1.1 in 2030-2031.

**Figure 12: Population growth rate graph, Stats SA 2021 Mid-year population estimates**

**Implications for service delivery:** Increased population will require the municipality to avail more services and economic opportunities. As such, Lekwa LM must upgrade and expand its infrastructure (water, sewer, electricity, sanitation, roads, waste etc.) to accommodate for a larger population. The municipality must also create an enabling environment to attract investment through improved service delivery and policies.

## Population Distribution

A large portion of Lekwa's population live in Sakhile, followed by the Standerton town area. However, new settlements established such as Ext. 4, 6 & 7 have grown tremendously and more people are settling in these areas. The demand for services comes mainly from the Sakhile and the Town area (See map below). Rural areas such as Holmdene and Platrand have fewer people which is a challenge in the provision of services. As such, rural wards are mostly provided with boreholes and VIP toilets due to the extra cost associated with extending bulk infrastructure to the outskirts of the municipality.

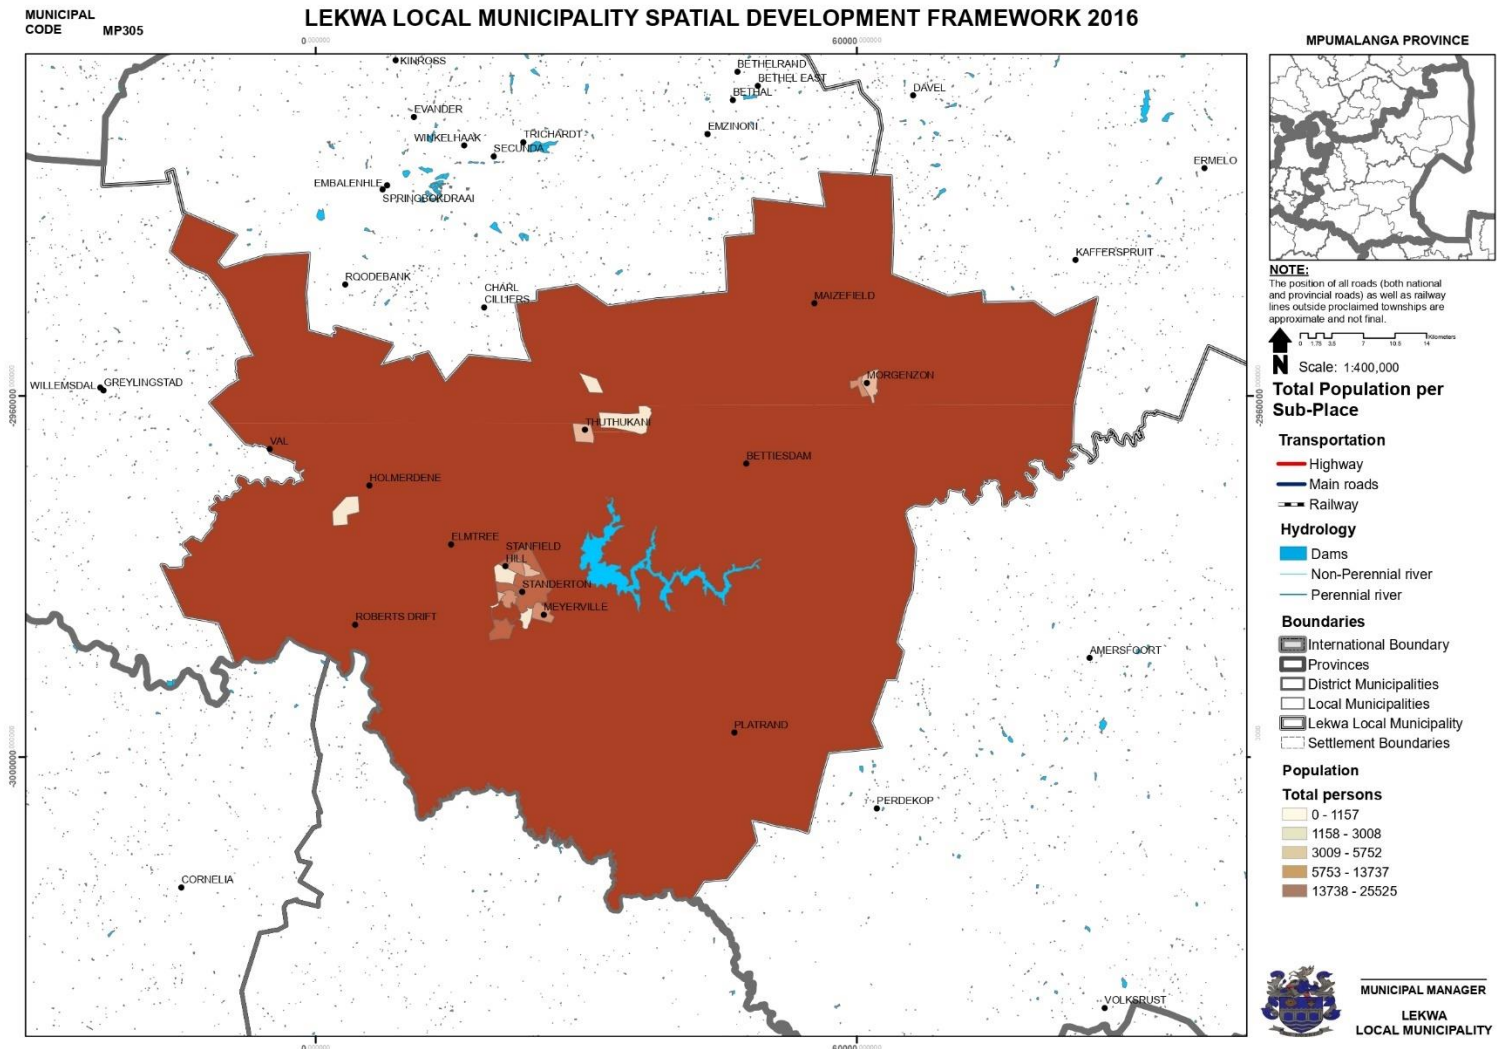

Figure 13: Population Distribution Map, Lekwa SDF 2017

**Implications for service delivery:** The municipality needs to continuously do service connections for new developments. This means that the land use management department will have to conduct inspections to ensure that all new developments adhere to service requirements. The municipality must also expand its infrastructure to accommodate growing settlements. This also implies that the municipality will experience pressure to develop new township establishments.

## Age and sex composition

In 2022, the 35-39 age group was the largest with a total number of 14410 people (10.36%) followed by the 30-34 age category with 14052 (10.10%) people as depicted in the pyramid graph below. The population comprised of 50.25% males and 49.75% females in 2022. These statistics indicate that the municipality has a young population dominated by the youth. This can be advantageous as it indicates a huge labour force. However, if the economy of the municipality cannot absorb them, Lekwa will experience high unemployment and possible out-migration including social ills that accompany unemployment.

**Figure 14: Population Pyramid, Stats SA 2021 Mid-year population estimates**

Male Population  
2022:  
**69 871 (50.25%)** of  
the total population  
(Stats SA 2021 Mid-  
year population  
estimates)

Female Population  
2022:  
**69 175 (49.75%)** of  
the total  
population (Stats  
SA 2021 Mid-year  
population  
estimates)

Youth Population  
(15-34 years) 2022:  
**46 289 (33.29%)** of  
the total population  
(Stats SA 2021 Mid-  
year population  
estimates)

Children between  
the ages 0-14 years  
in 2022: **12 131  
(8.72%)** (Stats SA  
2021 Mid-year  
population  
estimates)

### Annual growth rate of children 0-14 years

The graph below depicts that the municipality's annual growth rate for children between 0-14 years for 2023-2024 is **-0.6**. This is a decrease from the -0.4-rate recorded in 2022-2023 and the 0.1 rate in 2021-2022. The annual growth rate will further decrease to -0.7 in 2024/25.

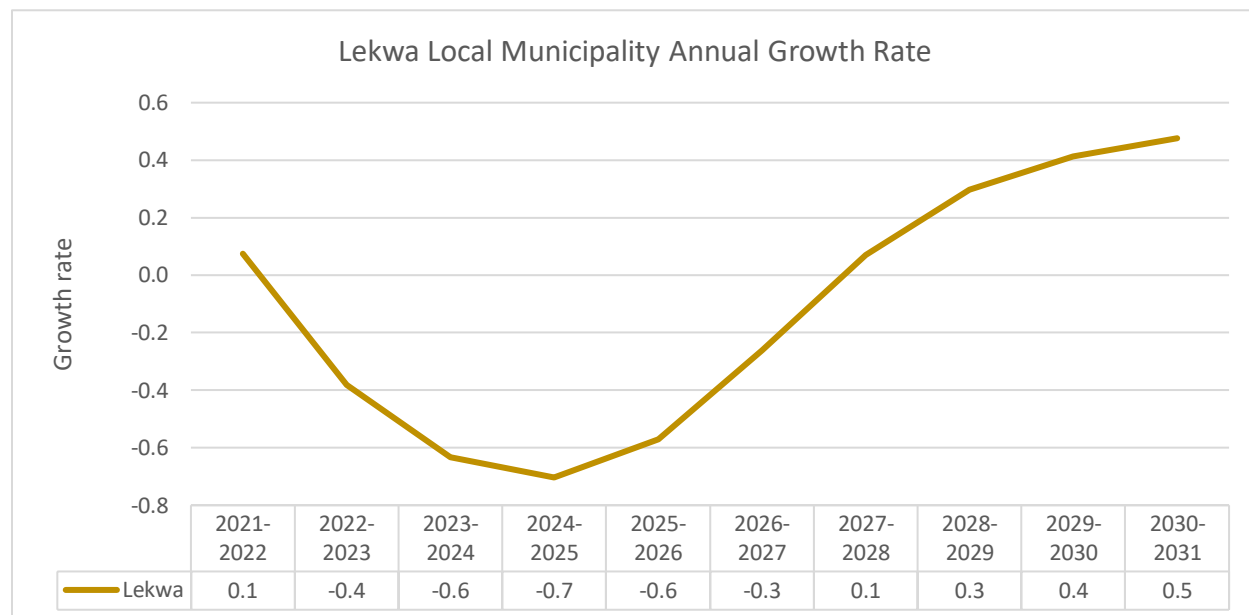

Figure 15: Annual growth rate for children (0-14 years), Stats SA Mid-year population estimates 2021

**Implications for service delivery:** Early Childhood Development (ECD) centres will have less enrolments during these periods. This may affect the operations of some centres as there will not be enough children to go to ECDs. The municipality will have to put a hold on planning new ECDs centres during this period.

### Older persons, women, children, and youth

#### Trends per category:

**Youth:** The statistics indicate that the youth population is decreasing in the municipality. The youth population was 46 445 in 2021, and it is projected that it will decrease to 46 174 in 2023 and 45 081 in 2031.

**Children:** The number of children in the municipality is fluctuating. In 2021, children were recorded at 34755. The number is projected to decrease to 34648 in 2023. The number of children in the municipality will further decrease to 34334 in 2031.

**Older persons:** In 2021, older persons were recorded at 13062 and increased to 13893. This is opposite to what is observed in the youth category as the number of older persons is increasing over the years.

**Women:** The women population in Lekwa LM is increasing. In 2021, the women population was recorded at 43566 and 44930 in 2023. It is further estimated that the women population will further increase to 49 397 in 2031.

Year	Youth	Children (0-14)	Older persons	Women
2021	46445	34755	13062	43566
2022	46289	34781	13447	44233
2023	46174	34648	13893	44930
2024	46062	34430	14345	45631
2025	45958	34189	14809	46310
2026	45826	33994	15264	46933
2027	45696	33906	15663	47473
2028	45527	33930	16051	47967
2029	45369	34030	16436	48448
2030	45220	34171	16828	48925
2031	45081	34334	17252	49397

**Table 9: Older persons, women, children and youth, Stats SA Mid-year population estimates 2021**

### Factors affecting population change

The statistics below indicate factors that affect population change in Lekwa Local Municipality. The factors include migration, fertility, and mortality rates. These are utilised to understand what causes the population to decrease or increase.

#### Migration

Migration refers to the movement of people to a new area for better living conditions including work, services, and any other opportunities. In-migration means people are moving into the municipality and out-migration means people are leaving the municipality.

#### % Distribution of in-migration, 2016

In 2016, the municipality had a 2,3% in-migration of persons in the 14-35 (youth) age group which was the same as the 2,3% in-migration recorded for persons in the 36-59 age group. This means that mainly youth and working age groups are settling in the municipality. The statistics thus reflect that there are educational and work opportunities that draw people to the municipality.

Age group	14-35	36-59	60+
Chief Albert Luthuli	21,2	19,9	12,2
Msukaligwa	3,0	2,3	4,9
Mkhondo	3,1	3,5	0,0
Dr Pixley Ka Isaka Seme	1,1	0,6	0,0
<b>Lekwa</b>	<b>2,3</b>	<b>2,3</b>	<b>0,0</b>
Dipaleseng	0,7	0,9	2,4
Govan Mbeki	3,5	5,8	4,9

**Table 10: % Distribution of in-migration, 2016**

% Distribution of out-migration, 2016

The 36-59 age category is the largest group of people leaving the municipality at 3,2% followed by the 60+ group recorded at 2,9%. The statistics indicate that the municipality is losing a large portion of the labour force. This may be attributed to unemployment and the youth leaving to attend tertiary institutions in other provinces. The 60+ category also indicates that those retiring move out of the municipality.

Age group	14-35	36-59	60+
Chief Albert Luthuli	4,5	4,1	5,2
Msukaligwa	3,6	3,7	3,4
Mkhondo	3,6	3,3	3,2
Dr Pixley Ka Isaka Seme	1,8	1,9	2,3
<b>Lekwa</b>	<b>2,6</b>	<b>3,2</b>	<b>2,9</b>
Dipaleseng	1,0	1,1	1,2
Govan Mbeki	7,3	8,3	6,8

Table 11: % Distribution of out-migration, 2016

Reasons for migration

A large portion of people in Gert Sibande mainly migrate to be or closer to a spouse as is recorded at 22,5%. This is followed by job transfers and new job opportunities at 14,9%. Looking for paid work is also a big reason for migration including education.

Reasons	Gert Sibande	Nkangala	Ehlanzeni	MP
Divorce/separation	1,3	1,0	1,4	1,2
Education	11,2	9,7	6,5	9,1
Better services	2,3	3,0	2,6	2,7
Health	1,0	1,0	1,3	1,1
High levels of crime	0,4	0,4	0,7	0,5
Job loss/retrenchment/contract ended	2,2	1,1	1,4	1,5
Job transfer/take up new job opportunity	14,9	11,9	12,9	12,8
Look for paid work	11,3	15,1	11,1	13,1
Relocation of household	8,4	8,1	6,8	7,8
Moving to be with or be closer to spouse	22,5	18,7	26,9	21,9
New dwelling for household	0,6	0,9	1,2	0,9
Other business reason	0,8	1,3	0,8	0,9
Political instability/religious conflict/persecution	0,2	0,2	0,3	0,2
Retirement	0,1	4	2	0,3
Start a business	0,9	0,7	0,4	0,6
Other	4,4	5,3	3,7	4,6

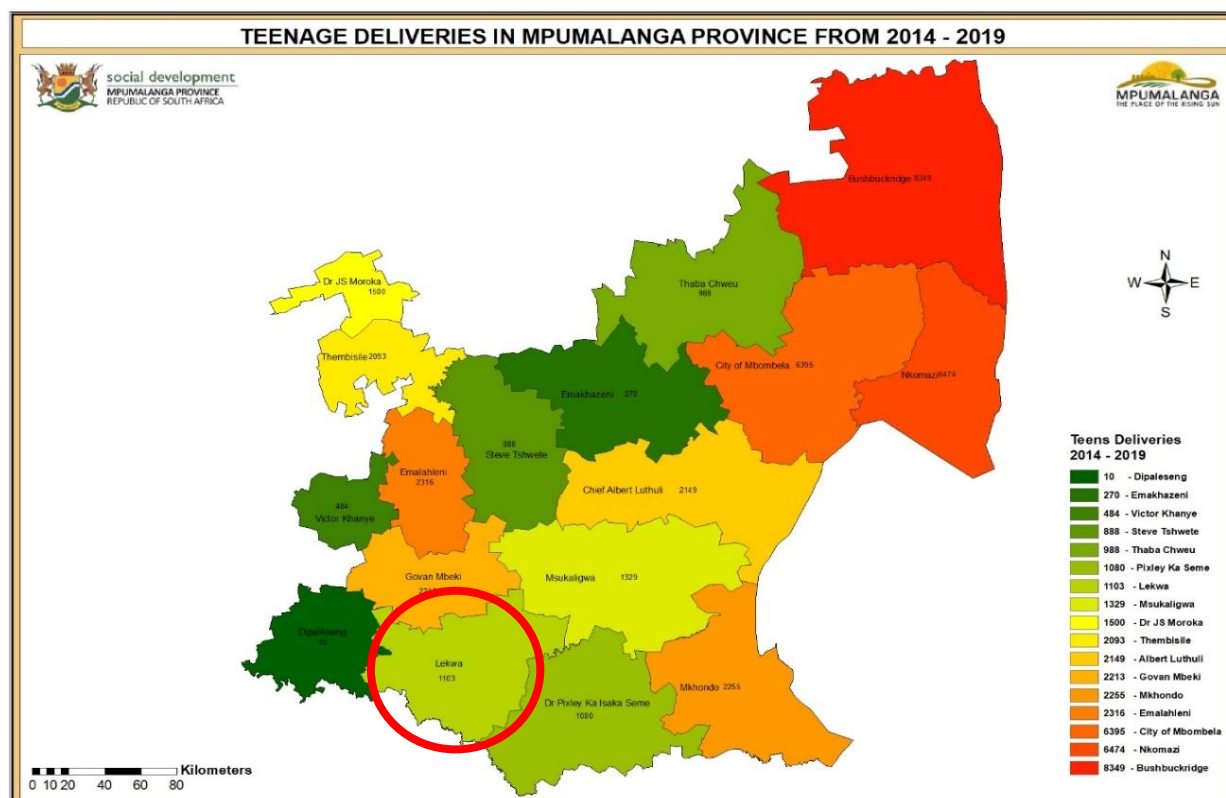

Table 12: Reasons for migration

**Implications for service delivery:** The municipality needs to prioritize economic development and education. This is to avoid brain drain/ out-migration of skilled labour due to the lack of employment opportunities. As education is cited as one of the main factors, the municipality should provide support to stakeholders that run educational facilities such as Gert Sibande Tvet College to grow and attract more people to the municipality. However, this means that the municipality will also have to upgrade its infrastructure and services to provide for the growing population.

## Fertility

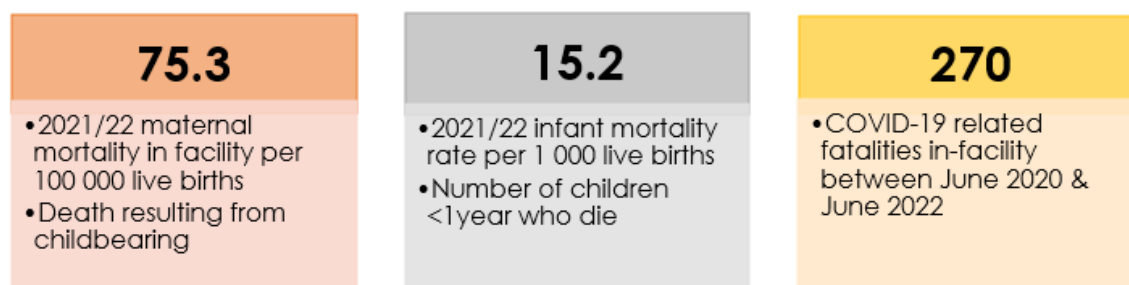

Fertility is a contributing factor to population change. Lekwa LM has a relatively low rate of teenage deliveries in the Mpumalanga Province. From 2014-2019, the municipality had 1103 teenage deliveries as indicated in the map below. The population of Lekwa is growing due to births however, it is less than that of most municipalities within the province.

**Map 2: Teenage Deliveries in Mpumalanga province 2014 – 2019, Source: Department of Social Development**

## Mortality

Mortality refers to the state of being subject to death or the number of deaths in each area or period from a particular cause. In Lekwa childbearing is a large contributor to mortality within the municipality.

**Figure 16: Mortality in Lekwa Local Municipality, SERO Report 2022**

## Disability index

The disability index below reflects individuals aged 5 years and older with disability by gender for 2021. Mpumalanga has 162 000 disabled persons. 77 000 of those disabled are males and 86 000 are females.

Indicator	Stats ('000)	Province									
		WC	EC	NC	FS	KZN	NW	GP	MP	LP	RSA
Male	No.	154	109	35	52	248	74	195	77	136	1 081
	%	4,9	4,0	6,2	4,2	4,9	4,1	2,6	3,9	5,2	4,1
Female	No.	163	167	45	80	335	97	260	86	140	1 374
	%	4,8	5,5	7,9	5,6	6,1	5,0	3,7	3,8	5,1	4,9
Total	No.	318	276	80	132	583	171	455	162	276	2 454
	%	4,9	4,8	7,1	4,9	5,5	4,6	3,1	3,8	5,2	4,5

**Table 13: Disability by gender, General Household Survey 2021**

The graph below breaks down the prevalence of disability per district. In Gert Sibande District, 116 490 persons have a disability in seeing. This is followed by a disability in remembering (43 971). The lowest type of disability prevailing in the district is communication.

**Figure 17: Prevalence of disabilities by district, Community Survey 2016**

**Implications for service delivery:** The municipality needs to invest in disability inclusive infrastructure. Services rendered by the municipality should also make provision for disabilities. This includes schools for persons living with disability. Community halls should have ramps for those who cannot walk, provision of walkways that accommodate wheelchairs, access to parks, signboards for those struggling with remembering, communication should be in the form of brail letters and loud hailing to accommodate those who cannot see or communicate.

### Support Programmes for various groups

The table below indicates various support programmes provided by the Department of Social Development within Lekwa Local Municipality. The aim of these programmes is to aid marginalized groups.

**Table 14: Support Programmes for various groups, Department of Social Development**

<b>CARE AND SUPPORT SERVICES TO OLDER PERSONS</b>

### Health Indicators in Lekwa LM

Figure 18: Health Indicators, SER Report 2022

**Figure 19: HIV Prevalence 2011-2013, Department of Health: Antenatal Survey of 2013**

### Households

Between 2011 and 2016, the number of households in Lekwa increased by 6 263 to 37 334 households. The household size declined from 3.7 to 3.3 over the same period. The household number for 2022 is estimated at 46 448. It is estimated that the number of households will increase to 51 232 in 2030.

**Figure 20: Number of households by local municipality from 2021-2031**

## Basic Service provision

### Overall household services performance of Lekwa

- According to the 2016 Community Survey of Stats SA some challenges remained in terms of informal dwellings, access to piped water, & flush/chemical toilets.
- The number of informal dwellings decreased slightly from 7 414 in 2011 to 7 129 in 2016, however, 19.1% of households still lived in informal dwellings.
- In 2016, the number of households with access to piped water was 34 987 or 93.7% of total households. This was lower than the percentage access in 2011 – deteriorating trend and 6.3% of households still without access to piped water.
- Number of households without access to flush/chemical toilets increased between 2011 and 2016. Still some 13.4% without access to flush/chemical toilets and 1 114 households without any toilet facilities.
- Households connected to electricity increased to 33 991 and the share of households connected to electricity improved to a level of 91.5% in 2016 – 3 190 households still not connected to electricity at all.
- According to the *Blue Drop Progress Report 2022*, Lekwa received a “medium” Blue Drop Risk Rating (BDRR). The BDRR improved from “high” in 2014 to “medium” in 2020/21, but was still the 5<sup>th</sup> highest in Mpumalanga. 1 of the 2-water supply system held a “medium” risk, & 1 a “low” risk.
- According to the *Green Drop Report 2022*, Lekwa received a “critical” Green Drop Risk Rating (GDRR). The GDRR remained “critical” between 2013 and 2020/21, however, the level deteriorated and was the 2<sup>nd</sup> worst among the municipal areas. Both waste water treatment works held a “critical” risk.
- Lekwa ranks 9<sup>th</sup> highest in Mpumalanga in the *Out of Order* municipal rankings by News24 and scored 48/100. Lekwa was 1 of 6 Municipalities in Mpumalanga that featured on National COGTA's list of 66 dysfunctional municipalities in 2022.

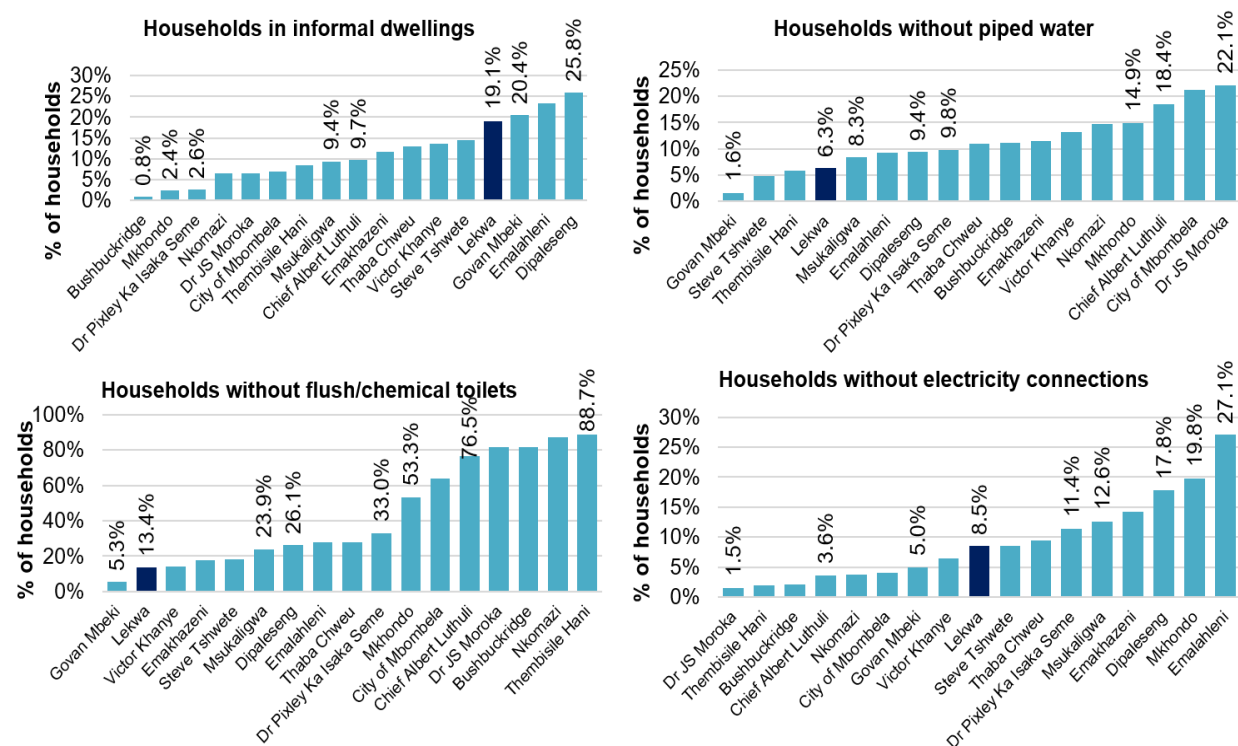

Figure 21: Household services performance of Lekwa, SERO Report 2022

## **Water**

Approximately 88.65% of households in Lekwa LM are getting water from a regional or local service provider. This is about the same as the rate in Gert Sibande at 88.84% and Mpumalanga 86.85%. According to the Community Survey 2016, 46% of households have piped water inside their dwellings, and 42% have piped water inside their yards. Boreholes are only used as a water source by 4% of households and 2% of households use communal taps. The table below further indicates that in 2020, 92.9% of households had access to water inside the yard, 5.6% in less than 200m from the yard, and 1.5% access water from a source located more than 200m from the yard (SERO Report, 2022).

These statistics indicate that the municipality needs to budget for the provision of piped water to households that have no access to water and households that utilise public/communal taps. Some households opt to have their own water supplier and more research needs to be conducted on the connection of these households to the infrastructure of the municipality.

**Table 15: Water supply per municipal area in 2020, SERO Report 2022**

Inside the yard	Water supply share		Number of	
	<200m from yard	>200 from yard	Domestic units	Non-domestic units
92.9%	5.6%	1.5%	32 775	1 530

## **Electricity**

In 2021, only 2 130 households had no electricity. The backlog was recorded at 6.2%. This is a decrease from the 8.5% recorded in 2016. This implies that the municipality has managed to provide electricity to households who previously did not have access. However, the municipality still needs to budget to provide 2 130 remaining households with electricity.

The 2016 Community Survey further shows that 84% of households use an in-house prepaid meter.

Approximately 1% of households use other sources and are not paying for electricity. The figures imply that the municipality needs to budget to connect households without electricity and source assistance from programmes such as Integrated National Electrification Programme (INEP) to ensure that all households have access to electricity.

**Table 16: Electricity backlog in Lekwa LM recorded in 2021, SERO Report 2022**

Number of households with no electrical connection	Backlog share of households with no electrical connection
2 130	6.2%

## **Sanitation**

According to the Stats SA – Non-financial Census 2020, 88.4% of households in the municipality have access to toilets that flush and are connected to the public sewerage system. Households with flush toilets connected to septic tanks are recorded at 1.1%. No households use the bucket system and 10.5% of households use ventilated improved pit (VIP) toilets. The municipality should focus on providing flush toilets connected to sewer to households that still use VIP toilets. In 2021,

Lekwa LM had a hygienic toilet backlog of 6.2%. This means that only 2 107 households within the municipality have no access to hygienic toilets (SERO Report, 2022).

Flush connected to public sewerage	Flush connected to septic tank	Bucket System	Ventilated improved pit	Other
88.4%	1.1%	0%	10.5%	0%

**Table 17: Different types of toilets in 2020, SERO Report 2022**

### **Refuse Removal**

The municipality in 2021 recorded 6 834 households with no access to formal refuse removal (SERO Report, 2022). The Community Survey 2016, recorded that approximately 65.8% of households get their refuse collected by the municipality/ private company/ community at least once a week. The municipality has households that do not have their rubbish disposed of, which could be a health and environmental hazard. The municipality needs to budget for the provision of refuse removal for 20% of households within the municipality.

Number of households with no formal refuse removal	Backlog share of households with no formal refuse removal
<b>6 834</b>	<b>20%</b>

**Table 18: Refuse removal backlog for 2021, SERO Report 2022**

Removed by local authority/ private company/community at least once a week	Removal by local authority/private company/community members less often than once a week	Communal refuse dump	Communal container/ Central collection point	Own refuse dump	No rubbish disposal	Other
24 562	270	2 181	49	4 887	5 153	232
65.8%	0.7%	5.8%	0.1%	13%	13.8%	0.6%

**Table 19: Refuse removal statistics for Lekwa LM, Community Survey 2016**

### **Formal dwelling backlog**

In 2021, approximately 6 523 households (19.1%) within the municipality live in non-formal dwellings. In 2011 the number stood at 7 414 and 7 129 in 2016. This indicates a drop in the number of households living in non-formal dwellings from 2011 to 2022. The municipality has 6 523 households residing in informal dwellings. The number decreased from 7 129 in 2016, reflecting that 606 households moved to formal dwellings within a period of five years.

Number of households in non-formal dwellings	Backlog share of households in non-formal dwellings
<b>6 523</b>	<b>19.1%</b>

**Table 20: Formal dwelling backlog, SERO Report 2022**

**Households in RDP/ government subsidised dwellings in Lekwa LM**

According to the CS 2016, 26.3% of households in Lekwa LM reside in RDP/government subsidised dwellings. The statistics reflect the presence of the Department of Human Settlements in the municipality. It can also be deduced from the number of non-subsidised dwellings that there is a need for services stands to cater for residents who want to build their own dwellings. There is also a need to provide alternative housing options for those who do not qualify for RDP houses.

RDP Government subsidised dwellings		Not RDP/ Government subsidised dwellings		Total
No.	%	No.	%	No.
9 786	26.3%	27 404	73.7%	37 190

**Table 21: Households residing in RDP dwellings in Lekwa LM, Community Survey 2016**

**Blue Drop Risk Rating (BDRR)**

The Blue Drop Risk Rating is a tool developed by the Department of Water and Sanitation to manage risks associated with the drinking water service provision. According to the Blue Drop Progress Report 2022, the Morgenzon WSS falls in the low-risk category and the Standerton WSS falls in the medium-risk category.

Criteria A – The design capacities for both the WSS were provided.

Criteria B – The Morgenzon WSS and Standerton WSS are operating above their design capacities as they operate above 90%. This is an indication of lack of flow management.

Criteria C - The Morgenzon WSS achieved excellent Microbiological compliance and Microbiological Monitoring compliance, while achieving non-compliance for Chemical compliance and Chemical Monitoring compliance. The Standerton WSS did not achieve water quality compliance indicating failures for both microbiological and chemical determinants with insufficient number of samples to verify the quality of water. This represents a serious health risk to consumers in the Standerton WSS.

Criteria D – The Standerton WSS achieved excellent compliance (100%) and Morgenzon WSS achieved adequate compliance for technical skills, which is an indication of adequate presence of relevant process controllers, supervisors, and maintenance teams.

Criteria E – Both the WSS indicated the absence of Water Safety Planning and development of risk-based water quality monitoring programmes as outlined in SANS 241: 2015.

Assessment Areas	Morgenzon	Standerton
BULK / WSP		
A: Total Design Capacity (Ml/d)	2	20
B: % Operational Capacity in terms of design	120%	200%

**Implications for service delivery:**

The Regulator encourages the WSA and WSP to urgently implement the following recommendations to ensure delivery of safe drinking water for all consumers:

- A and B: Installation of calibrated inflow meters to verify operational capacity.
- Ca: Implementation of corrective measures in the event of microbiological and chemical failures to always ensure delivery of safe drinking water.
- Cb: Implementation of monitoring programmes with sufficient samples based on population size as outlined in SANS 241: 2015.
- D: Appointment of suitably qualified staff (supervisors, process controllers and maintenance teams) aligned to set criteria.
- E: Development of Water Safety Plan as per SANS 241: 2015 and WHO guidelines including risk assessment of entire supply system, water quality evaluation based on full SANS 241: 2015 analysis of raw and final water, development of risk-based monitoring programmes, and implementation of mitigating measures to address all medium and high risks.

**Green Drop Risk Rating (BDRR)**

The Green Drop Risk Rating is a tool developed by the Department of Water and Sanitation to measure the performance of municipalities in wastewater management. The municipality was identified to have the following wastewater treatment systems in critical state and was advised by the Regulator to issue a Corrective Action Plans (CAPs) and ringfenced grant allocation to the identified systems. The following results were found following analysis of the CAPs and funds as submitted by the WSA during the period 1 April 2022 to 31 March 2023.

**BASELINE:**

WSI Name	WSI 2021 GD Score	WSI TSA Score	Total VROOM Cost	WWTW Names (<31% score)	WWTW 2021 GD Score

**Indigent support for basic services**

The key purpose of an Indigent Support Policy (ISP) is to ensure that households with lower incomes are not denied reasonable services, while municipalities are not financially burdened because of the failure by consumers to pay. The table below reflects that **1 450** households within the municipality receive indigent support for water, electricity, sewerage, sanitation, and solid waste management.

Area	Indigent households identified	Water	Electricity	Sewerage and sanitation	Solid waste management
<b>Gert Sibande</b>	<b>25 514</b>	<b>25 514</b>	<b>23 463</b>	<b>25 307</b>	<b>25 307</b>

- Govan Mbeki	11 547	11 547	9 496	11 547	11 547

**Table 22: Households benefitting from indigent support in 2020, SERO Report 2022**

## Education

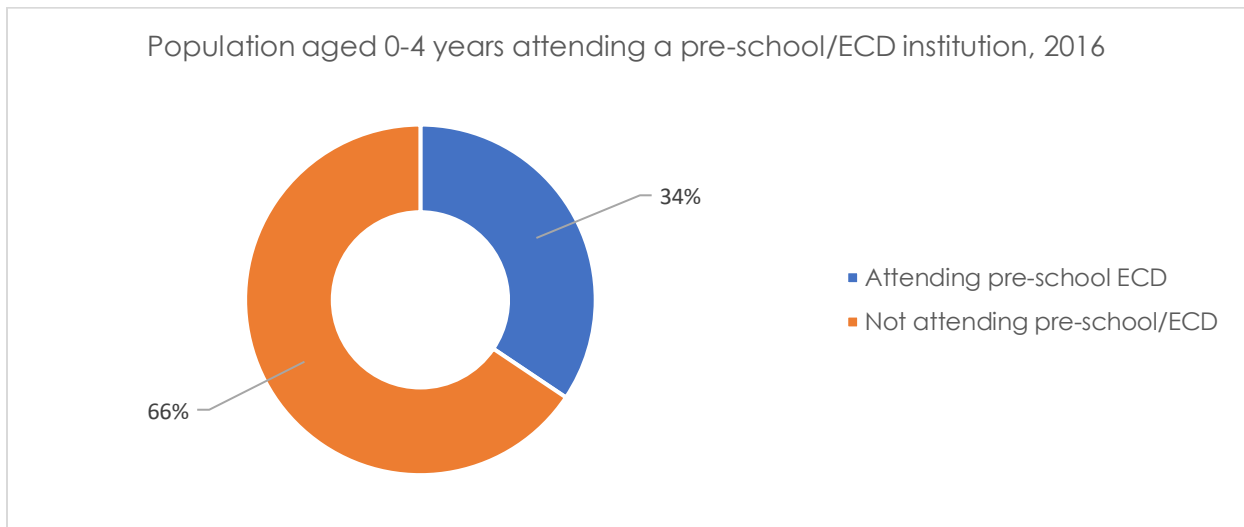

Lekwa's grade 12 pass rates deteriorated from 84.7% in 2014 to 75.9% in 2021. In 2022, the pass rate improved to 80.5% - the 7<sup>th</sup> highest of the 17 municipal areas in 2022. Decline in the pass rate by more than 10 percentage points between 2019 and 2020. Negative impact of COVID-19. Improved with 1.1 percentage point in 2021. The area achieved an admission rate to university/degree studies of 30.6% in 2022, which is an improvement from the 27.9% recorded in 2021. The challenge is to accommodate/ retain the educated young people in the area due to inadequate economic opportunities.

Grade 12 Pass Rate				Admission to B Degree studies
2014	2020	2021	2022	2022
84.7%	74.8%	75.9%	80.5%	30.6%

**Table 23: Basic Education and performance in Lekwa LM, SERO Report 2022**

### Early Childhood Development (ECD)

Early childhood development is one of the priority areas of the South African government and remains a critical policy issue that the Department of Education aims to address. The figure below depicts percentages of children aged 0-4 years of age by school attendance and it shows that 66% of children between the ages of 0-4 in Lekwa are not attending pre-school or any ECD institution.

**Figure 24: Population aged 0-4 years attending ECD, Community Survey 2016**

### Functional literacy rate

Functional literacy refers to practical skill set needed to read, write, and do math for real-life purposes, so people can function effectively in their community. Lekwa LM has a functional literacy rate of 85.8% recorded in 2021 – the 8<sup>th</sup> highest in the 17 municipalities. The trends from 2010 to 2021 indicates a positive trend and it implies that communities in the municipality can provide meaningful input and understand information communicated. This also implies that there is an opportunity for skilled labour.

Age 15yrs+ & completed Grade 7 or Higher		Trend	Age 15yrs + & completed Grade 7 or higher		Trend
2010	2015	2010-2015	2016	2021	2016-2021
75.8%	79%	😊	79.5%	85.8%	😊

**Table 24: Functional literacy in Lekwa LM: 2010 – 2021, SERO Report 2022**

### Highest level of education

The figure below shows the distribution of the population aged 20 years and older by the highest level of education. The results indicate that out of the population in Lekwa, about 9.5% have no formal education, while only 7.9% attended higher education. A large proportion of the population attended secondary school but only 28.6% completed secondary school. This reflects a drop out trend in secondary schooling.

**Figure 25: Highest level of education, Community Survey 2016**

### Crime Indicators

Annual Crime Stats for 2021/22 indicate that the number of serious crimes reported in Lekwa LM decreased to 229 from 241 recorded in 2018/19. The municipality has a ranking of 12, which is 5 ranks away from being the worst. More work needs to be done to curb crime; however, the trend is positive as the numbers are decreasing.

17 Serious Crimes/ 10 000		Ranking (1=best to 17=worst)	Trend
2018/2019	2021/22		
241	229	12	😊

**Table 25: Serious crimes reported in Lekwa LM, SERO Report 2022**

### Crime categories

The highest crime committed is driving under the influence of alcohol and drugs followed by malicious damage to property. Not many carjacking crimes are reported as well as public violence. Many crimes are detected due to action taken by police.

Figure 26: Categories of crime for 2022

## 4.2 ECONOMIC LANDSCAPE

### Lekwa Economy

- The municipality's contribution to the Mpumalanga economy in 2021 was 3.9% – 7th largest economy in the province. Slightly larger than Nkomazi. Lekwa contributed 14.4% to the district economy – 3rd largest economy in Gert Sibande.
- The average annual economic growth rate for the municipality was 1.6% p.a. over the period 1996 to 2021. For the period 2016 - 2021 the economy expanded by 3.7% p.a.
- Estimated contraction in 2020 of 2.0% due to the COVID-19 lockdown. The economy expanded by 7.3% in 2021 & was expected to expand by 1.9% in 2022.
- The estimated average annual GDP growth for Lekwa between 2021 & 2026 is 3.1% p.a.
- In 2021, the size of the economy was estimated at R17.2 billion in current prices & R11.8 billion in constant 2015-prices.
- In 2021, the four largest industries were community services, mining, trade, & finance. These four industries combined to contribute 57.2% to the economy of Lekwa.
- Lekwa holds comparative advantages in agriculture, mining, & utilities (mainly electricity).

### **Labour market indicators in Lekwa**

The 2021 strict unemployment rate for Lekwa LM was recorded at 22.8% which is lower than the 25.7% recorded in 2020. The statistics indicate that it is one of the lower rates in the province, but still relatively high in comparison with the national 6% target by 2030. In 2021, the strict unemployment rate for females was 27.4%. The youth (15-34 yr.) strict unemployment rate for 2021 is recorded at 36.1%, which is high for Lekwa. There is concern about the high share of unemployed youth & especially females – there appears to be a mismatch between their offering of education and skills (or lack thereof) and the demand of the labour market, but also a lack of investment to create jobs. Importance of quality and relevant education and training in line with the economic needs of the province to improve their employability but also a need to retain businesses and attract new investment. Emphasis on the role of the University of Mpumalanga and TVETs.

In 2021, Lekwa contributed with 4.1% to the total employment in the Mpumalanga province. The average annual employment growth between 2016 and 2021 is recorded at 0.7%, which is worse than the 2.7% p.a. growth recorded between 2010 - 2015. The job losses in 2021 were estimated around 3 985, which is an increase from the 3 892 job losses recorded in 2020.

**Figure 27: Labour Market Indicators in Lekwa, SERO Report 2022**

### **Employment by industry in Lekwa**

In 2021, 25.7% of the employed worked in the trade industry. According to Stats SA, the trade industry comprises of wholesale, motor, accommodation, food, and beverages (i.e., restaurants and catering), and retail. This means that most economic activity within the municipality is related to goods rather than services. The mining industry only employs approximately 2.3% of people in Lekwa LM.

**Figure 28: Employment by industry, SERO Report 2022**

### **Poverty, inequality, HDI and crime indicators**

- The share of population in Lekwa below the lower bound poverty line (LBPL) deteriorated from 38.7% in 2016 to 44.5% in 2021.
- In 2021, 55 019 people were recorded to be below the LBPL – 6th lowest number in the province.
- In the calculation of the Local Government Equitable Share (LGES), National Treasury estimates that Lekwa has 22 598 poor households., which translates to 48.7% of households.
- In 2021, the poorest 40% of households in Lekwa shared 7.6% of total income, which was lower/worse than the 8.0% share recorded in 2016.
- Lekwa's share of income of the poorest 40% of households ranked 9th highest, indicating that income inequality was not as severe within the area as in other areas in the province.
- Improved Human Development Index (HDI) increased from 0.59 in 2016 to 0.63 in 2020 and 0.61 in 2021.
- Lekwa ranked 12th (5th worst) in terms of the 17 serious crimes reported in 2021/22. This is an improvement from the 241 recorded in 2018/19.

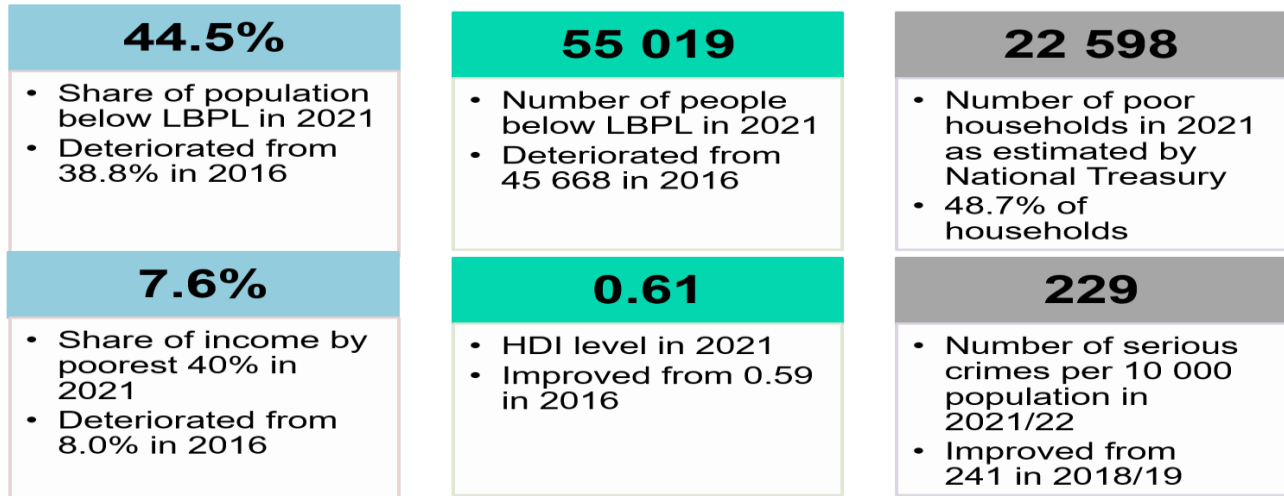

Figure 29: Poverty, inequality, HDI and crime indicators in Lekwa, SERO Report 2022

### Gini Coefficient

The equality of an economy is measured using the Gini Coefficient. The Gini Coefficient is a statistical measure of distribution used to gauge income inequality in an area. It ranges between 0 and 1, with 0 representing a completely equal distribution of income; in an area where everyone earns the same, the Gini coefficient would be 0. The more unequal the distribution of income, the higher the Gini coefficient. Lekwa's Gini Coefficient decreased between 2015 and 2018 before increasing slightly in 2019. The increase in 2019 suggests that income is becoming more unevenly disturbed within the municipality.

Figure 30: Gini Coefficient SA, MP, LLM 2015 - 2019 Source: Quantec Research, 2021

**Economic contribution to Gert Sibande industries**

- The municipality's dominant contributions to Gert Sibande's economy includes utilities (28.9%) (mainly electricity), & agriculture industries (24.1%), with substantial contributions to finance (14.4%), trade (14.1%), & community services (13.8%).
- Lekwa holds comparative advantages in agriculture, mining, & utilities (mainly electricity).
- In 2016, tourism spend totaled R375.7 million or equal to 3.4% of the local GDP. It increased to R472.5 million in 2021, which was equal to 2.8% of the local GDP in current prices.

<b>Lekwa</b>	<b>3.9%</b>	<b>1.6%</b>	<b>3.7%</b>	<b>3.1%</b>

Table 27: Economic contribution and growth, SERO Report 2022

**Largest industries in Lekwa recorded in constant 2015-prices**

- In 2021, the four largest industries were community services, mining, trade, & finance. These four industries combined to contribute 57.2% to the economy of Lekwa.

Region-	Industries			
Gert Sibande	Mining	Community services	Manufacturing	Trade
- Chief Albert Luthuli	Community services	Mining	Trade	Finance
- Msukaligwa	Community services	Trade	Finance	Transport
- Mkhondo	Community services	Trade	Manufacturing	Finance
- Dr Pixley Ka Isaka Seme	Community services	Agriculture	Trade	Finance
- Lekwa	Community services	Mining	Trade	Finance
- Dipaleseng	Mining	Agriculture	Community services	Trade
- Govan Mbeki	Mining	Manufacturing	Community services	Finance

**Table 28: Largest industries in Lekwa in constant 2015-prices, SERO Report 2022****Tourism in Lekwa Local Municipality**

- In 2016, tourism spend totalled R375.7 million or equal to 3.4% of the local GDP. It increased to R472.5 million in 2021, which was equal to 2.8% of the local GDP in current prices.

Local Municipal Area	Total tourism spend (R-million)		Tourism spend as % of GDP (current prices)	
	2016	2021	2016	2021
Gert Sibande	3 567.1	5 095.1	3.9%	4.1%
Chief Albert Luthuli	775.6	1 177.8	9.9%	11.3%
Msukaligwa	660.5	928.9	4.8%	4.9%
Mkhondo	375.2	420.4	4.5%	3.9%
Dr Pixley Ka Isaka Seme	304.4	583.4	8.1%	9.9%
Lekwa	375.7	472.5	3.4%	2.8%
Dipaleseng	145.3	185.2	5.1%	3.7%
Govan Mbeki	930.5	1 326.9	2.1%	2.4%

**Table 29: Tourism in Lekwa, SERO Report 2022****Strategic development areas**

Lekwa is identified as a high viability/ low population strategic development area. This indicates the high potential of developing the municipality. It is thus necessary to tap into the comparative

advantages of the municipal area which will eventually lead to increased population rates in the long run.

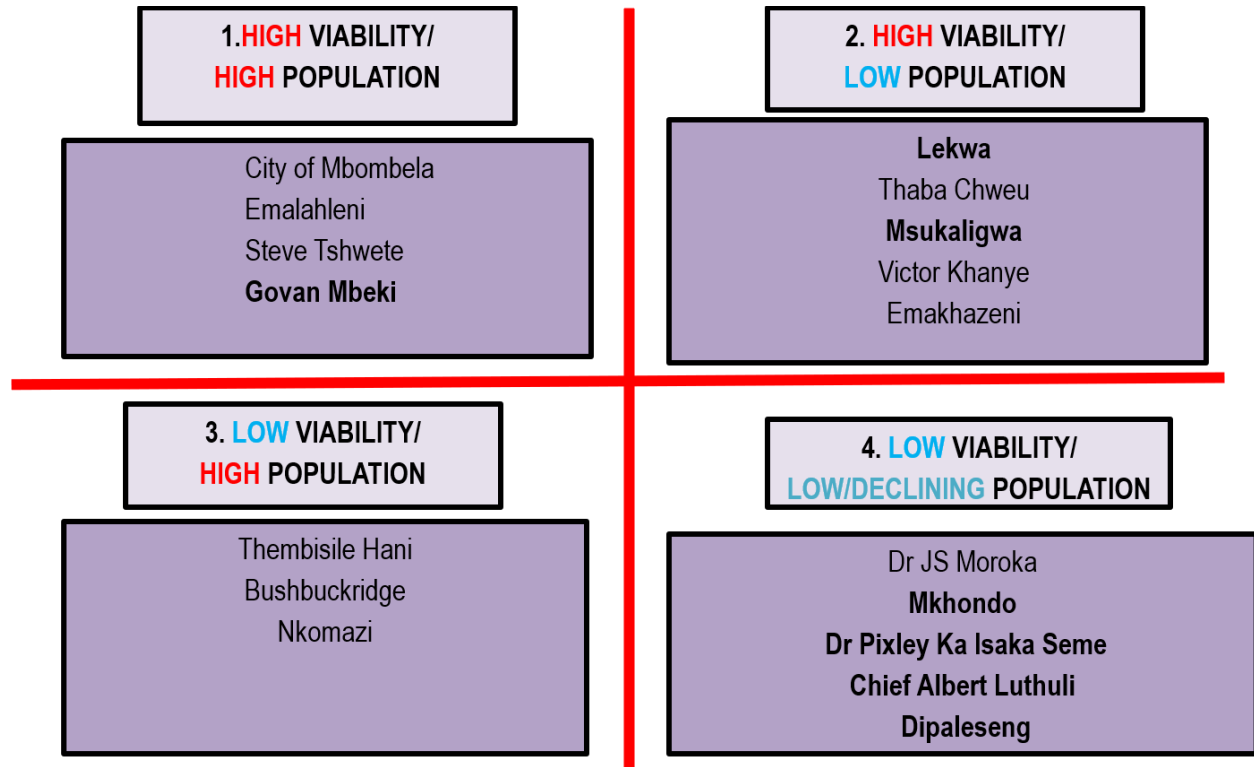

Figure 31: Strategic Development Areas, SERO Report 2022

#### Lekwa Green and Red flags

Green Flags	Red Flags
<ol style="list-style-type: none"> <li>1. Potential in developing key industries such as tourism, agriculture and agro-processing/manufacturing</li> <li>2. Advantageous location</li> <li>3. Relatively good education base in the past, despite lower Gr12 pass rate &amp; B-degree admission rates in 2020 and 2021</li> <li>4. Relatively low unemployment rate</li> </ol>	<ol style="list-style-type: none"> <li>1. Negative perception of LLM by business and the public</li> <li>2. Negative impact of possible Tutuka closure</li> <li>3. High informal dwellings backlog, as well as piped water &amp; flush/chemical toilets</li> <li>4. Lack of reliable electricity supply &amp; high cost thereof, weak road infrastructure</li> <li>5. Deteriorating poverty &amp; income inequality</li> </ol>

Figure 32: Lekwa Green and Red flags, SERO Report 2022

#### Leading challenges in Lekwa LM

According to the 2016 CS (Community Survey) of Stats SA, the 5 leading challenges facing Lekwa as perceived by households in the municipal area were the following:

- Inadequate roads.
- Lack of safe and reliable water supply.

- Lack of/inadequate employment opportunities.
- Inadequate housing.
- Lack of reliable electricity supply.

### Capital Expenditure

Lekwa LM spent 48.5% of its adjusted budget in 2021/22. This is below half of what the municipality was expected to spend. The municipality was also allocated R177 million in the form of conditional grants. However, there is no data recorded on how much the municipality spent under conditional grants which could also imply that the municipality did not spend any of the funds.

According to National Treasury, if a municipality is not spending its allocated funds or does not comply with grant conditions, further transfers can be withheld or reallocated to another recipient. The municipality should thus ensure that all funds allocated for the 2022/23 financial year are spent to avoid penalties imposed by National Treasury.

Local Municipal Area	2021/22 Adjusted Budget	2021/22 Actual Expenditure	Actual Expenditure as % of Adjusted Budget
Gert Sibande	R5.9 million	R2.4 million	49.0% 
Chief Albert Luthuli	R732.5 million	R381.2 million	52.0% 
Msukaligwa	R237.4 million	R306.0 million	128.9% 
Mkhondo	R168.0 million	R162.2 million	96.6% 
Dr Pixley Ka Isaka Seme	R116.4 million	R32.4 million	27.8% 
Lekwa	R72.7 million	R35.3 million	48.5% 
Dipaleseng	R49.6 million	R55.6 million	112.2% 
Govan Mbeki	R290.7 million	R95.2 million	32.7% 

Figure 33: Capital Expenditure by National Treasury, SERO Report 2022

Local Municipal Area	2021/22 Adjusted budget	2021/22 Actual Expenditure	Actual Expenditure as % of Adjusted Budget
Gert Sibande	R5.9 million	R2.4 million	40.0% 
Chief Albert Luthuli	R442.7 million	R340.7 million	76.9% 
Msukaligwa	R317.8 million	R124.1 million	39.0%

Dipaleseng		1	4	4			1
Govan Mbeki		2	8	10	1		2

Figure 35: Number of infrastructure projects by provincial departments, SERO Report 2022

## 4.3 STATUS QUO ASSESSMENT OF SPATIAL RATIONALE

### Spatial Development Framework in line with SPLUMA

A Spatial Development Framework (SDF) is a framework that seeks to guide the overall spatial distribution of current and desirable land uses within a municipality. This guides the goals, vision, and objectives of the municipal Integrated Development Plan (IDP). The aim of Lekwa LM SDF is to promote sustainable functional and integrated human settlements, maximize resource efficiency and enhance the regional identity and unique character of a place.

### Spatial Vision and mission

The Lekwa Local Municipality's vision, as derived from the 2016/17 IDP and first adopted in 2006, is contained hereunder: "To be the leading, people centred municipality excelling in economic growth, development and governance." The municipality aims to realize this vision by focusing on basic elements needed by its citizens, the business community, and visitors to areas under its jurisdiction. In achieving its set mission, the Municipality sets the following as being visible to the outsider looking in:

- Transparent and accountable governance;
- Accelerated customer focused affordable service delivery;
- Creation of conducive environment for economic development and growth;
- Sustainable infrastructural development and maintenance;
- Enhanced community participation in the affairs of the municipality; and
- To initiate ground breaking innovations in the way we conduct our business.

These can be achieved within a framework of set core values:

- Excellence
- Trustworthiness
- Timeous responsiveness
- Transparency
- Batho-Pele Principles.

The development of a vision for a municipality is a participatory process as envisaged by Section 29 (1) (b) of the Municipal Systems Act. The LLM identifies the following as some of its main achievements:

- Reviewed and intent to implement the LED and Tourism strategy;
- Partnered with Noble Group, Anglo-American (New Denmark), Eskom (Tutuka Power Station), Early bird Farm, Financial Groups, GSDM FET College, Textile industries and other social partners to create decent and sustainable jobs through LED Forum and other Corporate social investment programmes;
- Completed Ubuhle Siyazenzela Chicken broiler project in Morgenzon;
- Finalized the investment incentive policy;
- Adhered to the principle of Batho-Pele. All employees always wear name tags;
- We are working with the community to strengthen the work of self-organized formations such as burial societies, stokvels, cultural groups, youth, and women to deepen democracy;
- Timeously engage with all our communities so that those who can afford to pay, do pay for services consumed; - Established a new township called Ext.8 and Ext.5 with 4200 mixed residential units, in order to build a more united, non-racial, integrated, and safer communities;
- Soon to start developing Portion 4 and remainder of Portion 7 of Farm Grootverlangen 409 IS (along Walter Sisulu Drive), in order to build a single storey shopping mall with an underground taxi rank with all conspicuous shop brand, filling station and a hotel and guaranteed job opportunities.

An SDF becomes a spatial representation of the above. Not only does an SDF depict these spatially but looks at where development should happen, how it should happen and where municipal and private expenditure will be key, with the ultimate inclusion of projects in the Municipal IDP that gets reviewed on an annual basis. SPLUMA requires that a municipality includes, in the MSDF, a long-term spatial development vision statement that indicates the desired spatial growth and development pattern set for the next 10-20 years.

The Lekwa Local Municipality is people-centred, it is a municipality that puts its community first. The Batho-Pele Principle is a core value for the Municipality. Based on the above, the spatial vision of the municipality should focus on a people-centred vision that:

- seeks to protect the natural environment,
- promote transparent governance,
- accelerate service delivery,
- grow the economy - promote infrastructure development and maintenance,
- promote innovation in the way business is conducted, and
- encourage community participation in the affairs of the municipality.

## **Population Projections**

Spatial Planning and Land Use Management act 16 of 2013 requires that municipal spatial development frameworks should reflect population growth projections for the next five years. Generally available official national census figures for South Africa are only available for 1996, 2001 and 2011. Three data points are generally considered by statisticians as not enough to derive any meaningful trend that can be used as basis for any population prediction.

A general population forecast compiled by the Actuarial Society of South Africa provide annual population figures from 1995 to 2015. Using this dataset provides 20 data points which formed the basis for a population projection for Lekwa Local Municipality. Over a period of 20 years, the population of Lekwa Local Municipality will increase from 115 662 (in 2016) to 153 366 (in 2030). The number of households over the same period will increase from 31 071 to 51 232. Note that these projections are in line with the recently compiled SERO Report (published by Mpumalanga Economic Development and Tourism) as well as with the 2016 StatsSA Community Survey.

### Projected population and households 5,10 and 20 years

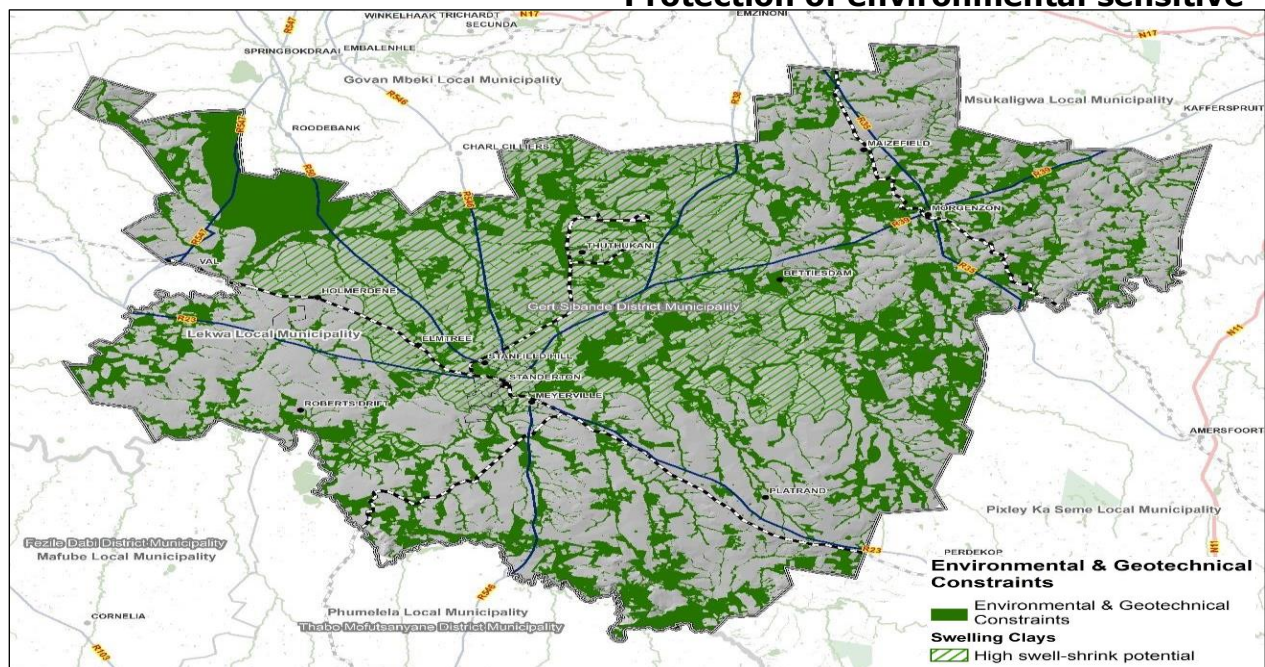

Year	Households	Population
2011	31 071	115 662
2016 (base year)	37 334	123 419
2021	40 370	133 221
2026	43 593	143 857
2035	49 844	164 485

### Lekwa LM SDF proposals

#### Macro level: Development principle 1

Protection of environmentally sensitive areas and areas with high agricultural potential - Environmental layers have been identified to protect such against development. It is of utmost importance to indicate these layers as it forms the basis for habitat protection and productive agriculture and should be used as a main structuring guide in the municipality. These areas are vulnerable to development in the forms of mining and urban development and once lost these types of environmental qualities can never be replaced. Map 3: Protection of environmentally sensitive areas Source: Lekwa SDF 2016

### Protection of environmental sensitive

## Macro Level: Development Principle 2

The establishment of an efficient and integrated movement network - A structuring guide within the municipality is the movement network. It forms channels for the flow of goods and people and is vital for economic growth. It provides access to services and facilities to the community, critical for health, education, and job opportunities amongst others. A weak or partial movement network will result in weak or partial development of the area. The following linkages have been identified as first order roads within the municipality:

### First order roads

Road	Importance	Description	Road Condition
<b>R39</b>	Important economic corridor (District & Local)	Direct link – Standerton & Ermelo via Morgenzon	Upgrade of R39 (Standerton – Ermelo) concluded.
<b>R35</b>	Key economic corridor (District) Important freight route (District)	Links Central & western Gert Sibande DM. Link – Morgenzon & Amersfoort to the south. Bethal & Middelburg to the north. Freight route between Bethal and Amersfoort via Morgenzon.	Good: Entire Road within Lekwa LM
<b>R38</b>	Important economic corridor (Local) Important freight route (District)	Link – Standerton & Thuthukani with outside towns: Bethal, Carolina & Badplaas. Freight route between Standerton and Bethal.	Good: Entire Road within Lekwa LM
<b>R23</b>	Key economic corridor (District) Important Freight Route (District)	Links Standerton to Balfour & Volksrust. Freight route between Standerton and Volksrust.	Good: Between Standerton & Volksrust. Upgrade of R23 (Standerton – Johannesburg) concluded.
<b>R50</b>	Important economic corridor (Local) Important freight route (District)	Direct link – Pretoria & Standerton via Delmas & Leandra. Freight route between Leandra and Standerton.	Poor: First few km's entering the municipality and last few km's before entering Standerton. Very poor: Road in between the above mentioned.

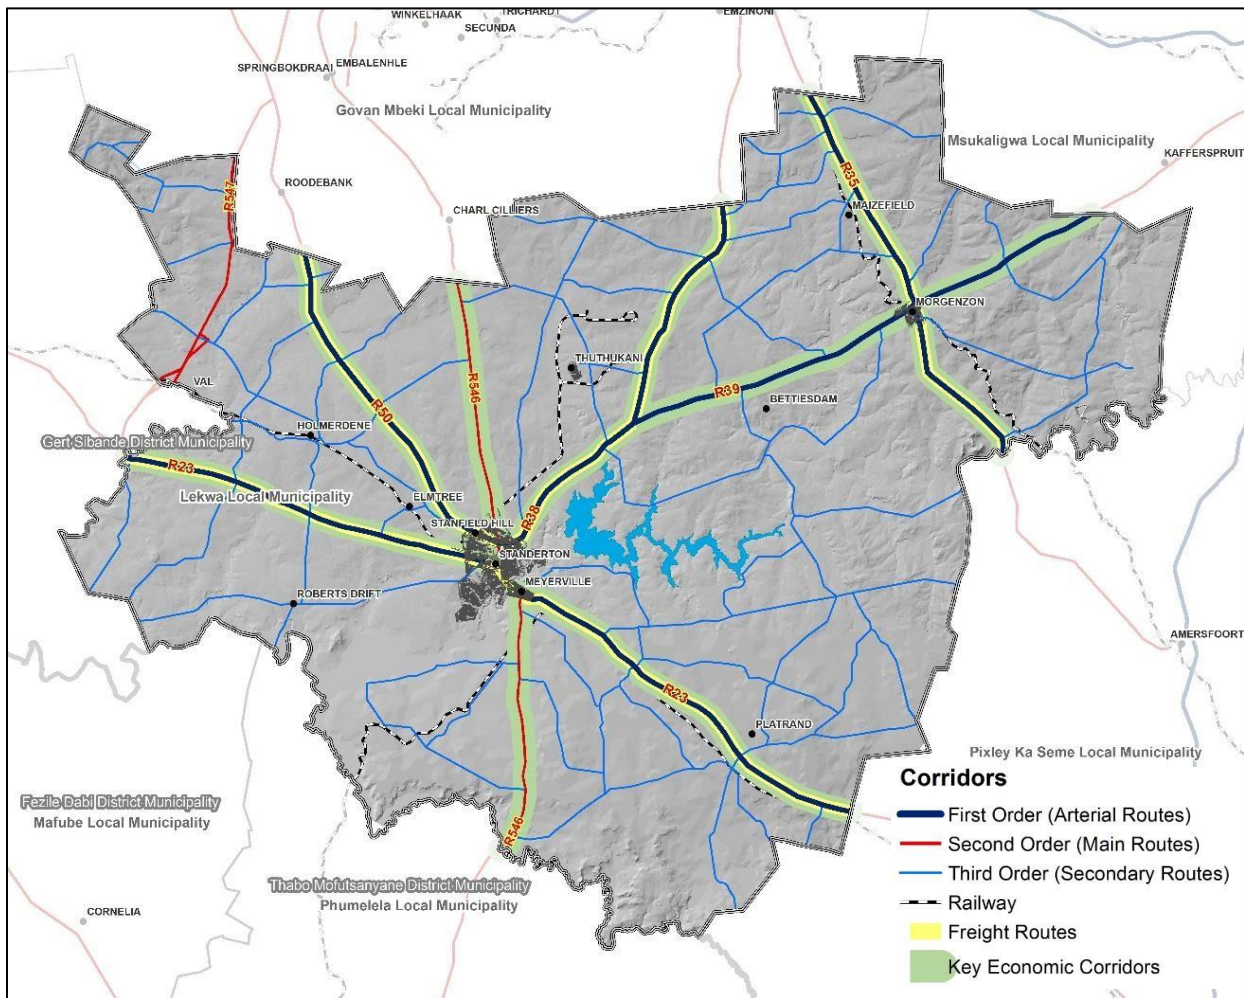

**Table 30: First order roads**

## Second order roads

Road	Importance	Description	Road Condition
<b>R546</b>	Important Economic Corridor (Local)	Links – Standerton & Vrede in The South Standerton To Teks Industrial Complex North	Very poor conditions: Between Standerton & Vrede Poor: Few Km's to The North of Standerton Very Poor: Area of Road North of Standerton (Closer To Evander)
<b>R547</b>	Not an economic corridor	Links – R50 and the R23 in the western part of the municipality	Poor: Entire Road within Lekwa LM

**Table 31: Second order nodes**

## Spatial Representation of Lekwa LM Order Roads

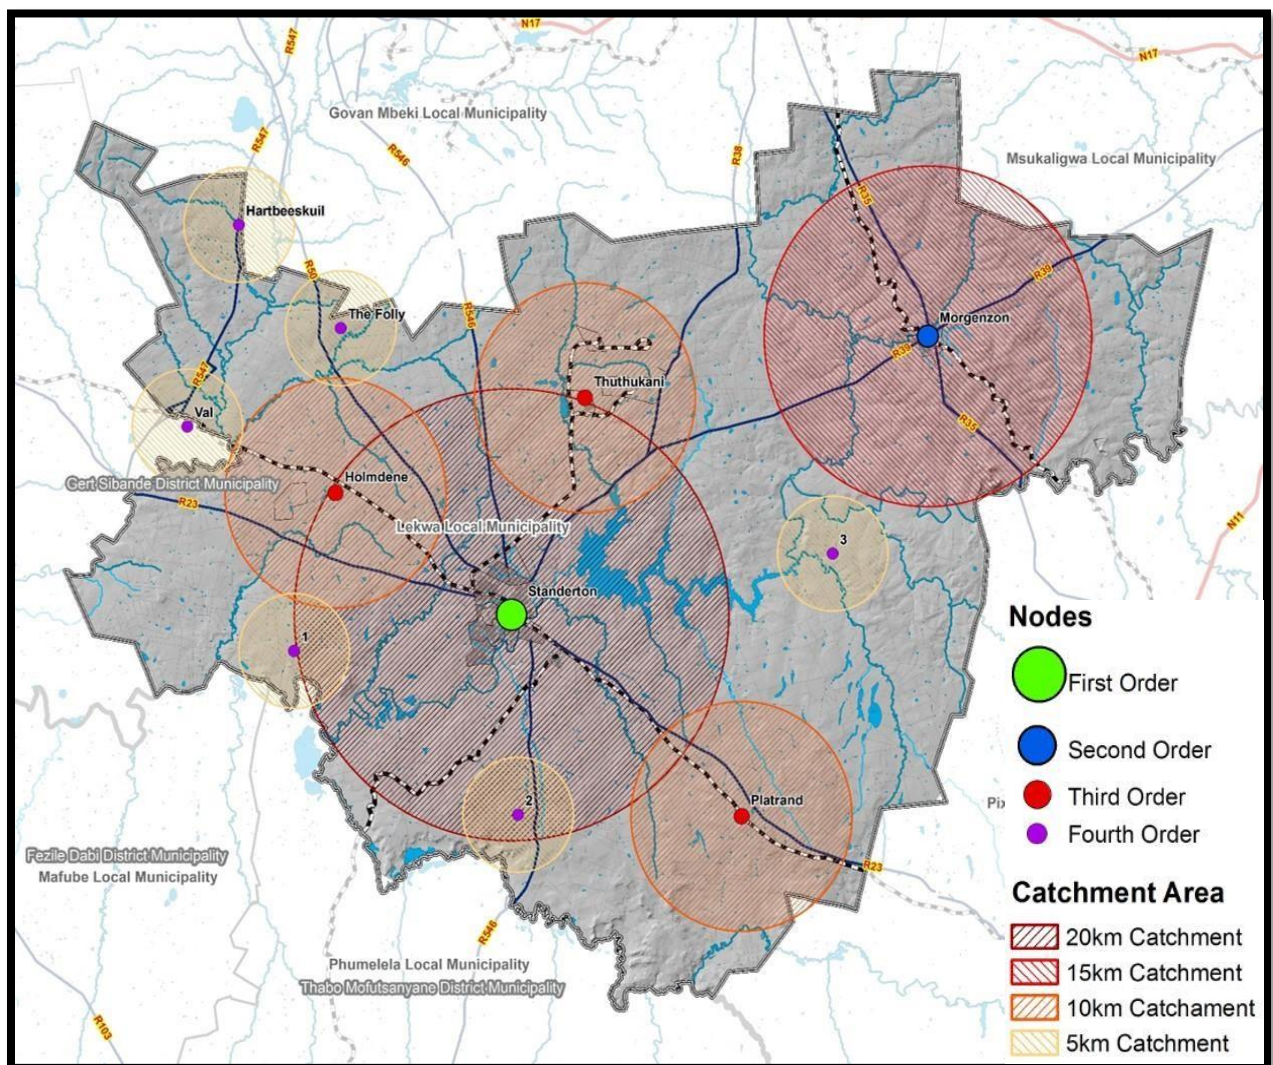

**Map 4: Order roads in Lekwa**

### Macro level: Development principle 3

The establishment of a functional hierarchy of nodes - The existing Lekwa Local Municipality Spatial Development Framework has identified a complete hierarchy of nodes within the municipality, before the indication of these nodes the trend were to allow dispersed rural development in a uncontrolled manner e.g. the delivery of educational facilities and housing for farm workers without the consideration of the access to public transport, social and commercial facilities and the potential for these areas to grow as small concentrations of economic activity or small nodes serving the rural community. Development locally was only based on where the land that is available and not where it will support the future development of a functional set of nodes.

### Hierarchy of nodes

Map 5: Hierarchy Nodes

## Hierarchy of nodes

A hierarchy of nodes should consist of different order nodes, each fulfilling different functions at different scales and spread equidistant throughout the area but giving cognisance to access to main routes, population density and environmentally sensitive or protected areas. A hierarchy of nodes is important in order to ensure a functional clustering of facilities and services as well as economic viability based on economies of scale. This will ensure sustainable provision of social and commercial facilities, equality of access to all and shorter travelling distances. In this regard The Gert Sibande SDF identified Standerton as a first order node and Morgenzon and Thuthukani as third order nodes. No second order nodes were identified.

### First Order Node

#### Standerton

- It has the largest population in the Lekwa LM,
- The largest number of facilities and services as well as the highest order facilities and services.
- It also forms the focus of the most important roads in the district, thus leading to and reinforcing its status as the highest order settlement.

### Third Order Nodes

#### Morgenzon

- Has a potential to be upgraded to a second order node due to its locality on the intersection of R39 and R35 as well as its distance from Standerton and its existing facilities.

#### Thuthukani

- On the other hand, Thuthukani is solely dependent on Thuthuka Power Station and New Denmark Colliery and as a result it does not have a natural growth potential.
- It only serves as a residential area for workers from the above-mentioned facilities
- It is also in an isolated locality and has limited growth potential.

Platrand and Holmdene were also identified as additional third order nodes and are characterised by the following:

- Located next to railway station and major roads
- There is an existing village
- There are a number of facilities such as primary school, post office and commercial facilities.

### Fourth Order Nodes

- Hartbeeskuil, The Folly and Val.

Description of Fourth Order Nodes (See table on next page)

Node	Locality	Access	Facilities	Character	Illustration
------	----------	--------	------------	-----------	--------------

<b>Hartbeeskuil</b>	North-western municipal boundary. **Table 32: Description of fourth order nodes**

## Macro level: Municipal spatial concept

The municipal spatial concept was based on the three principles as stated in the above. In summary these principles include:

- Areas that should be protected from development because of environmental sensitivity or agricultural potential;
- The main road networks that should be maintained and upgraded; and - The hierarchy of nodes to be established and invested in.

## Municipal spatial concept

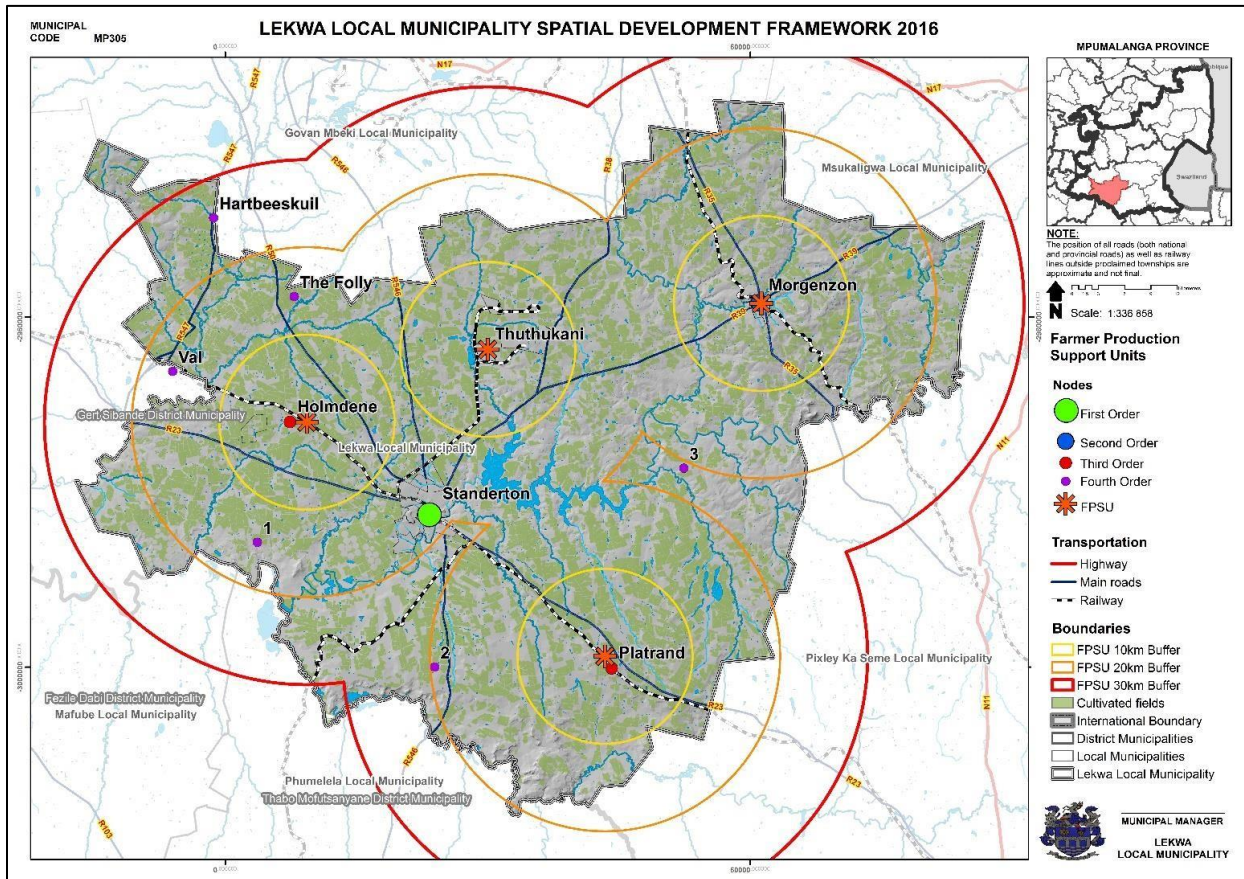

Map 6: Municipal Spatial Concept

## Macro Level: Rural Spatial Concept

Outside the boundaries of the three main urban nodes within Lekwa Local Municipality (Standerton, Morgenzon and Thuthukani), the landscape is dominated by a vast number of farmlands, a mine, and a power station. When driving towards the towns in the municipality a realization comes to mind that agricultural activities play a significant role towards the communities within the municipality.

Map below illustrates the proposed Farmer Production Support Units namely: Morgenzon, Thuthukani, Holmdene and Platrand.

**Map 7: Proposed farmer production support units**

The municipal area is diverse with wide variety of socio-demographic profile demonstrated by the spatial and physical form/pattern that reflects in all aspects of local development. The Lekwa Municipal Area comprises of the following:

### Standerton

Standerton covers a total area of 3 993.8 ha in extent which measures 5km in an east-west direction and 9km in a north-south direction and thus has been identified to be the largest urban settlement in Lekwa Local Municipality. It is also identified as the only first order node in LLM as well as the administrative and institutional hub of the municipality. It is strategically located within the Lekwa Local Municipality as it is located in the South West of the LLM, at the intersection of all major routes (the R23, R39, R546 and R50) and at the only major railway station in the district. It is a typical medium sized South African town, with a central CBD, industrial areas on the periphery, low density residential development and separation between white and black and rich and poor neighbourhoods.

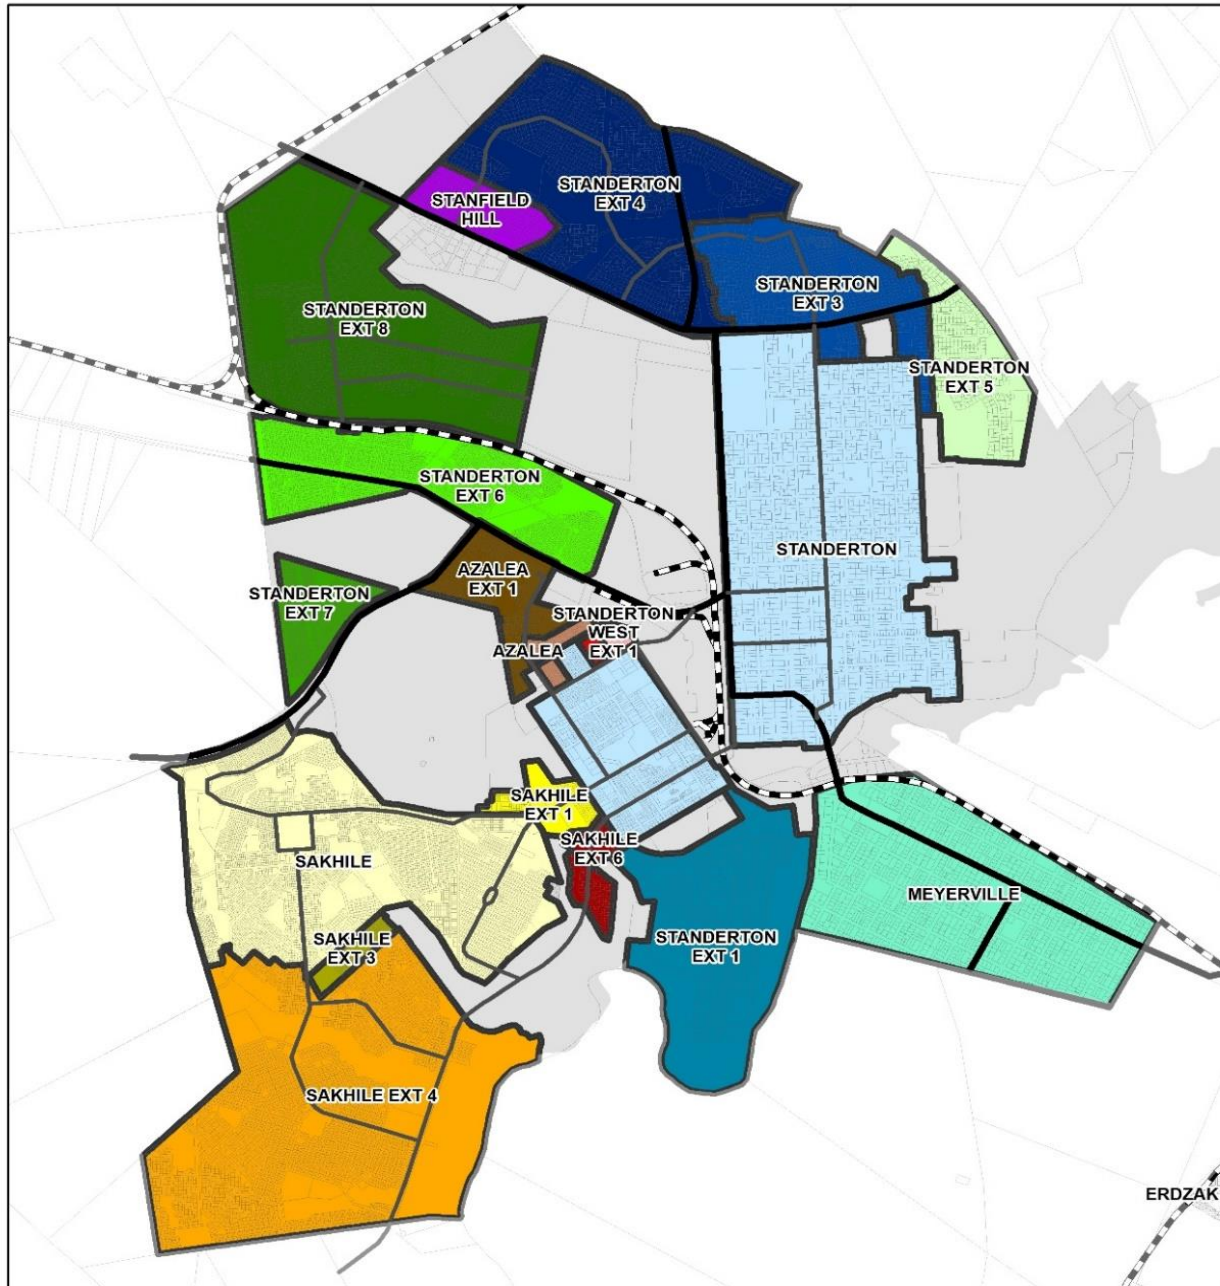

Standerton is made up of Standerton Proper on the northern banks of the Vaal River; Meyerville on the Southern banks of the Vaal River; Stansfield Hill with infill development that took place in the form of Standerton West Ext 1 to the north of Standerton Proper; Sakhile Proper which is the first

large black township located to the west of Standerton Proper; Standerton Ext 1 on the Southern banks of the Vaal River between Meyerville and the western portion of Standerton Proper; Standerton West Ext 3 which is directly adjacent to Standerton West Ext 1; Standerton Ext 3 to the north of Standerton Proper; Standerton Ext 4 to the north of Standerton Proper; Sakhile Ext 1, 2 & 3 which is buffered from the white town by the railway line and the industrial area; Edzak to the Southeast of Meyerville; Azalea Proper that was later extended with the establishment of Azalea Ext 1 which was developed to accommodate the Indian population located to the north of Standerton West; Standerton Ext 6 to the north of Standerton; Sakhile Ext 7 on the west of Standerton; Sakhile Ext 4 to the south of Sakhile Proper; Sakhile Ext 5&6 that was established to accommodate people living in the informal settlement is located between Sakhile Proper and Standerton Proper and Standerton Ext 8 which is a mixed use township catering for affordable housing market as well as RDP housing is located R23 and R50.

					STANDERTON WEST EXT 3

### Map 8: Standerton townships and extensions, Lekwa SDF 2016

## Morgenzon

Morgenzon covers a total area of 304 ha which measures approximately 2km in a north-south direction and 3km in the east-west direction and is located at the intersection of the R35 and R39. Its existence is mainly influenced by the transportation of coal from the Secunda complex to Majuba Power Station near Volksrust. It is historically a local service centre that served (and still does) the surrounding commercial farming areas with basic needs.

Despite its potential due to its location along a major route (R35) to Volksrust via the N11 from Bethal, it is still largely under-developed as a service centre due possibly to the competition offered by the more attractive business centres of Ermelo, Bethal and even Standerton itself. Given the vast distance between this locality and the Standerton Urban node, Morgenzon forms a completely self-contained economic sub-node with a slightly different character than the former. Morgenzon is also a poverty-stricken area with deteriorating economic facilities. Morgenzon is made up of Morgenzon Proper, Sivukile Proper, Sivukile Ext 1, Sivukile Ext 2, Sivukile Ext 3, Sivukile Ext 4 and Morgenzon Ext 1 (industrial).

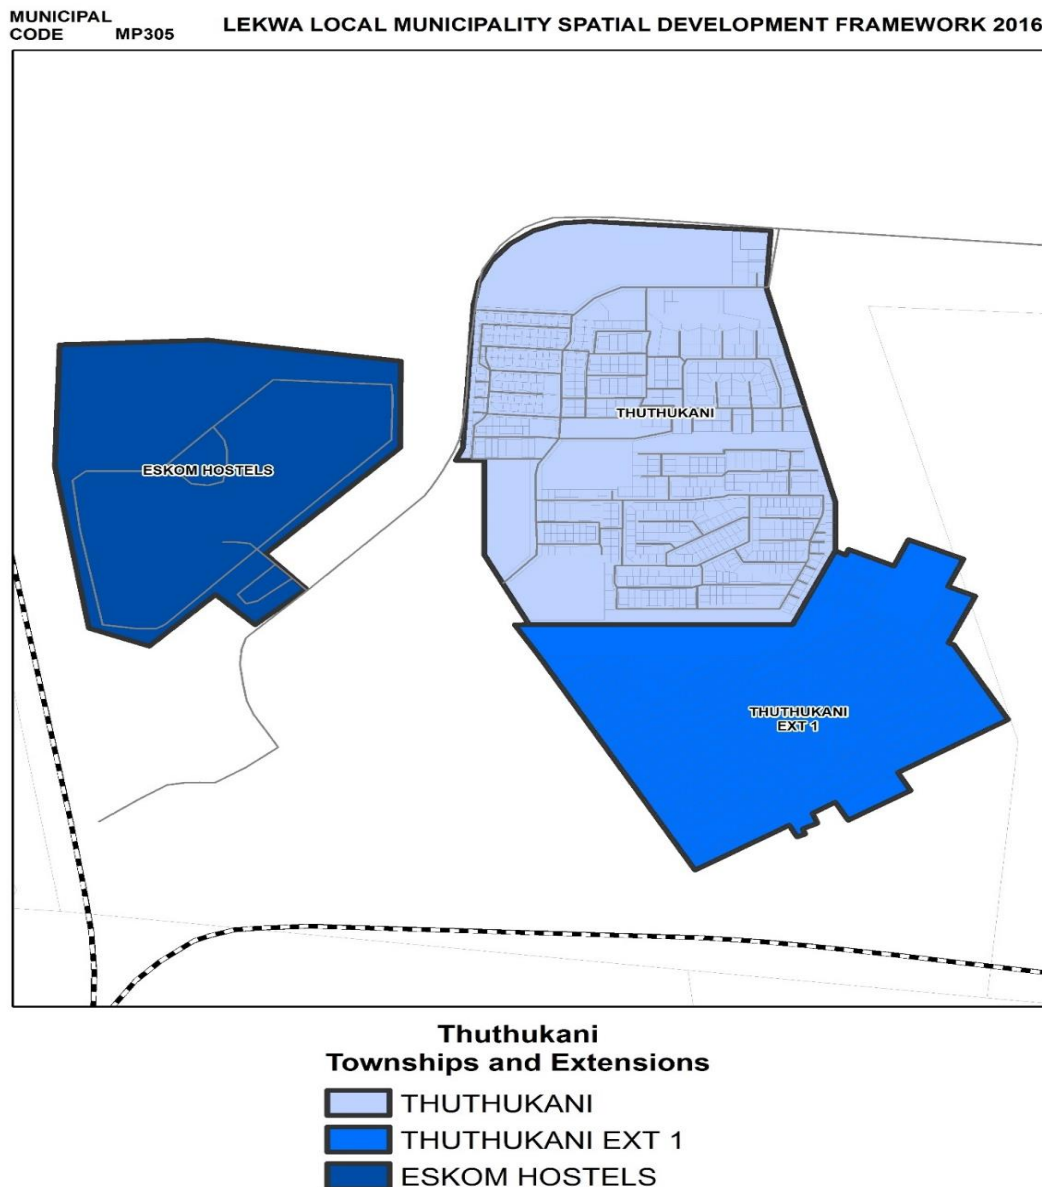

Map 10: Morgenzon, SDF 2016

## Thuthukani

Thuthukani lies approximately 25km north east of Standerton, and essentially started as a worker's village to house employees of the Thuthuka power station which is located 3 km to the east of the village. It is surrounded by industrial uses such as Thuthuka power station, Alpha substation to the east as well as New Denmark Colliery to the north.

Thuthukani is made up of two townships namely Thuthukani Proper and Thuthukani Extension 1 as well as Eskom Hostels to the west of town. Thuthukani Ext 1 is a recently established township which is not occupied yet. Thuthukani has not officially been handed over to the municipality, this means that residents of Thuthukani do not pay tax and rates to the municipality which negatively affects the revenue base of the municipality. Thuthukani extension 1 does not pay rates at all, the rest of Thuthukani pays the rates to Eskom. Primary services such as sewer and water are provided for by the municipality, therefore an official hand over will help contribute to the revenue base of the municipality from rates and taxes.

Map 11: Thuthukani townships and extensions, Lekwa SDF 2016

### Informal Settlements and Land invasion cases in Lekwa

There are twelve (12) informal settlements in the Lekwa Local Municipality as reflected in the table below. The municipality is also faced by land invasions as there are currently seven (7) land invasion cases recorded. There are no municipal services provided in these informal settlements. All twelve informal settlements are currently in the process of being formalised through the National Upgrading Support Programme (NUSP). Informal settlements not upgradable will be relocated and accommodated in other settlements.

Name of settlement/adjacent settlement	Property description	Ownership	Ward	Number of households	Date of invasion
Mandela Camp, located in Sakhile Ext.2	Public open space	LLM	5	746	1994
Sisulu Camp, located in Sakhile Ext.4	Public open space	LLM	11	458	1994
Welamlambo Camp, located in Sakhile Proper	Public open space	LLM	2	452	2006

LEKWA  
LOCAL MUNICIPALITY

Map 12: Map of informal settlements in Standerton

### **Functional Area 1**

Functional Area 1 includes Standerton Proper which is characterised by low density, highest provisioning of functional open space and natural open space as well as commercial, educational, health and sport facilities. However, issues such as densification, upgrading of road infrastructure, encroachment of commercial facilities into residential areas, and the upgrade of the sports and civic precincts still needs to be addressed.

### **Functional Area 2**

Functional area 2 includes Meyerville which is characterised by low density, highest provisioning of functional open space, limited natural open space and commercial facilities, lowest provision of health, secondary educational and sport and recreational facilities. However, issues such as densification and health and sport and recreation facilities still need to be addressed.

### **Functional Area 3**

Functional area 3 includes Standerton X3 and 4 which is characterised by low density, limited functional open space but ample natural open space, no commercial facilities, limited primary educational facilities with no secondary educational facilities, sufficient health facilities as well as sport and recreational facilities. Issues that have to be addressed are densification and functional open space.

### **Functional Area 4**

Functional area 4 includes Standerton West and Azalea which is characterised an average density, no functional open space, limited natural open space, commercial facilities, sufficient educational facilities, sport, and recreational facilities as well as limited health facilities. Issues that have to be addressed includes the provision of open spaces and health facilities.

### **Functional Area 5**

Functional Area 5 includes Sakhile and extensions which is characterised by an average to high density, limited functional and natural open space, limited existing commercial facilities with some proposed commercial facilities, limited existing primary educational facilities with sufficient proposed educational facilities, sufficient secondary educational facilities, limited existing health facilities with sufficient proposed health facilities, limited existing sports facilities with sufficient proposed sports facilities. Issues that have to be addressed are the mushrooming of informal settlements which requires the formalization of informal settlements, provisioning of open space and the development of social facility sites.

### **Functional Area 6**

Functional Area 6 includes Standerton X6. It has an above average density characterised with no functional open space, limited natural open space, no commercial facilities with limited proposed commercial facilities, limited primary educational facilities with no secondary educational facilities, limited health facilities, and no sports facilities. It is the most underprovided area and thus attention should be given to the provisioning of all facilities.

### **Functional Area 7**

Functional area 7 includes Standerton X7 which is characterised with the highest density, no functional or natural open space, no commercial facilities with limited proposed commercial facilities, sufficient primary educational facilities, no secondary facilities, no health facilities, and

sufficient sports facilities. Issues that have to be addressed is the lack of open space and health facilities.

### **Functional Area 8**

Functional Area 8 includes the proposed Standerton X8 which is characterised by an average density, sufficient functional open space, limited natural open space, limited commercial facilities, sufficient primary and secondary schools, no health, and sports facilities. Issues that have to be addressed are health and sports facilities. There is currently no sufficient bulk infrastructure (electricity, water, and sanitation) to cater the proposed development.

## **Transportation links**

---

### **Road Network**

Lekwa Municipal Area is not directly linked to the national road system. The major routes are thus provincial roads and minor roads. The following roads play an important role in terms of regional accessibility and linkages:

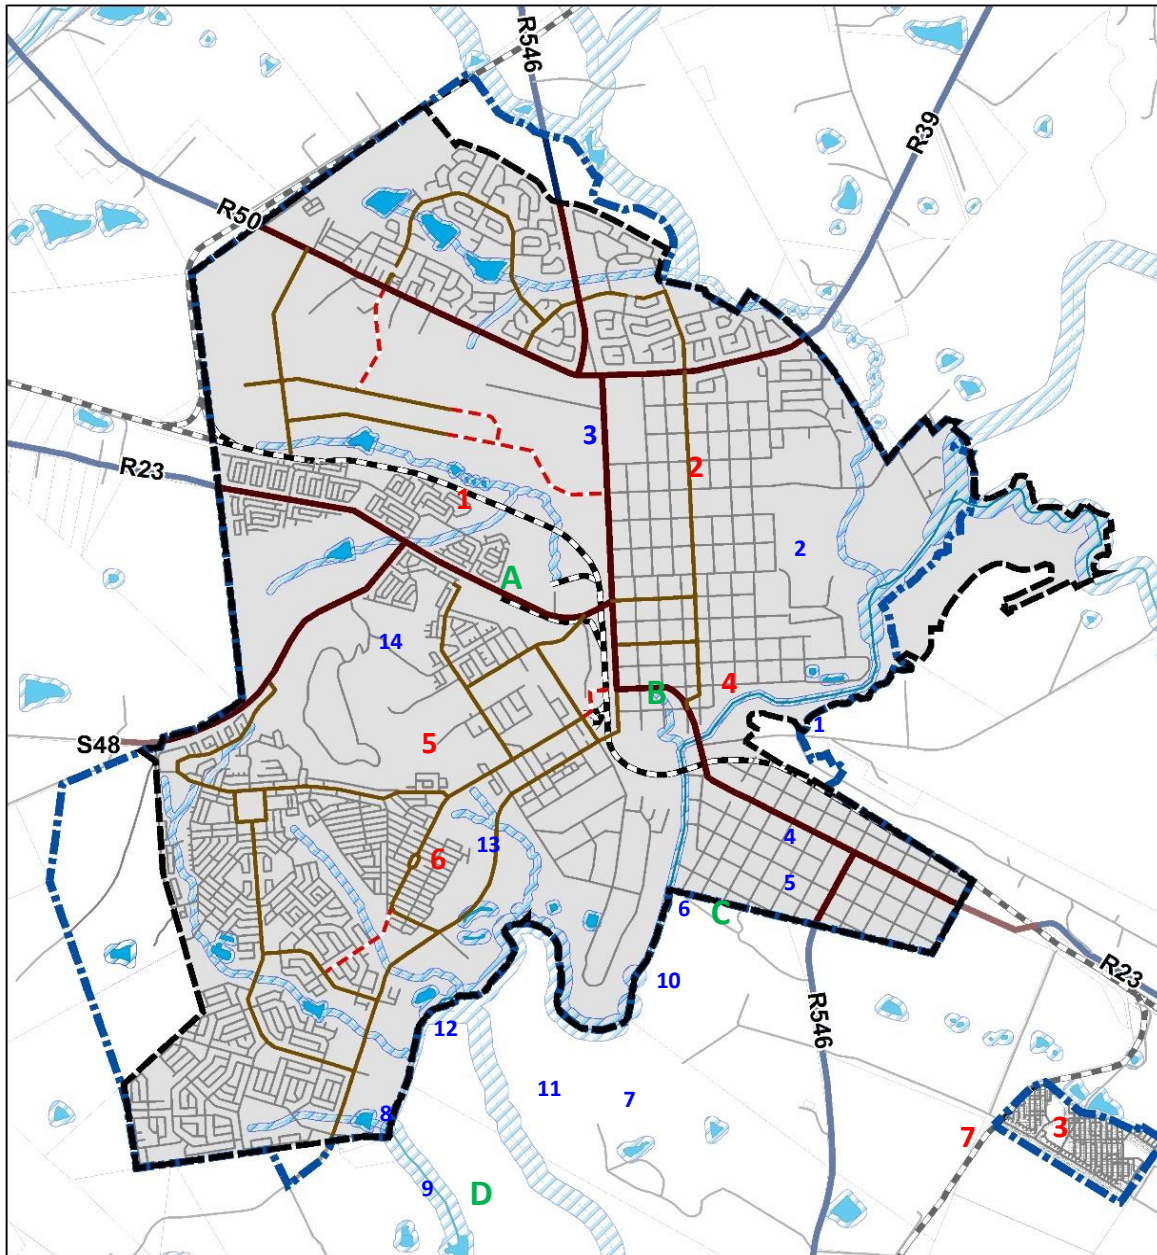

- R23, R546, R547, R38, R35, R39, R50
- The R23 and R35 is identified as key economic corridors on district level
- R39 was identified on local level, due to the important economic nodes that they connect.
- Apart from this main road network an expansive network of secondary gravel roads traverses the municipal area, providing accessibility at the most local level.
- No new roads are planned in the area.

The following descriptions of the identified areas with development potential is applicable to development principle 4 of Standerton, Morgenzon and Thuthukani.

Map 13: Transportation links, Lekwa SDF 2016

The following descriptions of the identified areas with development potential is applicable to development principle 4 of Standerton, Morgenzon and Thuthukani.

### Priority Development Areas

The areas identified as “priority development areas” are land that is both vacant and State or municipal owned. These areas of land will be first priority when it comes to development as the State or municipality hold the right to develop on the mentioned parcels of land. Ample municipal or State-owned vacant land is available for residential development in the areas of Standerton Extension 8 as well as Standerton Extension 5 north east of Standerton Proper. Other development opportunities exist within the identified functional areas or “zones” indicating specific land uses which will be the most desirable. However, there are challenges with bulk infrastructure that need to be attended to as a matter of urgency.

### Infill Development Areas

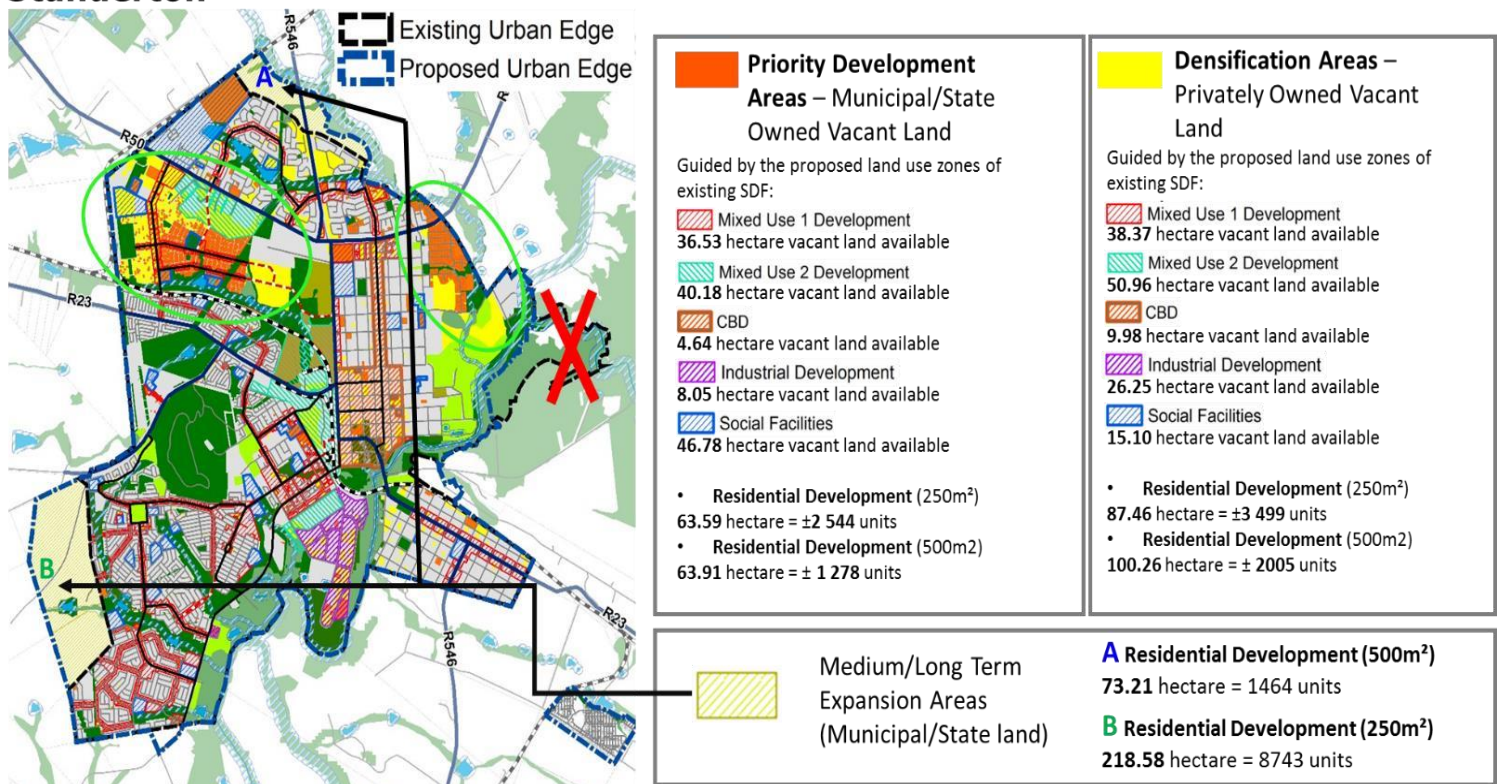

The areas identified as “infill development areas” are represented by land that is currently vacant but has private ownership. These areas should be the second priority to develop. The SDF highlights the fact of developing on vacant land within the proposed urban edge as priority. Private owned land will have to be purchased to inherit development right of the land and although it will have cost implications the densification of the town will reap many benefits in the long term. The municipality needs to augment bulk services to support densification.

### Medium to long term expansion areas

The areas identified as medium to long term expansion areas were identified based on land which is not affected by any environmental management areas as well as being owned by State or the municipality. These areas are mainly depicted for the main reason of projecting future growth and should only be considered for development when all other vacant land within the existing boundary is fully developed.

The following descriptions of the identified areas with development potential is applicable to development principle 4 of Standerton, Morgenzon and Thuthukani.

## **Standerton precinct plans**

The priority precincts for Standerton are areas of strategic importance and need to be focused on. For the purposes of this revision the existing precinct plans are listed as well as an amendment of each precinct using the latest environmental information received from various departments and recommendations made by the municipality. For the 2022/23 and 2023/24 financial years, the municipality will be implementing the River Park Precinct Plan and Sakhile Tsotetsi Corridor Development.

The following guidelines is applicable to some of the proposed precinct plans:

### **Activity Spines**

Activity spines are stop-start routes that are surrounded by high residential densities and high intensity development. Once higher intensity development is established along these routes and densities are proportional, it becomes more viable for modes of public transport, improving access to the residents.

Guidelines for Activity Spines:

- Mixed land uses should be allowed along these spines.
- The interface between streets and buildings should be noted, ideally the front of buildings should not be walled off towards the street and the bulk of parking should not be provided in front of the building. Shops and restaurants should be accommodated on the ground floor while residential units be accommodated on the upper floors.
- Security and the privacy of units at the back of buildings (mostly residential) should be considered.
- Taxi stops and commuter shelters should be provided along these routes for public transportation purposes.
- Sidewalks should be continuous, wide enough and complimented with street furniture and landscaping along these routes.

### **Nodal Development**

A functional hierarchy of nodes is needed to provide access to services and facilities to the wider community. The town consists of the CBD and a few scattered nodes of shops and social facilities. A hierarchy of three types is proposed within Standerton.

- First order node is the CBD area including Beyers Naude Drive, serving the whole of Standerton.
- Second order nodes, serving large parts of town with sizeable commercial and social facilities, are identified in:
  - Junction Shopping Centre on the R50 and Dr Beyers Naude Drive.
  - Proposed commercial node in Standerton Extension 8 (Oriental Plaza)
  - Sakhile Hostels and previous council offices
  - Meyerville, on the intersection of Nelson Mandela Road and George Street
  - Sakhile Extension 4 at the Taxi Rank

Third order nodes identified in:

Standerton Extension 3 and 6, existing clinic and sports facilities and located on a public transport route

- The intersection of the R23 (west) and the S48 Standerton Extension 7, existing primary school
- Standerton Proper (west) next to Minnar Street, clinic and a school
- On either side of Tsotetsi Street in Sakhile Proper, existing schools

### **Open Space Network**

The extensive open space network in Standerton comprises mostly of natural open spaces i.e., floodplains and ridges. It accounts as an important element with regards to aesthetic quality of the town and quality of life for its residents. The following guidelines are given for open space networks (note that it is not necessarily applicable for local parks).

With regards to ecological function:

- All open spaces make up the network that plays a critical role in habitat protection and the sustaining of natural processes. The ecological function is the most important function of the open space network.
- The open space network should be protected against any human intrusion in the form of development.
- All parts of the open space network should as far as possible be linked to optimise its ecological function, these links should be protected against any development that may break the chain of open spaces.
- New developments should aim to connect the open space network through linear park strips rather than discreet isolated parks.
- Land currently vacant can form part of the ecological network and should be protected for such use

With regards to aesthetic function:

- The entire open space network should be visually accessible. A public street should form the edge between development and open spaces as far as possible.
- No development should be allowed to limit access of the general public to open space networks.
- All development adjacent the open space network should not turn its back on the open space, active spaces should face the open space network, enhancing the safety of these areas.
- Important streets should be tree lined to compliment the natural feel created by the open space network through town.

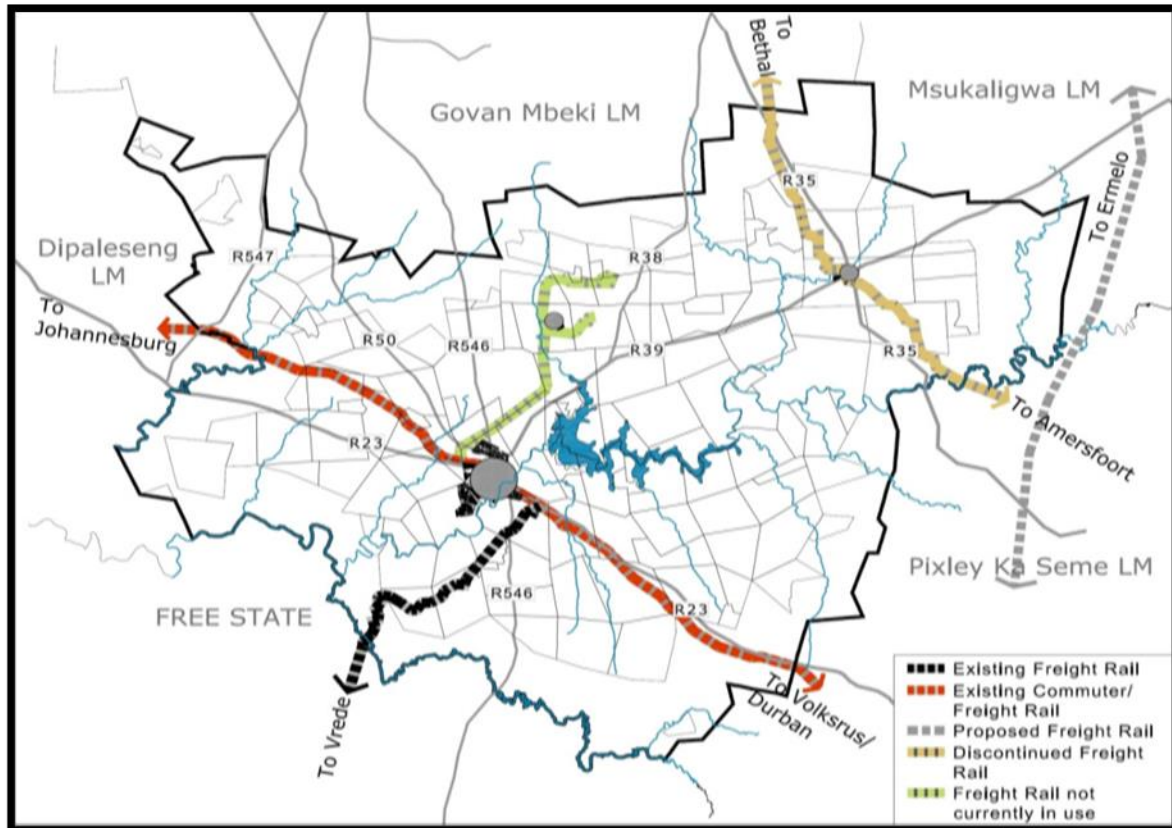

### **Road and rail network**

Several stretches of the road within the Municipality are either in a poor or very poor state. The following important roads within Lekwa have been identified as being in a poor state:

- Portions of the R23 west of Standerton;
- The 546 north of Standerton;
- The R50 north of Standerton;
- The R39 north-east of Morgenzon; and
- The R547.

The most important railway line (freight line) is the Johannesburg – Durban passenger railway line (Shosholozza Meyl) which runs parallel to the R23. Standerton Station is one of only five stops between Johannesburg and Durban. This line diverts in the region of Standerton with a branch line leading to Vrede in the south (freight line) as well as a line that leads to Tutuka Power station, this line however is not currently in use as it is not electrified. There is another railway line in the eastern part of the LLM. It links linking Bethal to Volksrust via Morgenzon, Amersfoort, Daggakraal and Wakkerstroom/Sizameleni. This line is not currently in use.

### Lekwa LM Rail network

Map 15: Railway Network, Lekwa SDF 2016

### Public Transport

- Public transport consists of rail, busses and taxis.
- Standerton station plays an important role in long distance passenger transport.
- In terms of busses, there is no municipal bus service, but a private bus service runs on the R546 between Standerton, the TEKS area, Bethal and Leandra.
- In terms of taxis, there are several taxi services. These run mostly on the R546, but also on the R50, R23 and R39.

### Non-Motorised Transport

- The bulk of the population (65%) make use of non-motorised transport, making this the most important mode of transport.
- largest majority (63%) travel by foot and 2% by bicycle.

### **Transport Challenges**

- The status of the roads is poor and needs upgrading and maintenance. The need for high maintenance and operations cost are amongst the factors contributing to the problem,
- Since places of work are separated from places of residence (mostly rural areas), people must travel long distances to employment areas and to also access some of the social facilities. The cost of and the opportunity cost of travelling are greater for the rural commuters
- The Municipality need to develop an Integrated Transport plan that will support the movement of the commuters to neighbouring towns such as Secunda, Embalenhle and Ermelo, this will also assist the municipality to attract people from other municipalities to spend money in Lekwa.

### **SDF Implementation Projects**

**Note:** Costs were estimated in 2017, there is a need to add a certain percentage to ensure that costs are market related.

Action	Location	Estimated Cost	Reason/Objective
<b>Strategies/Plans/Frameworks</b>			
Approval of SDF	Municipal wide	N/A	To give effect to the proposals contained in the SDF and to commence with the drafting of the Land Use Management System.
Alignment and harmonization of plans	Municipal wide	R1 200 000	The objective is to formulate, develop and implement appropriate planning instruments to effectively guide and control land use and development, which will protect and enhance property ownership and value, and which will establish a balanced living environment. The Land Use Scheme was amended and approved in 2020. In addition, municipal infrastructure plans and asset management plans should align with the SDF – can the water and sanitation network accommodate densification in the Standerton Area.
Integrated Transport Plan (ITP) – Identified project within the IDP	Municipal wide	R 300 000	To serve as a guide for transportation planning within the municipality. Important transport roads within Lekwa are in bad condition. The ITP sets out a collaborative and sustainable approach to transport planning.
Infrastructure Asset Plans (In support of the SDF)	Municipal wide	R 1 500 000	To plan for the maintenance, upgrading, refurbishment and provision of public service infrastructure. To calculate cost estimations for the successful implementation of projects based on the most current specific asset unit rate costs.
Implementation and Design Framework for FPSU's and Agri Villages	Morgenzon, Thuthukani, Holmdene, Platrand.	R 300 000	To ensure the realization of FPSU's and Agri-Villages as proposed within the RDP and SDF.

Feasibility Study for a Truck Stop	Erf 177-179 and 197-198 Standerton.	Municipality to confirm	There is a need to develop an overnight truck stop in the Standerton CBD. Many implications and criteria go along with a land use such an overnight Truck Stop. The location should be investigated to fit the needs of such uses and to avoid social or economic issues.
Densification Strategy	Around Standerton CBD, Meyerville and identified areas in Morgenzon.	R 450 000	To guide and motivate the densification process and to successfully plan for additional public service infrastructure needs along with such densification.
Design and Implementation of vacant land tariff policy	Vacant stands within key areas of Standerton, Morgenzon and Thuthukani	R 180 000	To fast track the development of vacant properties in key areas of town. The policy is currently in draft and awaiting a council resolution.
Mining Indaba	Municipal wide	R 40 000	To discuss possible funding of projects with all role players within the mining industry.
Updating of the 2014 Land Use Scheme to align with revised SDF – Land Use Scheme amended and approved in 2020	Lekwa Local Municipality LUS	R 180 000	To introduce proposals made within the revised SDF to the LUS. To use the LUS as a tool to implement and realize the SDF.
Introduce Incentive Systems to the LUS	Lekwa Local Municipality LUS		To fast track development and/or incentivize developers to correspond with proposals made within the SDF and Land Use Scheme. The municipality has developed a draft policy and is awaiting council consideration.

#### Capital Projects

Action	Location	Estimated Cost	Reason/Objective
Implementation of important municipal ICT: GIS Software (ArcGIS)	Spatial Planning Department (Lekwa Local Municipality)	R 180 000	Updated electronic software to guide important spatial decision making, utilize electronic spatial information received from consultants and increase productivity. The installation of these systems will also allow optimal internal use of the reviewed SDF to guide spatial planning decisions. The municipality has a system in place funded by the district. The municipality needs access to more functionalities on the current package.

Implementation of important municipal ICT: <ul style="list-style-type: none"> <li>Electronic Land Use Management Systems (CitySolve)</li> </ul>	Spatial Planning Department (Lekwa Local Municipality)	R 320 000	To streamline development application processes and keep an updated electronic database in terms of land use management
Flood line Assessment of Vaal River	Standerton/ Sakhile Area	R 800 000	To avoid damage to properties in the case of floods.
Relocation and InSitu upgrade of informal settlements (As proposed in SDF)	Standerton/ Sakhile and Morgenzon	Subject to a detailed business plan.	To eradicate the housing backlog and informal settlements within Lekwa. Identified informal settlements to be relocated within Standerton Ext. 8.
Detailed plans on the proposed precinct plans: - CBD and Beyers Naude - Sport and Recreation Precinct - Station Area - Nelson Mandela Drive in Meyerville - Sakhile Hostels - Tsotetsi Road Sakhile	See Precinct Plans	R 250 000 per precinct	To realize the desired spatial form proposed by the SDF the precinct plans play an important role in targeting specific development areas within the municipality. The River Park and Tsotetsi Road Sakhile precinct plants are to be implemented in the 2022/23 and 2023/24 financial years.
Priority upgrading of the R50, R546 and R547 Transport routes within the municipality	Municipal wide	Subject to a detailed business plan.	To improve the movement network throughout the whole municipality.
Implementation of priority link roads	Standerton, Morgenzon and Thuthukani	Subject to a detailed business plan.	To improve the movement network throughout the whole municipality.
Upgrading of third order roads	Municipal wide	Subject to a detailed business plan.	To improve the movement network throughout the whole municipality.
Upgrade of Standerton Taxi Rank	Standerton CBD	Subject to a detailed business plan	The area is identified as being dangerous and in bad condition, safety measures in the form of street lighting etc. must be implemented.
Development of a Civic Precinct in the CDB around the Magistrates Court	Standerton CBD	Subject to a detailed business plan	To form an authority, use node within the CBD improving accessibility and communication between different government institutions and departments

**Table 34: SDF Implementation projects**

## Land Restitution and land claims in Lekwa

Land claims & land restitution is very important as far as land development is concerned. From a spatial planning point of view land ownership does not necessarily determine the preferred use of land; however, the exceptions are where uses are restructured through restricted ownership practices & where land restitution leads to commercially productive land becoming unproductive. The land restitution process can restrict investment and economic activity over the short- medium term but should not have an impact on the long-term use of the land. According to the Lekwa LM Spatial Development Framework (2017), as of 30 March 2016, there were 52 claims recorded.

LAND CLAIMS				
	Researched	Accepted	Gazetted	Total
Outstanding Land Claims	13	8	5	26
Not Spatially Identified	5	0	0	5
<b>TOTAL</b>	<b>18</b>	<b>8</b>	<b>5</b>	<b>31</b>

## Land Use Management System In Lekwa LM

The municipality has developed a Land Use Scheme (that is a wall to wall) with the help of the Department of Cooperate Governance and traditional affairs (COGTA) in 2020. The regulation of land is currently done using the wall-to-wall land use scheme.

The municipality has a SPLUM By-law in place for land use management, also has developed draft by-laws (Open space bylaw and encroachment by law as required by SPLUMA).

The municipality has approved the following policies:

- Bulk Contribution Policy
- Land Alienation and Leasing of Immovable Properties

In the final stages of developing the following policies:

- Encroachment Policy
- Incentive Policy
- Land Disposal Policy / Land alienation Policy
- Vacant land policy

Lekwa LM makes use of the Land Use Scheme to control and manage illegal land uses. There is no strategy part of the LUS for illegal land uses as the scheme is sufficient to address the illegal land uses. Town planning division issues out contravention notices to illegal land use. In addition, the municipality developed a municipal management and control of informal settlements by-law in 2018 to address land invasions and informal settlements. The human settlements unit has squatter controllers that assist the town planning division with enforcement.

The naming of streets and townships in the municipality is done through the National Geographical Names Council Act (Act 118 of 1998). Lekwa LM established a Section 79 Oversight Committee named "Local Geographic Name Committee" for the naming streets and townships. The municipality is yet to develop a policy to guide the naming of streets and townships.

Gert Sibande District Municipality procured a ArcGIS license for the municipality. However, the license is not a full software package. The municipality plans on procuring a full ArcGIS software package to develop a dashboard between Planning and Economic Development and the Budget and Treasury Office to ensure that land uses are aligned to the municipality's billing system.

The municipality has introduced an electronic system called MunAdmin which is a system designed for electronic record keeping, document management and general administration. The municipality currently does not utilise any electronic system such for processing land use applications due to insufficient network connection.

### **Lekwa LM Bulk Contribution Policy**

---

Lekwa LM has a Bulk Contribution Policy in place. The strategic intent of Lekwa LM bulk contribution policy is to ensure the financial sustainability of the Municipality through the definition and confirmation of an Engineering Services Contributions on any new development or land development application that increases the load on municipal external infrastructure. This intent is aligned with the Municipality's strategic focus as an opportunity area, which aims to create the economically enabling environment in which investment can grow and jobs can be created, while still being able to provide basic services to all its citizens.

#### **Policy objectives**

The objectives of the Bulk Services Contributions Policy are to:

- Recover the portion of the capital cost of economic infrastructure that is attributable to developments;
- Enable the provision of economic infrastructure in a timely and sufficient manner to support land development;
- Give effect to the requirements of SPLUMA and related legislation in respect of the development contribution for engineering services.
- Build up reasonable levels of capital to contribute to the construction of new infrastructure when the capacity of existing infrastructure approaches design capacity.
- Clarify the method of determining the development contribution for engineering services as well as the way development contribution for engineering services is calculated;
- Enable the municipality to impose a service development contribution to an applicant or a subsequent owner or occupier of a premise in the event of the actual use of an engineering service exceeding the capacity requirement proposed by the applicant and agreed to by the municipality or to developments subject to service contribution.

### **Lekwa LM Land Audit**

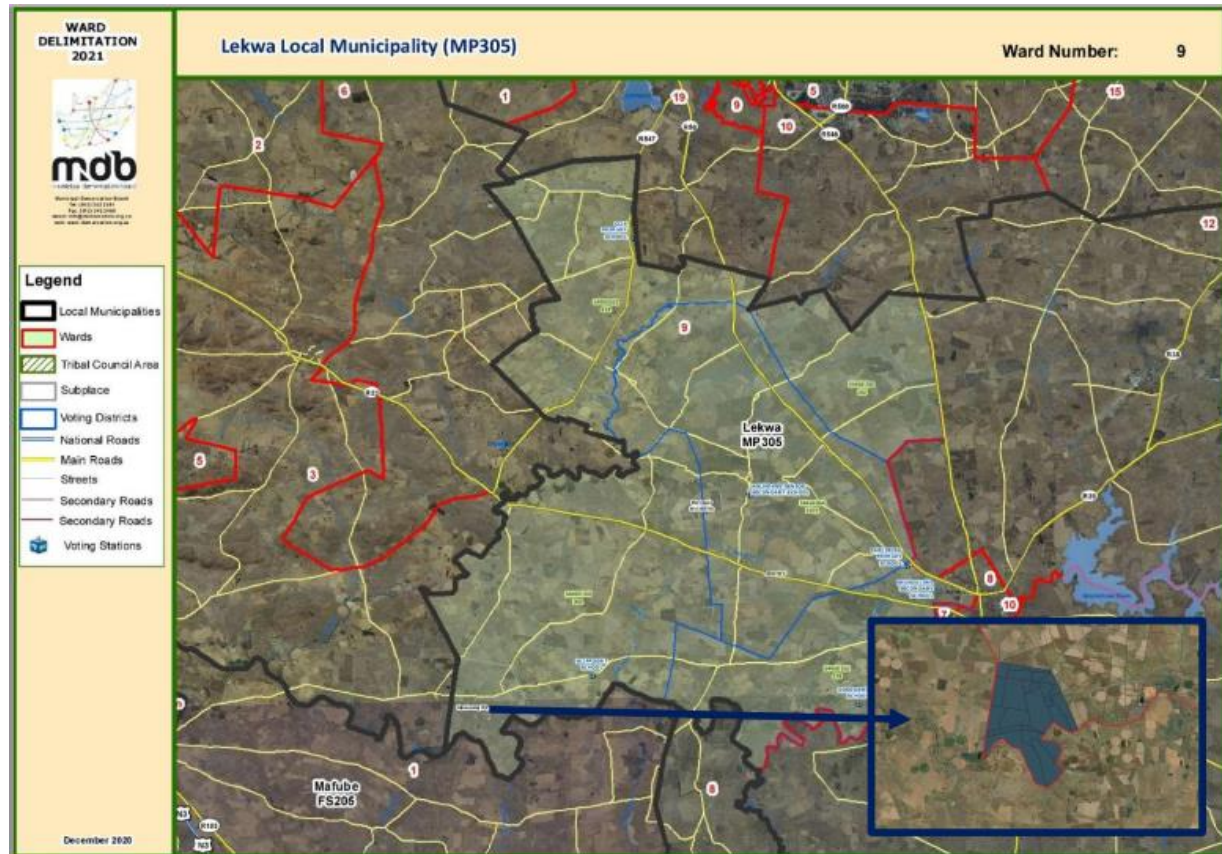

---

Municipality embarked on a land audit project to identify ownership of all the parcels of land within Lekwa Local Municipality in 2021. The result of the audit is a geographical information system

(GIS) database that contains a wide variety of information required for spatial planning and land use management purposes, furthermore, the report included recommendations that will include strategies and action plans. The cadastral data of 2017 indicates a total number of 28 971 parcels that measured 576 060 ha in extent.

However, ever since then the board has extended the boundary of Lekwa LM. As advertised in the municipal demarcation board circular 1 of 2018, the redetermination of the municipal boundaries of Lekwa Local Municipality by excluding the farms Vellingskraal 657 and Die Draai 659 from the municipal area of Dipaleseng Local Municipality, by including them in the municipal area of Lekwa as illustrated the map below. The two Parent farms amount to approximately 3738 ha which is subdivided into 22 portions. This effectively increases the overall parcels numbers to 28 993 parcels which now measures 579 798 ha.

The property valuation roll provided 25 612 of the title deeds numbers excluding 377 parcels from sectional titles leaving approximately 3 378 properties still missing from the current Valuation Roll when compared to the latest cadastral data from the surveyor-general. The land ownership categories are as per the diagram below.

Map 16: Lekwa LM Land audit

### Land Uses

Land Use Category	Quantity
Residential	21 933
Industrial	79

Business	563
Agriculture	2 417
Mining	5
Government	124
(PSI) Public Service Infrastructure	201
(POB) Properties Owned by Public Benefit Societies	46
Vacant	112
Other	449

### Property Ownership in Lekwa

Ownership Category	Number of parcels	%
National Government	279	1%
Provincial Government	141	1%
Local Government	3 864	13%
Private (Close corporation, Trust and PTY Ltd)	18 902	65%
All state-owned enterprises	1 370	5%
Undetermined	4 381	15%
<b>Total</b>	<b>28 993</b>	

**The strategic objectives of the land audit are as follows:**

- To add value to the Municipal Valuation Roll
- To enhance revenue collection
- To have a clean and credible cadastral dataset

**To achieve the above objectives the following proposals were made in the land audit report**

- Proposal 1: Regularly updating the Valuation Roll
- Proposal 2: Revenue enhancement
- Proposal 3: Implementation of IDP and SDF proposals
- Proposal 4: Land Disposal Policy Implementation
- Proposal 5: Update Cadastral Data Regularly
- Proposal 6: Land Registration
- Proposal 7: Investigate inconsistencies between Cadastral and Physical
- Proposal 8: Land Audit Projects
- Proposal 9: In-situ upgrade projects
- Proposal 10: Design and implementation of a vacant land tariff policy
- Proposal 11: Design and implementation of a development incentives policy

**Land audit proposals**

PROPOSAL	ACTION	INHOUSE/OUTSOURCE
Regularly updating the Valuation Roll	<p>The valuation roll is updated regularly when changes take place to the property.</p> <p>Supplementary valuations, therefore, must be compiled and published at least once a year in a Supplementary Valuation Roll</p>	Outsource
Revenue enhancement	<p>To develop an effective system of revenue collection, the following actions need to be taken;</p> <ul style="list-style-type: none"> <li>▪ Review Tariff Structure</li> <li>▪ Systematic Cleansing of Billing Information</li> <li>▪ Bill for Previously Unbilled Services</li> <li>▪ Raise Revenue from Sale of Stands</li> </ul>	Inhouse

Implementation of IDP and SDF proposals	<p>The Municipal Spatial Development Framework, per definition, essentially addresses the spatial implications of the Integrated Development Plan (IDP), it is recognized that holistic governance and management of any area also requires the implementation of strategies/proposals;</p> <ul style="list-style-type: none"> <li>▪ Nodal Review</li> <li>▪ Urban Edge</li> <li>▪ Priority Development Areas</li> <li>▪ Infill Development</li> <li>▪ Medium to Long Term Expansion Areas</li> </ul>	Outsource
Land Disposal Policy Implementation	<p>Review of policy underway and should be implemented once approved;</p> <ul style="list-style-type: none"> <li>▪ Provide a framework,</li> <li>▪ Guidelines and procedures that are intended to be followed by the Council for the disposal and letting of various types of immovable properties</li> </ul>	Inhouse
Update Cadastral Data Regularly	<p>Provision of valid and up-to-date data and information related to land administration activity can be exercised through the following;</p> <ul style="list-style-type: none"> <li>▪ Cleaning up existing databases by rectifying identified anomalies/ discrepancies.</li> <li>▪ Building and improving land mapping and land information systems will lead to a process of establishing spatial data and the latest information to support services conducted.</li> </ul>	Outsource
Land Registration	<p>Registration of land deals with matters concerning ownership, possession, or other rights in land are formally recorded to provide evidence of title, facilitate transactions, and prevent unlawful disposal which is why;</p> <ul style="list-style-type: none"> <li>▪ All land parcels (either new or old) to undergo the required statutory procedures for registration (Conveyancer appointment).</li> <li>▪ Completing and maintaining the property register which is required for the regional segment reporting.</li> </ul>	Outsource

Investigate inconsistencies between Cadastral and Physical	<p>Inconsistencies between Cadastral and Physical need to be investigated and plans should be put in place to normalize or illuminate the inconsistent information;</p> <ul style="list-style-type: none"> <li>▪ The field surveys will improve the data collection process which will provide public land managers and the public with essential information</li> </ul>	Outsource
Land Audit Projects	Land audit to be considered during IDP Project Identification and Programming.	Outsource
In-situ upgrade Projects	<p>When intervening in an informal settlement the municipality should;</p> <ul style="list-style-type: none"> <li>▪ Adhere to the Informal Settlement Upgrading Programme and;</li> <li>▪ Subdivisions are to be registered.</li> </ul>	Outsource
Vacant Land Policy	<p>Lekwa Local Municipality is couple with various vacant land which are not being billed by the municipality. Under such circumstances, a policy detailing the vacant land tariff should be proposed:</p> <ul style="list-style-type: none"> <li>▪ Property owners that have vacant land in Standerton, Morgenzon, and Thuthukani should therefore be guided by this policy.</li> </ul>	Inhouse
Sale of Properties	<p>Municipal land should consider selling properties for revenue increase, there are different ways of buying municipal land:</p> <ul style="list-style-type: none"> <li>▪ A private treaty between buyer and municipality where offers are made, and negotiations concluded in terms of Section 14(2) of the MFMA.</li> <li>▪ A public auction where the property is sold to the highest bidder.</li> <li>▪ Public tender where the municipality puts out a notice for 30 days calling for tenders. The municipal council or committee will decide on the winning tender in terms of its supply chain policies.</li> <li>▪ Public/private partnership in terms of Section 120 of the MFMA.</li> </ul>	Inhouse
Design and implementation of a	The introduction of a Development Incentives Policy is to motivate and entice investors to invest particularly within	Inhouse

development incentives policy	<p>the city as guided by spatial, land use and economic policies</p> <ul style="list-style-type: none"> <li>▪ to make the city the first-choice destination for investment and</li> <li>▪ to demonstrate commitment in growing the economy, providing tangible jobs, and supporting small and emerging businesses.</li> <li>▪ The value adds of the proposed incentive program to developers and business, benefit received shall be reasonably proportional to enhance value of the land and market rate of return to the development's capital.</li> </ul>	
-------------------------------	--	--

**Table 35: Land audit proposals**

### **Gert Sibande District Municipality Rural Development Plan 2016**

The country was allocated R6 Billion by Department of Rural Development and Land Reform for over the next three years for Agri-park projects. The Agri-park is a system innovation of agro-production, processing, logistics, marketing and training and extension services located in District Municipalities. As a network it enables a market-driven combination and integration of various agricultural activities and rural transformation services.

The objectives of Gert Sibande District Development Plan.

- To improve the living standards or well-being of the mass of the people by ensuring that they have security and that their basic needs such as food, shelter, clothing, and employment are met.
- To make rural areas more productive and less vulnerable to natural hazards, poverty, and exploitation
- To ensure that any development is self-sustaining and involves the mass of the people.

The Gert Sibande RDP Draft have proposed multi-purpose service delivery centers within Lekwa Local Municipality at Standerton, Sakhile, Thuthukani and Morgenzon. Issues pertaining informal settlements were identified around Standerton that needs to be addressed in the housing delivery strategies of the municipality. The Gert Sibande RDP Draft pointed out the following points on Lekwa Local Municipality derived from the previous SDF:

- Standerton in the central part of the municipality identified as a First Order Node, while Morgenzon was identified as a Second Order Node.
- Third and Fourth Order Nodes were identified to serve the areas which are far located from Standerton and Morgenzon.
- The northern, central, and southern extents of Lekwa either comprise existing agricultural activity or were earmarked for agricultural expansion and do not comprise any notable concentrations of human settlement.
- The precinct plan for Standerton delineated an urban edge which does not allow for outward residential expansion. Rather, the SDF proposed residential densification, as well as mixed use development. Two areas were proposed for infill development, in order to

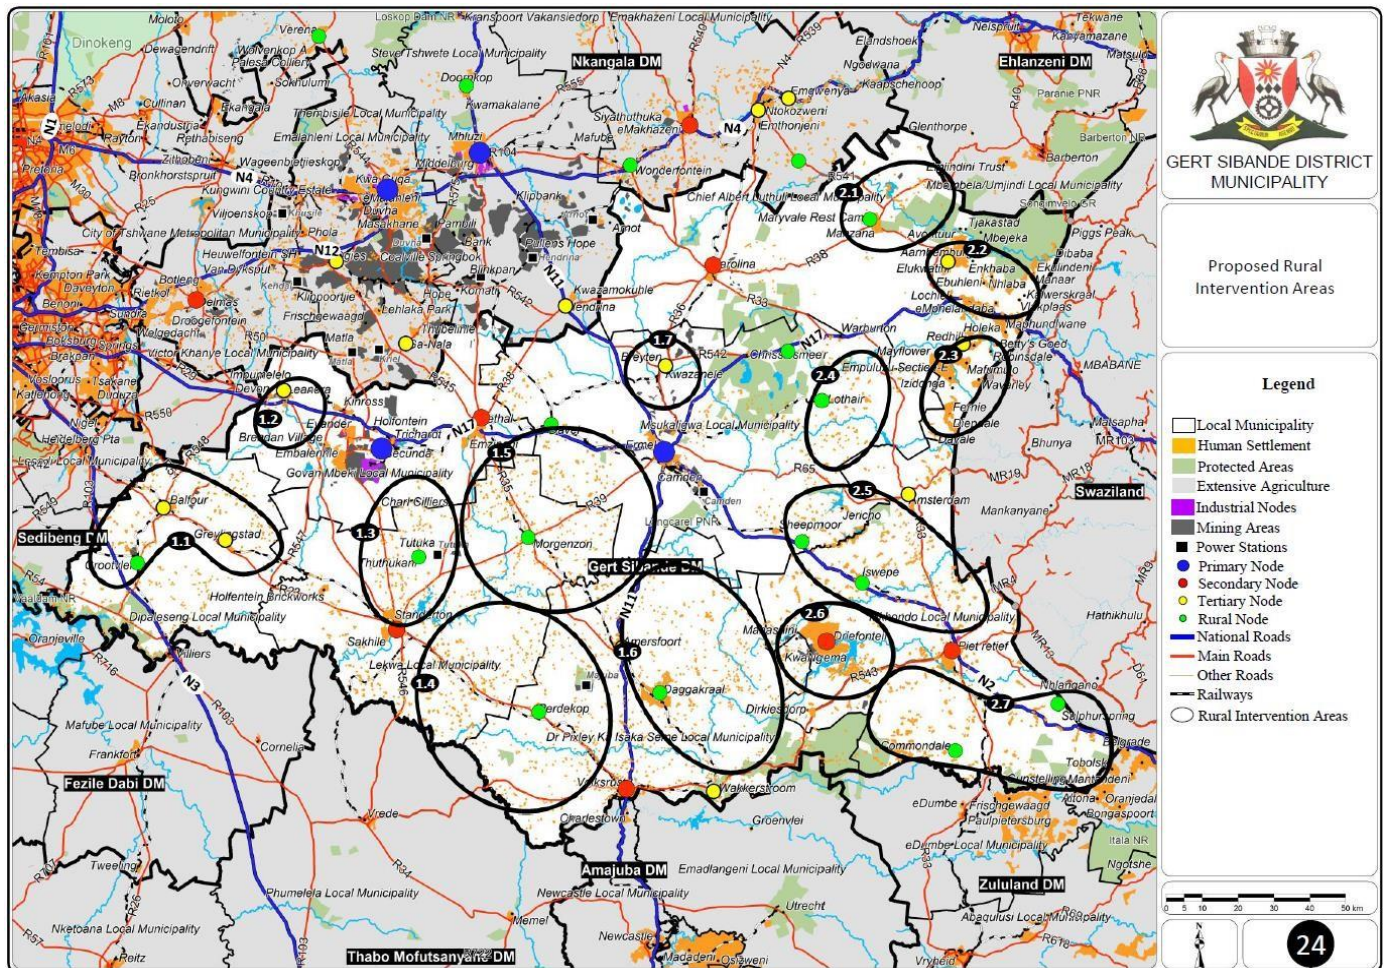

consolidate the urban structure of the town with Sakhile Township. The same principles applied to Morgenzon.

- There is no Strategic Development Areas (SDA's) within the municipality.
- Urban renewal initiatives in the municipality should preferably be in Standerton and Morgenzon where they will have the greatest potential impact.

Farmer Production Support Units (FPSU's) were identified by the RDP in the areas of Thuthukani, Holmdene, Morgenzon and Standerton. The revised SDF requests the consideration the FPSU at Standerton be shifted to Platrand which is more rural in nature and identified as a third order node within the municipality.

As mentioned, Lekwa Local Municipality is located in Functional Region 1 identified within the RDP. Functional Region 1 is called the GSDM Highveld area and is characterized by coal mining, electricity generation, maize, and livestock farming. Within each functional region the RDP have identified "Rural Intervention Areas (RIA's)."

### Rural Development interventions

**Map 17: GSDM Rural development initiatives** Source: Lekwa SDF, 2016

The Rural Intervention Areas applicable to Lekwa Local Municipality are RIA 1.3, RIA 1.4, and RIA 1.5. Each RIA could be described as follows:

- RIA 1.3: The hinterland between Secunda and Standerton, with the focal point being a potential Rural Node in the vicinity of Thuthukani.
- RIA 1.4: This RIA serves the hinterland between Standerton and Volksrust with Perdekop as the Rural Node serving the large number of rural communities in the surrounding area. Not identifies within the RDP, but just as important, Platrand also fall within this RIA and serves as a third order node within Lekwa.
- RIA 1.5: The rural area between Bethal, Ermelo and Amersfoort where Morgenzon can be strengthened as a rural node serving the rural communities within surrounding areas.

#### Planning and Economic Development Policy framework

- Constitution- S156 and Part B of Schedule 5: Municipal Planning (strategic, spatial, land use).
- SPLUMA, 2013: Municipal Planning
- National Standard and Building Regulations, 1977: Building Control Regulation
- Housing Act, 1997
- National Housing Code, 2009
- Social Housing Act, 2008
- Housing Consumers Protection Measures Act, 1998
- The Rental Housing Act, 1999

#### Organizational structure of Planning and Economic Development

DIVISION	NUMBER OF POSITIONS	TOTAL FILLED	NUMBER OF POSITIONS VACANT	VACANCY RATE (No of Vacant Positions/Total No. of Positions * 100)
Executive Manager's office	2	2	0	0%
Land and Property Management	7	5	2	29%
GIS	2	1	1	50%
Town planning	6	2	4	67%
IDP	2	2	0	0%
LED	4	2	2	50%
Human settlements	11	9	2	18%
<b>Total PED positions</b>	<b>34</b>	<b>23</b>	<b>11</b>	<b>32%</b>

**Table 36: PED Organizational structure**

#### Recommendations

- Municipality should ensure that officials have the necessary tools of trade such as laptops, travelling allowances, functional telephones for contacting stakeholders and functional WIFI to avoid negative impact on productivity of workers.
- Municipality should also establish a research unit.
- Municipality should establish property management unit to deal with land alienation/disposal processes.
- Municipality should fill vacant positions and capacitate the department with qualified and experienced personnel to enable efficient and sustainable provision of basic services.

- Provide capital funds for infill development & densification projects (residential stands for middle to high income group, municipal subdivided stands).
- Municipality should upgrade and maintain bulk infrastructure to support both existing and new developments to support local economy and to attract investors.

## 4.4 STATUS QUO ASSESSMENT OF LOCAL ECONOMIC DEVELOPMENT

### Lekwa Local Municipality Economy

- Lekwa LM contributed 3.9% to the Mpumalanga economy in 2021 – 7<sup>th</sup> largest economy in the province. Slightly larger than Nkomazi. The municipality further contributed 14.4% to the district economy – 3<sup>rd</sup> largest economy in Gert Sibande.
- Dominant contributions to Gert Sibande's utilities (mainly electricity), & agriculture industries, with substantial contributions to finance, trade, & community services.
- The average annual economic growth rate for Lekwa was 1.6% p.a. over the period 1996 to 2021. For the period 2016-2021 the economy expanded by 3.7% p.a.
- Estimated contraction in 2020 of 2.0% due to the COVID-19 lockdown. The economy expanded by 7.3% in 2021 & is expected to expand by 1.9% in 2022.
- The estimated average annual GDP growth for Lekwa between 2021 & 2026 is 3.1% p.a.
- In 2021, the size of the economy was estimated at R17.2 billion in current prices & R11.8 billion in constant 2015-prices.
- In 2021, the four largest industries were community services, mining, trade, & finance. These four industries combined to contribute 57.2% to the economy of Lekwa.
- Lekwa holds comparative advantages in agriculture, mining, & utilities (mainly electricity).
- In 2016, tourism spend totaled R375.7 million or equal to 3.4% of the local GDP. It increased to R472.5 million in 2021, which was equal to 2.8% of the local GDP in current prices.

### Poverty, inequality, and HDI in Lekwa

- The share of population in Lekwa below the lower bound poverty line (LBPL) deteriorated from 38.8% in 2016 to 44.5% in 2021.
- In 2021, Lekwa's share of population below the LBPL was the 8thlowest/10th highest among the municipal areas.
- In 2021, the number of people below the lower bound poverty line was 55 019 – 6th lowest number in the province.
- In the calculation of the Local Government Equitable Share (LGES), National Treasury estimates that Lekwa had 22 598 poor households in 2021.
- In 2021, the poorest 40% of households in Lekwa shared 7.6% of total income, which was lower than the 8.0% share recorded in 2016.
- Lekwa's share of income of the poorest 40% of households ranked 8th highest, indicating that income inequality was not as severe within the area as in other areas in the province.
- Improved Human Development Index (HDI) from 0.59 in 2016 to 0.61 in 2021.

Figure 37: Poverty, inequality and HDI indicators

#### Contribution to Mpumalanga's economy in constant 2015-prices

Figure 38: Lekwa LM contribution to Mpumalanga's economy, SERO Report 2022

#### Gini Coefficient

The Gini coefficient is a measure of inequality, among individuals or households within an economy. The coefficient ranges from 0 to 1, where 0 represents perfect equality (all individuals have the same income) and 1 indicates perfect inequality (where one person has all the income and the rest have none). In 2019, Lekwa LM's had a gini coefficient of 0.681. This indicates that inequality in Lekwa is still prevalent as most persons do not have income.

### Structure of the Lekwa LM economy in constant 2015-prices

Figure 39: Structure of Lekwa's economy, SERO Report 2022

### Some relevant economic plans and opportunities for Lekwa

Importance and relevance of:

- the implementation of the Provincial Spatial Development Framework (SDF) by COGTA.
- the implementation of a Provincial LED strategy framework by DEDT. Viable, vibrant and representative LED Forum, capacitated LED Unit and updated LED strategy. SMME development, including the informal sector. Investment friendly environment.
- the roll-out of the DDM.

Linking with economic interventions in Gert Sibande:

- Enhancing the manufacturing sector in Gert Sibande through the planned Petro-Chemical Technology Park in Secunda as part of the Mpumalanga Industrial Development Plan (MIDP).
- Agriculture & agro-processing – crop & livestock. Forestry & furniture manufacturing. Coal mining and electricity generation.

Economic opportunities in Lekwa:

- The implementation of MERRP projects and links with these projects. Building of a Mall to prevent leakages to other municipal areas like Secunda in Govan Mbeki.
- Opportunities in the tourism industry, as well as agriculture and agro-processing/manufacturing. Tapping into the Green Economy.
- Faster roll-out of basic services and municipal infrastructure necessary. Support to SMMEs and Cooperatives where the Social Enterprise Model/Programme and Government Nutrition Programme will contribute to job creation and economic development.

- Rejuvenation of township businesses with initiatives to transform townships and villages from labour and consumption reserves into thriving productive investment hubs.

### **Lekwa LM Local Economic Development Strategy**

---

In 2022, the Lekwa LM approved its Local Economic Development Strategy. The LED objectives of the municipality is "to create a conducive environment for job creation, human development and economic growth."

Strategic pillars in order to achieve LED Objectives

- An efficient and enabling municipality with exceptional infrastructure and basic service delivery
- Improvement of living standards of the citizens through business and employment opportunities across economic sectors and industries
- To grow tourism and recreation in Lekwa Local Municipality
- Create an enabling environment for investment attraction and retention.
- Sustain the natural resources base for future generations.
- 

### **The role of Lekwa Local Municipality in Local Economic Development**

It is important to understand the Municipality's duties and role in developing the local economy. One of the local government's key contributions to economic development is providing basic services. It is clear from the regulatory framework that it is mandatory for a municipality to create a conducive environment by delivering quality services that promote local economic development. The role of the Municipality is to facilitate an economic climate that supports growth, improvement of quality of life and tax base enhancement. Improving the economic climate should enable sustainable growth and job creation, increasing per capita income and improving acceptable income distribution. This will, in turn, support improvements in quality of life and broaden the tax base. Provision of public safety, cleansing services, maintenance or upgrading of the urban public environment and infrastructure, and social services that address social issues in the area allow individual property owners to benefit from a well-managed and safe neighbourhood. A supportive business environment also attracts investment to the area.

The top ten (5) industries i.t.o. contribute most to creating job opportunities employment are:

- Wholesale and retail trade
- Community, social and personal services
- Agriculture, forestry, and fishing
- Business activities
- Mining and quarrying

Notably, the wholesale and retail trade, agriculture, forestry and fishing and community, social and personal services are significant contributors to employment numbers in Lekwa Local Municipality. Notably, the mining and quarrying industry is among the top 10 industries contributing to LLM's employment. The importance of agriculture and mining is reiterated through the high number of employment opportunities provided by these sectors. The agricultural and mining sector typically employs unskilled workers. Globally and in SA, the agricultural sector is shrinking,

putting a large number of low-skilled workers' employment at risk due to vulnerability to external shocks such as environmental and climate change

### Key Success Factors for LED in Lekwa

Poor service delivery and inadequate infrastructure are major obstacles to development in the municipality. Investment in infrastructure will expand the capital base of Lekwa Municipality and create jobs. An infrastructure program will undoubtedly create employment if the resources used are sourced from local suppliers. The infrastructure should include water, sanitation, transport, electricity, housing, and connectivity, which are all necessary for business growth and investment. Fixing the infrastructure will negate unfavourable instances, such as when Astral Foods, one of South Africa's largest poultry producers with a processing plant in Standerton, took legal action against it due to severe supply disruptions caused by disintegrating infrastructure.

### Public LED Priority Index of Lekwa Municipality

The top six LED priorities according to the public, LED officials and councillors are depicted in the figure below and are as follows:

- Basic services
- Skills development
- Infrastructure development
- Rejuvenation of public spaces
- Employment creation
- Informal trade programme

### LED Strategy approach

The Lekwa Local Municipality shows great growth potential due to its resource endowments, comparative advantage in multiple sectors and strategic location being home to the Vaal River

and having immediate entry points to some of the largest Provinces in South Africa. To unleash the growth potential of the municipality, there need to be improvements in service delivery, infrastructure, and governance. The high unemployment rate, which is worse amongst the female population and the youth, requires labour reforms that will reduce the cost of hiring.

A Special Economic Zone in Lekwa Municipality has great potential to attract businesses and investors who will then absorb the excess labour in the municipality while contributing to the GDP of the municipality. The improvement in employment will reduce the high rates of poverty and inequality in the municipality. The growth potential of the Lekwa Municipality is high as it has untapped human and natural resources and room for expansion in the current industries.

### **Excellent Basic Service Delivery**

Businesses are known to move away from areas where poor service delivery disrupts production processes and avoid crime-ridden areas where instances of crime and a lack of security result in financial losses. Attracting a strong private sector is built upon basic service delivery, safety, and security.

Excellent basic service delivery is key to creating a supportive business environment, and the Municipality should provide and facilitate the following:

- Uninterrupted basic service delivery;
- Refuse removal and cleanliness;
- Lighting & marking of streets and pavements;
- Maintenance of the public environment
- Healthy social environment;
- Creating a safe and clean public environment by addressing issues of maintenance and cleaning of streets, pavements and public spaces;
- Manage existing and new public infrastructure for the future benefit of all the users of the area;
- Protect property values;
- Support the promotion of the area as a safe and clean environment by promoting greening, energy efficiency and recycling;
- Support and promote social responsibility in the area;
- Reducing crime and, therefore, losses due to criminal behaviour;
- Effective management of traffic flow and parking spaces.

### **Enabling Environment**

LLM should aim to create an enabling environment that attracts diversified private sector investment and fosters the growth and development of existing and new businesses.

The business environment of the area is dependent on the following:

- Economic growth in the area
- The availability of human capital and the required inputs to their respective production processes
- Access to markets
- Basic service delivery and maintenance of infrastructure

Private sector development must be supported by transport and road infrastructure as well as basic services such as water and electricity and factors such as housing which is mainly dealt with in the IDP. A safe and secure environment forms the basis of growing the private sector.

### **Business Support (Private Sector)**

Economic growth is a prerequisite for economic development. Economic growth means increasing the total output, i.e., all goods and services produced in a region. A region's economy can therefore be grown by increasing the production levels of local businesses and establishing additional (new) businesses. The inputs required for businesses must be increased, and businesses must operate at optimal production levels. Optimal production levels can be achieved through the necessary skills and by creating an enabling environment for businesses to flourish.

The private sector, made up of businesses, is both a beneficiary and a driving force for economic growth. Strong economic growth allows businesses to expand and grow, increasing their economic contribution and facilitating economic growth, creating a virtuous cycle. Therefore, efforts to promote economic growth create an enabling environment for existing businesses to grow and prosper and a conducive environment for new venture creation.

In addition to creating employment and capital formation, local businesses also contribute to government income. The value of the private business sector, therefore, mostly lies in creating employment, thus enabling households to improve their standard of living, pay taxes, and contribute to the local economy. Households, or citizens, are therefore the end-beneficiaries of business prosperity, and the government is, in turn, a beneficiary of citizens' prosperity.

A growing economy also enhances the chances of new businesses succeeding. The market for the goods and services produced by businesses can be enhanced by increasing the local economy's buying power and exporting goods and services to other areas.

The more people participate in the economy, the faster it can grow. Economic participation means that people earn an income that will enable them to buy more goods and services, increasing the demand for production. Therefore, creating employment is key to economic growth, and creating employment is facilitated through growing businesses to employ the people and establishing new businesses for people to employ themselves. The private sector can be developed and supported through:

- Supporting SMME development
- Creating an enabling environment for businesses
- Reducing unnecessary administrative burdens (red tape)
- Excellent basic service delivery
- Suitable road- and transport infrastructure
- Safe and secure environment

### **SMME Development**

Entrepreneurship is very important for putting labour, natural resources, and capital to productive use. Entrepreneurship is recognised as a key driver of economic growth, job creation, and poverty reduction (World Bank, 2013). Nations with higher levels of entrepreneurship are most competitive. According to the World Bank, a robust SMME sector can be a transformational economic force in

terms of enhanced competition, job creation, innovation, economic growth, and poverty reduction. However, private enterprises depend on favourable local business conditions to achieve prosperity. Local government has an essential role in creating a favourable environment for business success and job creation. Partnerships and mutual support are essential to achieve this synergy.

The informal sector contributes to poverty alleviation by creating a livelihood for the poor, creating employment, and producing goods and services for the local community. In South Africa, the informal sector is not confined to any particular sector of the population (Roux, 2014). Flea markets, street vendors, homemakers who work from home, hawkers, sewing, and backyard mechanics are some examples of informal businesses.

Given the informal sector's contribution to job creation and economic activity, it should not be regarded as a nuisance but rather as an additional source of economic growth that can be developed. Initiatives focused on the informal sector should provide support to develop enterprises and empower them to grow and create employment.

### **Road and Transport infrastructure**

Road- and transport infrastructure is required to link businesses to markets and ensure access to the necessary inputs and labour required for production. Excellent road and transport infrastructure are necessary for businesses across all sectors, including tourism. It is recommended that LLM access the applicable infrastructure grants to ensure that road and transport infrastructure support business- and tourism growth.

### **Red tape reduction**

One of the most crucial economic development activities a municipality could undertake is to improve the processes and procedures that the local authority itself subjects to local businesses. By reducing the number of complex, expensive and unnecessary business regulations, an area can quickly improve its investment climate and become known as a business-friendly locality.

### **Safety and security**

Safety and security are extremely important for boosting tourism and protecting businesses across all industries against losses and damages. Effective policing and involvement with the local Community Policing Forum (CPF) and neighbourhood watch initiatives and effective municipal policing should support reducing crime and enhancing safety and security in the Lekwa Local Municipal area.

## **Lekwa LM LED Strategy Action Plan**

The action plans included in the economic strategy include the following:

1. Excellent Basic Service Delivery
2. Communication Plan to forge strong relationships with stakeholders

3. Easy Wins:
  - a. Putting idle resources to work
  - b. Support NGOs and NPOs by establishing a Welfare Forum
  - c. Participation in Employment programmes through EPWP and CWP
4. Business Retention and Expansion Plan (BRE)
5. Youth development
6. Recycling Action Plan (Green Economy)
6. Action plan to promote agriculture
7. Tourism Promotion Plan
8. Investment Attraction Plan

The Implementation Plans for the Action Items are discussed in detail in the Lekwa LED Strategy.

### **Lekwa Local Municipality Tourism Strategy**

---

Lekwa LM council approved the Draft Tourism Strategy in May 2022, The objectives of the strategy are to:

- Enable all stakeholders in the Municipality to work together in promoting Tourism
- Improve structures and systems of investment promotion and facilitation, and working together;
- Attract investment to meet job targets in line with MTFs and NDP; (Reduce the high levels of Unemployment);
- Channel resources to where they have the greatest impact for Job creation and economic growth;
- Ensure that competitive advantages are utilised to the fullest (Boost economic growth through tourism);
- Align and integrate with national, provincial, and local policies, strategies, and programme
- Maximise job creation and retention through business retention & expansion; (Boost economic growth through tourism)

### **Status Quo of Tourism in Lekwa LM**

Lekwa Municipality is within Mpumalanga Province in the Gert Sibande District, the Municipality is currently faced with high rate of unemployment which is at 27.5%. The Tourism sector is not creating jobs as expected, this due to the lack of coordination and common vision between stakeholders.

The Local Government is unable to create enabling environment for tourism development and also supporting the existing Tourism business, there Council owned tourism attractions which have potential to enhance tourism development in the Municipality, such attractions facilities are not properly managed, not maintained and are underutilised.

There is no local tourism association to coordinate stakeholders and encourage development of new tourism products that are needed by the tourist, lack of events that can attract tourist is also a challenge for the tourism sector to create the needed jobs. Lekwa Municipality (Standerton) was a battlefield of the Anglo-Boer war as a result the Municipality has heritage sites which are not marketed as tourist attractions for the Municipality.

### **Tourism Opportunities in Lekwa Local Municipality**

### Grootdraai Dam

Grootdraai dam was built in 1982 mainly to support the water needs of Sasol at Secunda and Eskom Powers stations such as Tutuka, Matla, Kriel, Duvha, and Kendal as these power stations are located on the coal fields in the adjacent Olifant river basin. Grootdraai dam is used mainly for industrial purpose, and to a lesser extent domestic and recreational purposes. The Tourism Growth Strategy called this area “Cosmos Country” and noted that it is valuable in offering easy weekend access for visitors. Grootdraai Dam was also noted as a popular water sports destination. Events in the area include

- Birdwatching;
- Shoreline fishing;
- Camping;
- Boardsailing/Windsurfing;
- Kite Surfing;
- Fishing from Boats;
- Paddle skiing /Rowing/Canoeing;
- Yachting;
- Swimming;
- Skiing and Powerboating;
- Competitive and Recreational angling
- Picnicking and Sunbathing.
- Music on the dam

The development of Grootdraai Dam should be prioritised as an urgent mechanism to support tourism development in Lekwa LM, during the profiling of Tourism attraction it become evident that there are currently limited tourism facilities within the LLM and tourism does not make a meaningful contribution to employment or GVA in the area. It was also found that Grootdraai dam has dilapidated and vandalized ablution facilities, play grounds and picnic facility. The facilities have been neglected for a long time, and there is no specific official event management system in place, access road to the dam is also a challenge.

### **Activities that can be supported**

The Dam would then serve as the centre for several family, water sports and adventure related activities. Income could be generated through entrance fees and for the use of facilities. The Dam could also serve as a wedding and Music Festival venue (as well as other events, with a view to becoming the meeting place for the town). Flea markets and picnic sites would also encourage regular visits from the local community and serve to develop SMMEs. Given the strategic location of the Grootdraai dam this tourism attraction it can attract more tourism from the neighbouring provinces as well as tourist from other countries to visit Lekwa Municipality.

### Vaal River

The Vaal river is one of the defining features of Lekwa Local Municipality and is important both from an environmental and historic point of view. The name of the river is an image that Lekwa Local Municipality should strive to uphold. Vaal River is the greatest asset of Lekwa and should be used as a tool to enhance Tourism Development.

An unpolluted river would encourage water activities ranging from kayaking to rafting to guide boat trips. If Lekwa Local Municipality is to sell Vaal river as tourism (recreational ) product which majors on nature and adventure activities then it is essential that the river be well looked after.

The Municipality should consistently monitor pollution levels in the river and adopt a set of water quality standards; Prevent dumping in or along the river;

Consistently monitor pollution levels in the river and adopt a set of water quality standards; Prevent dumping in or along the river, Vaal is beautiful scenery that present the following

- Birdwatching
- Fishing from the boats
- Paddle skiing /rowing/canoeing;
- Picnicking on the river banks of Vaal

The tourism attraction profiling report indicated that, there are Council owned Tourism attraction facilities on the bank of the Vaal River. It was also established that there is a lack of capacity and funding mechanism in place to ensure that the tourism attractions are unable to attract tourist to Lekwa, as a results, attractions as a result the facilities are run down and have been vandalised. This prevents tourist both domestic and external to fully utilise the facilities. It is therefore required that mechanisms to be put in place in order to be able to attract tourist to Lekwa LM taking the advantage of Vaal River

#### Township Tourism

Township tours: As part of collective Mpumalanga's Heritage Route via several targeted towns), add to Nicholas Bhengu as Religious Route. Using a Soweto-style approach to township tourism, that include developing cultural tours/ experiences (people, place, food, and entertainment experience of local townships) in different towns that focus on

Developing a potential Arts and crafts centre (with home grown artists – focus on youth and women entrepreneurs), including strengthening township culture 'look and feel', such as local graffiti artists/ youth to brighten certain township landmarks (such as the iconic Seratu Mountain)

Clothing specially made (by local entrepreneurs) using cultural designs sold via local retailers Township stores) develop a route through township displaying local art and special attractions (Soweto-style) that incorporates Sakhile Township Tourism initiative i.e., Shisanyama and Popular car washes, Offer of Homestays (extend sharing of residence in the township) to allow tourists to feel and experience local culture and traditional foods). This will help to change perceptions and a mindset change to improve township/ cultural tourism

Linking with other industries (mining, manufacturing, agriculture, etc) that will stimulate flow of tourism into and out of the townships (such as volunteer tourism for those volunteering at township-based community food gardens (sponsored projects)

#### Historical Sites

Standerton was named after Adriaan Hendrik Stander, a Boer leader who owned the farm on which Standerton was established in 1876. Standerton was once a battlefield where the Anglo-Boer war took place, this town also was a town for prominent politician and prominent religious leaders

Lekwa Local Municipality has a number of historical sites of high national significance. These include:

- the Garden of Remembrance,
- Voortrekker Monument,
- Anglo-Boer war concentration camp,
- Nicholas Bhengu memorial
- Old Kruger Bridge

As part of a tour package, an historical site need not have much actual substance as the tour puts the site into its historical context by emphasizing its relationship with other sites as well as by providing effective historical narration at the site.

### Lekwa LM Agricultural Strategy

Lekwa LM council approved the Draft Agricultural Strategy in May 2022. The purpose of the strategy is:

- To promote transformation in agriculture and agro-processing sectors.
- To increase food security in the Lekwa Local Municipality.
- To increase farming community safety and reduce stock theft.
- To create effective farmer support, agro-processing, and agriculture market.

### Agriculture Status Quo

District municipality	Local municipality	Crop		Livestock		Mixed farming		Other		Total
		No.	Contri.	No.	Contri.	No.	Contri.	No.	Contri.	Contri.
Gert Sibande	Albert Luthuli	1019	72.6	51	3.6	322	23.0	11	0.8	1403
	Dipaliseng	446	86.8	47	9.1	21	4.1	-	-	514
	Dr Pixley ka Seme	353	98.9	-	-	4	1.1	-	-	357
	Govan Mbeki	93	83.8	8	7.2	10	9.0	-	-	111
	Lekwa	157	37.6	159	38.1	99	23.7	2	0.5	417
	Mkhondo	570	93.1	1	0.2	41	6.7	-	-	612
	Msukaligwa	124	24.7	72	14.3	306	61.0	-	-	502
	TOTAL	2762	70.5	338	8.6	803	20.5	13	0.3	3916

### Implementation Plan

Programme	Project
Programme 1: Food Security	Research on modern farming methods. Encouraging home gardens
Programme 2.: Farming community safety and reduction of stock theft	Circle of defence

Programme 3.: Transformation of the agricultural sector and agro-processing	Provision of land to emerging farmers Agro-processing
Programme 4: Support to emerging farmers	Support to emerging farmers Access to the markets

### **Lekwa LM economic Reconstruction and Recovery Plan**

South Africa's economy has been negatively affected by the outbreak of the Covid 19 pandemic in the Country and the rest of the World. Though the outbreak found the economy of the country at a vulnerable state, the country had already experienced two consecutive quarters of a recession. It is against the above background that Municipalities including Lekwa Local Municipalities are expected to develop economic recovery plan beyond the Covid 19 economic interruptions, the plan seeks to unlock production potential for improved competitiveness and sustainable economic growth.

Lekwa Local Municipality's contribution to the Mpumalanga Province economy in 2019 was 2.9%, making it the 9th largest economy in the province. About 10,9% contribution in the district economy, 3rd largest in the district. Growth rate in the municipality is recorded as (1996-2019): 0,5% P/A and 2014-2019, 0,4% P/A and growth rate projections (2019-2024): 0,3%-0,6%, whereas unemployment Rate is recorded as 27,1%.

## Organizational structure for the division of Local Economic Development

Local Economic Development in Lekwa LM is a division that is within the department of Planning and Economic Development

DIVISION	NUMBER OF POSITIONS	TOTAL FILLED	VACANCY RATE
LED	1 LED Manager 3 x LED Officer	1 LED Manager 1 LED Officer	50%

**Table 38: Organisational structure of LED in Lekwa LM**

## Recommendations

- Municipality should ensure that officials have the necessary tools of trade such as laptops, travelling allowances, functional telephones for contacting stakeholders and functional WIFI to avoid negative impact on productivity of workers.
- Municipality should also establish a research unit.
- Municipality should establish property management unit to deal with land alienation/disposal processes.
- Municipality should fill vacant positions and capacitate the department with qualified and experienced personnel to enable efficient and sustainable provision of basic services.
- Provide capital funds for infill development & densification projects (residential stands for middle to high income group, municipal subdivided stands).
- Municipality should upgrade and maintain bulk infrastructure to support both existing and new developments to support local economy and to attract investors.

## 4.5 STATUS QUO ASSESSMENT OF BASIC SERVICE DELIVERY AND INFRASTRUCTURE DEVELOPMENT

### Service delivery and infrastructure policy framework

In accordance with SAICE standards Lekwa Local Municipality falls under grade D and E in terms of water, sanitation, electricity, and roads infrastructure status, that is, we have infrastructure that is not coping with demand and is poorly maintained and this situation is likely to subject the community to severe inconvenience and even danger without prompt attention.

Lekwa LM also has infrastructure that has failed or is in the verge of failure, exposing the communities to health and safety hazards and as a result immediate attention is required. These two factors are brought forth due to ageing water, sanitation, electricity, and roads infrastructure with the following challenges:

- Inadequate maintenance of the systems.
- Slow renewal of aged infrastructure.
- Critical skills shortage, it is of utmost importance to note that profitable local economic activities require efficient and functioning systems of water, sanitation, electricity and roads management infrastructural services.
- Solid waste management and illegal dumping sites.
- Poor revenue collection and no strategy to deal with that challenge.
- Uncoordinated efforts from various key sectors on the previous interventions in the municipality.

In short, good infrastructure improves the quality and length of human life. It was within this background that government in 2001 went further to institute free basic services policy, committing to provide free basic services to indigent households which in terms of water and sanitation provides for 6 kiloliters per day per household and ventilated improved pit per household respectively.

#### Road infrastructure in Lekwa LM

Tarred Road Infrastructure Kilometers					
	Total tarred roads	New tar roads	Existing tar roads re-tarred	Existing tar roads re-sheeted	Tar roads maintained
2016/2017	175.1	0.0	0.0	0.0	2,0

**Table 39: Grant investment for the past five years****4.6 STATUS QUO ASSESSMENT OF COMMUNITY SERVICES****Powers and functions**

- To provide access to comprehensive fire and emergency services to all communities of Lekwa Municipal area, reduce the incidents and adverse effects of fire, contribute to preserving life, maintain a healthy natural environment and safeguard the economic base of the municipality.

- Re-engineering of Solid Waste removal in Lekwa to ensure that an affordable hygienic service can be provided.
- To protect health, well-being and the environment by providing reasonable measures for promoting and ensuring the effective delivery of waste management services.
- To manage the rendering of efficient and sustainable traffic and law enforcement services to all road's users; provision of safety and security in municipal area of jurisdiction; and road marking and signs maintenance
- To promote and develop Sports, Art and Culture and other recreational activities.
- Proper management of municipal community facilities including sport fields, public spaces and recreational centres, parks and facilities; and provision of burial spaces.
- To provide library and information services by increasing and promoting access by providing suitable loan services and collections development of library materials.

## Waste Management

The Lekwa Municipal Area incorporates the towns of Standerton and Morgenzon as well as the township areas of Sakhile and Sivukile. No other settlements were identified in the Municipal area that would have to be included for service delivery. Currently, some form of a waste collection service is rendered to all developed and proclaimed areas of the Municipality. All the waste management for the municipality is coordinated from Standerton Sakhile municipal offices. There are currently 15 wards in the municipal area. The two town of Standerton and Morgenzon utilize the waste disposal sites Standerton and Morgenzon respectively for their waste disposal requirements.

The municipality also has a relatively large portion of households that are informal. To offer a refuse collection service to these households are often problematic due to the accessibility to the households, the high density of the households per area and the lack of revenue generation in the form of rates for refuse collection.

### National Domestic Waste Collection Standards

Item	Total number
Households	37334
Serviced households	30518
Unserviced households	6816
Indigent households	0
Unserviced indigent households	0
Service Level A: On-site appropriate and regularly supervised disposal	0
Service Level B: Community transfer to central collection point:	0
Service Level C: Organised transfer to central collection points and/or kerbside collection:	30518
Service Level D: Mixture of Service Level B and Service Level C:	0

Total Serviced households as per the National Domestic Waste Collection Standards:	30518

## Status quo of waste disposal facilities

### Standerton landfill site

The Standerton waste disposal sites is licensed in terms of Section 20 (b) of the National Environmental Management: Waste Act, (Act 59 of 2008). The site is operated by the municipality. The site is operated by following the cell method, but is not operated according to license conditions. Cover material is not readily available and no regular covering of waste is occurring as required in the license issued for the site.

The uncontrolled reclaiming of waste on the waste disposal sites is interfering with the operational activities and should be formalized. There is regular burning of waste taking place which is done mainly by the informal reclaimers on site. The site operations should be upgraded to comply with the license conditions and/or Minimum Requirements for Waste Disposal by Waste disposal sites document, published by DWAF in 1998.

The main access route to the Standerton waste disposal sites is the Walter Sisulu Drive and the R 546 and the waste disposal sites is approximately 7 km from the centroid of Standerton Town.

<b>Position of site:</b>	7 km North from the Standerton town Centre (Co-ordinates:26°54'28.03S 29°14'27.20E)
<b>License:</b>	Yes
<b>Year issued:</b>	2008
<b>Classification of site:</b>	Class G: S: B-

<b>Estimated Volumes per day, week or month:</b>	20 000 t/annum
<b>Is cover material available?</b>	No, covering does not occur as required
<b>Is the drainage sufficient</b>	No
<b>Is there access control?</b>	No
<b>Does the site have a sufficient buffer zone?</b>	yes
<b>Type of equipment utilized on site:</b>	Waste disposal sites compactor, FEL
<b>Operating hours:</b>	Officially: 8:00 – 17:00 daily
<b>Site facilities, i.e., ablutions, guard house:</b>	None
<b>Evidence of waste being burnt on site:</b>	Yes
<b>Estimating cost for closure:</b>	No estimate regarding closure exists.
<b>Savings plan for closure:</b>	There is currently no savings plan in place for the closure of the site.
<b>Type of Operation (end – tip, trench, cell):</b>	Cell method
<b>Estimated size of site:</b>	19 Ha
<b>Estimated remaining life of site:</b>	20 years
<b>Separation of fresh and contaminated water:</b>	No
<b>Groundwater monitoring:</b>	No

### Domestic Waste Generation

Current waste generation and estimated future waste generation	
Current domestic waste generation rates	33420.1
Future domestic waste generation rates (in 10 years)	16710

### Domestic waste generation graph:

### Waste Stream Analysis

<i>Standerton</i>		
Waste type/streams	Waste disposed per annum (tons)	Total percentages
General waste	33420.1	93.3%
Garden waste	1105.3	3.09 %
Construction and demolition waste	1291	3.60 %
Tyres	0	0 %
Other	0	0 %
<b>Total</b>		<b>100 %</b>

### Other waste facilities

The municipality does not have other waste facilities. However, the IWMP reflects plans to Conduct a feasibility study to determine whether there is a need to establish buy back centres.

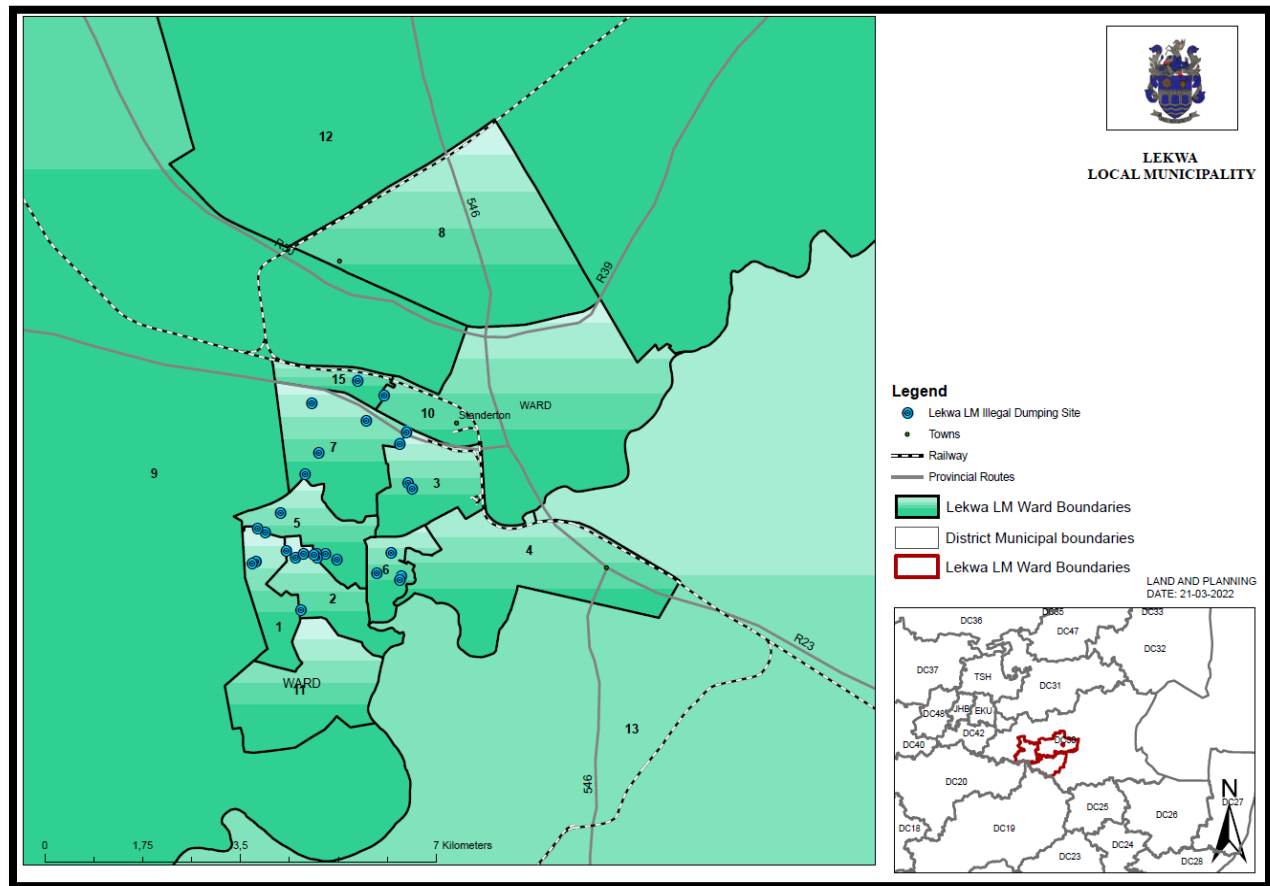

### Vacancy rate

Department	Number of Posts	Number of Posts Filled	Number of Posts Vacant	Vacancy Rate

<b>Department Total</b>	<b>235</b>	<b>148</b>	<b>87</b>	<b>37%</b>

**Table 40: Community services organisational structure**

### Illegal dumping sites per ward in Lekwa LM

**Map 18: Illegal dumping sites in wards 1-15**

## Recommendations

- Source funding for rehabilitation of Morgenzon landfill site which has been closed and upgrade of Standerton landfill site - 2022/23 financial year.
- Review of Integrated Waste Management Plan.
- Budget allocation to procurement of five (5) refuse trucks, three (3) tipper trucks that will allow the municipality to operate according to service standards.
- Filling of vacant positions.
- Development of maintenance plan for vehicles and machinery.
- Refresher training for drivers and machine operators.
- Development and implementation of a cleaning and awareness campaign in all Wards.
- Protective Clothing processes to be concluded and allocation be done to employees according to Conditions of employments and standards.
- Engagement with stakeholders like District Municipality Disaster Management Centre, Sasol mining, Seriti, Eskom etc. to assist the Fire Stations with machinery and equipment required in-order to improve response time.
- Recruitment processes be in place for filling of vacant positions within the division.
- Budget allocation for building of new fire station in Morgenzon and Sakhile.
- Refresher training for drivers and machine operators.
- Budget allocation for procurement of one (1) Front-end loader, one (1) bakkie and other grass cutting material be made available during 2022/23 financial year.
- Protective Clothing processes to be concluded and allocation be done to employees according to Conditions of employments and standards.
- Fast track fencing of fencing and building of ablution facilities in Rooikoppen, further to that a land should be identified for a new cemetery.
- Refresher training for drivers and machine operators.
- Wellness programmes to be developed for all employees and Senior Managers, Managers and supervisors to come-up with programmes that will recognize best performing employees.
- A programme be developed to refresh employees about their tasks, duties and job description
- Filling of vacant positions for all public libraries.
- Budget allocation for building of new library (CBD and Thuthukani), library operations and collection during 2022/23 financial year.

## 4.7 ENVIRONMENT AND CLIMATE CHANGE IN LEKWA

The constitution of South Africa is the over-arching framework of all other legislation in South Africa and its primary goal is to protect the rights of all citizens of the country. The constitution binds the legislature, the executive, and all organs of state. The constitution aims to promote the integration of environmental laws and protection of resources at all levels of government and development and ensure accountability, transparency, and participation

In terms of the environment, the constitution states that: (S24) Everyone has the right –

- to an environment that is not harmful to their health or well-being; and
- to have the environment protected, for the benefit of present and future generations through reasonable legislative and other measures that –
- prevent pollution and ecological degradation;
- promote conservation; and
- secure ecologically sustainable development and use of natural resources while promoting justifiable economic and social development.

## **Air quality**

The Highveld Priority Area (HPA) was declared by the Minister on 23 November 2007 under the National Environmental Management: Air Quality Act (AQA). A priority area is defined as an area where ambient air quality standards are being exceeded, or may be exceeded. The declaration necessitated the development of an Air Quality Management Plan (AQMP) for the area. These are the local municipalities in the Gert Sibande District Municipality (GSDM) that fall within the Highveld Priority Area Govan Mbeki, Dipaleseng, Lekwa, Msukaligwa and Pixley ka Seme. A range of industrial, mining and agricultural activities are carried out in the priority area, including power generation, commercial forestry and related industries, metal processing, petrochemical refining, ceramic processes, quarries, mining (primarily of coal), fertiliser and chemical production, explosives production, charcoal production, and other smaller scale industrial operations which contribute to the air quality in the area that needs to be carefully managed to ensure the health of communities.

Air quality is a shared service between the district and municipality. Municipality to develop its own air quality plan through the district's assistance. DFFE has ambient air quality monitoring stations within the LM. The municipality does not have its own yet. The municipality does not have air quality by-laws as yet.

## **Priority sources and pollutants**

These are some of the priority sources that have been found to be significant in terms of their contributions to ambient air pollutant concentrations and associated health risks within the Lekwa Local Municipality:

- Household fuel burning;
- Vehicle Exhaust emissions;
- Mining operations:
- Unrehabilitated mine tailings;
- Agricultural Activities;
- Industrial and commercial fuel burning;
- Biomass burning;

## **Soils, Topography, and geomorphology**

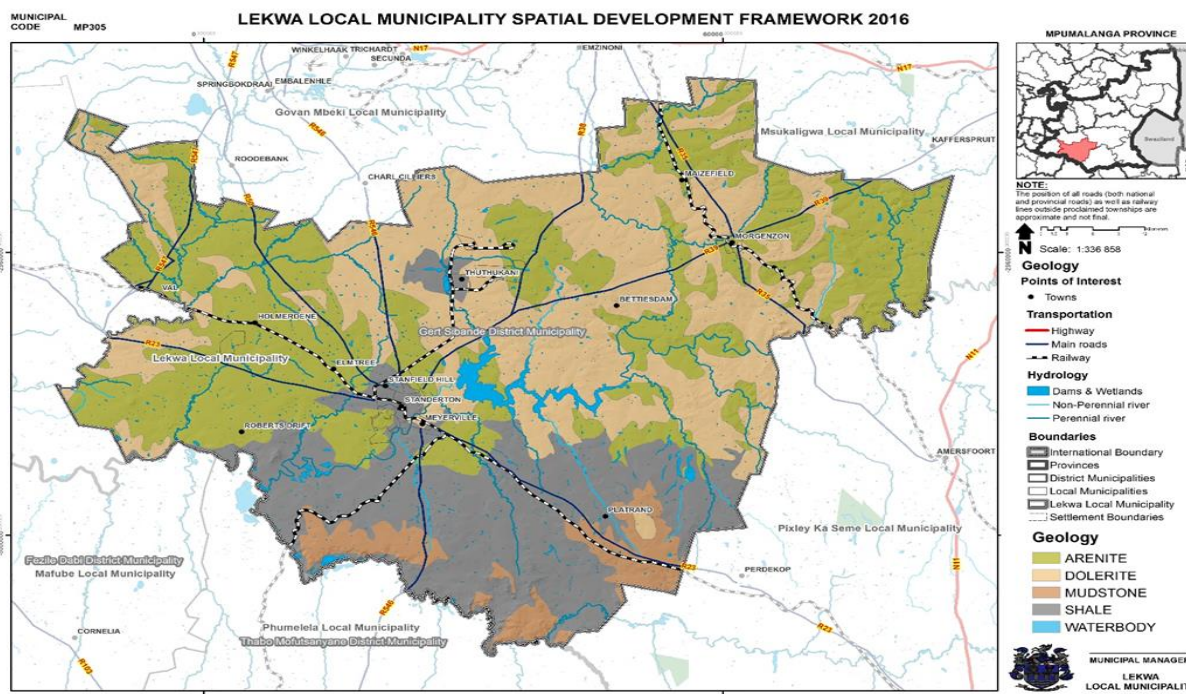

The largest area of the LLM is covered by vertic, malonic or red structured diagnostic horizons that are undifferentiated. The municipality lies on large open plains of the Highveld region becoming gently undulated to the east. There are no areas with slopes greater than 9%.

## **Water resources**

The Lekwa Local Municipality is situated within the upper Vaal Water Management Area. The Vaal River flows through the municipality, and forms part of the southern and eastern boundary of the municipality. The Grootdraai Dam, situated upstream of Standerton is a major impoundment within the upper Vaal system, and is primarily used for flow attenuation and water supply. Rivers within the municipality all flow into the Vaal River, and the major rivers are the Water Val and Rietspruit rivers in the west, and the Leeuspruit, Palmietspruit, Boesmanspruit, Rietspruit,

Kaalspruit and Blesbokspruit. The Klip River forms the southern boundary of the municipality before its confluence with the Vaal.

**Map 19: Lekwa Geomorphology**

### Aquatic and wetland ecology

Aquatic habitats include permanent bodies of water which provide habitat for aquatic life, water reeds and water lilies. Numerous smaller, seasonal dams surround the permanent dams. Some rivers running through the municipality have riverine vegetation which provides breeding space and feeding for fauna.

### Wetland Habitat

This vegetation is associated with grasslands that occur along river beds or in soil depressions and relies on seasonal or perennial water for survival. This vegetation uses nutrients from animal manure, sewage works and natural decomposition to grow, thereby filtering water as it passes through. The wetlands provide shelter for insects (e.g., dragon flies) and birds (e.g., weavers) and breeding habitats for reptiles (e.g., snakes and frogs). The wetland areas hold open, often shallow water with extensive fringing vegetation and some patches of young vegetation

### Climate change in Lekwa (Lekwa SDF, 2017)

It is predicted that climate change will directly impact South Africa's mean annual temperature and rainfall ranges which will influence pest and disease distributions, flowering and fruiting seasons, and ground water resources (South African Fruit & Wine Initiative, 2009). On the topic of climate and agriculture, total yield on any farm is the product of climate and soil that can be

regarded as the yield potential of that area. Certain crops favor certain climatic requirements for example maize is a warm weather crop and is not grown in areas where the mean daily temperature is less than 19°C or where the mean of the summer months is less than 23°C. The critical maximum temperature destructively affecting yield is approximately 32°C and frost can damage maize at all growth stages (DAFF, 2003).

The maximum average annual temperatures of Lekwa Local Municipality are between 26°C to 28°C. The minimum average annual temperature varies between 3°C to 1°C. It is mostly known that the Mpumalanga province experiences relatively high temperature levels in the summer. In contrast Lekwa Local Municipality experiences moderate summer temperatures, on average, maximum temperatures of between 26 to 28 °C during the summer season. Where the temperature decreases as you move towards the east. The most eastern part of the Municipality ending at a maximum summer temperature of less than 26 °C.

#### **Climate change adaptation measures in Lekwa (Lekwa SDF, 2017)**

- Agricultural planning must consider the potential high intensity rainfall and associated potential flooding. Healthy riparian buffers must be designated around water courses to cope with increased water and flooding.
- No agricultural activity should take place closer than 32 meters from any river bank.
- Developments below a dam wall, must take cognizance of the dam failure flood line and No development should take place within the specified flood line and where the integrity of a river bank may be compromised.
- Existing settlements should be encouraged to relocate outside of these flood lines.
- Fields must be properly planned and contoured with appropriate erosion control; this is because when erosion occurs the eroded sediments may block rivers from flowing smoothly which will result in flooding under harsh climate conditions.
- No future settlements within the 1:100-year flood line and dam failure flood lines. No development should be closer than 32m from the high-water mark of any unprotected dam, until such time as the Disaster Management Plan identifies settlements that are at risk of being flooded. 100-meter development buffers should be encouraged around all wetlands.

#### **Climate change mitigation strategies in Lekwa (Lekwa SDF, 2017)**

- Agricultural planning should be around planning sufficient water sources without exhausting available resources or damaging the wetland or the environment. This is because wetlands are critically important for climate mitigation, as they protect human settlements from floods.
- The municipality is located within a lower to mid-range annual rainfall class. Because the municipality has a vast amount of agricultural activity it is important to assure sustainable water sources to be utilized for agricultural purposes and agricultural planning should occur around planning sufficient water sources.
- No wetlands are to be converted or drained without approval from the Department of Agriculture and Environmental Affairs. Wetlands are important to environmental sustainability, water retention and filtration and flood mitigation and must be conserved as far as possible.
- Most agricultural potential in the municipality occurs in the area of the Grootdraai Dam towards the north. In the northwest corner an area with high potential agricultural values exists. This area should be protected from development and be utilized for strictly agricultural use. This is because conservation of agricultural practices ensure that agricultural systems become more resilient to harsh climate. Agricultural practices also reduce greenhouse gas emission and they enhance their role as carbon sinks. In areas with High Agricultural Potential no further development other than commercial agriculture should take place

### Lekwa LM Climate change response policy.

Lekwa Local Municipality must develop and adopt a climate change response policy and climate response strategy supported by the National Climate Change Response White Paper which states that “Local government plays a crucial role in building climate resilience through planning human settlements and urban development; the provision of municipal infrastructure and services; water and energy demand management; and local disaster response, amongst others. Climate change considerations and constraints will be integrated into municipal development planning tools such as Integrated Development Plan and municipal service delivery programmes.” The response policy and strategy should incorporate vulnerability analysis assessment, climate change analysis and priority climate change response actions. Every unit in a municipality must play its part in climate change mitigation and adaptation.

Gert Sibande District Municipality is in possession of the CCRP, the LM needs to make use of the District plan and customize it. Below is a list of the units in Lekwa Local Municipality and their roles in response to climate change.

Lekwa LM Directorate units	Response action
Spatial planning and land use management	<ul style="list-style-type: none"> <li>▪ The unit is responsible for updating spatial data on land use constraints in order to identify climate change related vulnerabilities</li> <li>▪ Update SDF to include climate change considerations in spatial planning.</li> <li>▪ Consider climate change impacts, risks and vulnerable areas in land use decision making</li> <li>▪ Incorporate climate change considerations into the development and update of various land use and human settlement planning documents. E.g., by-laws and land use scheme.</li> </ul>
Building control	<ul style="list-style-type: none"> <li>▪ Adopt guidelines on green building in conjunction with the National Building Regulations and Building Standards to ensure that buildings are properly oriented to improve thermal efficiency. (Promote energy efficiency)</li> </ul>
Local Economic Development	<ul style="list-style-type: none"> <li>▪ The LED Strategy of the municipality should include mechanisms for climate change adaptation</li> <li>▪ Improve resource allocation for climate change adaptation and adaptive capacity and mitigation measures.</li> </ul>
Water and sanitation	<ul style="list-style-type: none"> <li>▪ Implement loss/leakage reduction strategies through water conservation projects, to reduce water wastage, soil erosion and storm water drainage blockage.</li> <li>▪ Include climate change considerations into water and sanitation related strategies and planning.</li> </ul>
Storm water and roads	<ul style="list-style-type: none"> <li>▪ Develop strategy to stop sewage leakages, as it is harmful to the environment and eventually contributes to harsh climate conditions.</li> <li>▪ Incorporate climate change considerations into Storm Water Master Planning and include eco-mobility to be integrated into transport planning.</li> </ul>
Electricity and Energy	<ul style="list-style-type: none"> <li>▪ Include climate change considerations into energy and electrical infrastructure and master planning.</li> <li>▪ Develop and implement energy efficiency plans for municipal owned buildings.</li> </ul>

	<ul style="list-style-type: none"> <li>Develop and adopt by laws that promote renewable energy and energy efficiency.</li> </ul>
Disaster Management	<ul style="list-style-type: none"> <li>In Accordance with Disaster Management Amendment Act, 2015 local government should Undertake vulnerability assessment for their areas of jurisdiction.</li> <li>Disaster Management Plan should be updated to meet the requirements of the Disaster Management Amendment Act 2015</li> </ul>
Parks and Conservation	<ul style="list-style-type: none"> <li>Lekwa Local Municipality should develop and adopt open space plan to include all key ecological infrastructure for conservation and management</li> </ul>
Waste management	<ul style="list-style-type: none"> <li>Update the Integrated Waste Management Plan to promote the green waste economy</li> <li>Ensure compliance with the Promulgation of waste Act by reducing the amount of waste disposed to landfill (Waste minimization strategy)</li> <li>Clear illegal dumping</li> </ul>
Agriculture, Mining and Forestry	<ul style="list-style-type: none"> <li>Encourage green development in the municipality as part of greenhouse gas sink.</li> <li>Develop and adopt an agricultural development strategy that incorporates the impacts of climate change.</li> <li>Promote and encourage sustainable energy and water use and management practices</li> </ul>

**Table 41: Climate change response action**

### **Open Space Management**

Places earmarked for open spaces are reflected within the Spatial Development Framework. Open spaces are further regulated through the Land Use Scheme. The town planning division ensures that all open spaces remain as such. In the case of development encroaching an open space/ land invasion takes place on an open space, squatter controllers within the human settlements division are on the ground to enforce the by-law.

#### **Standerton**

The natural open space system in Standerton mostly consists of the following elements:

- The Vaal River entering Standerton from the east running southwards splitting Meyerville and the industrial area and passing by Sakhile Extension 4.
- Other streams flowing into the Vaal River
- Standerskop located within the urban boundary just north of Sakhile Proper, it is the only koppie in the area and forms a distinct landmark.
- Just north of Standerskop a Pan of water exists forming an ecological open space.
- Along with these natural open spaces, areas of environmental sensitivity and sports fields form part of the ecological corridor allowing fauna and flora to move across a wider territory within Standerton

#### **Morgenzon**

The natural open space system in Morgenzon mostly consist of the following elements:

- Local open spaces or parks, the railway reserve, and a tributary of the Osspruit running through Sivukile Extension 1 and along the western side of Sivukile Extension 3.
- All these open spaces play a different role, but is equally important.
- These open spaces are vulnerable and once replaced with other land uses it loses a great deal of its ecological value.
- Natural open spaces should be protected against development and pollution, and ideally these natural open spaces should be linked to form a network creating environmental corridors for the migration of fauna and flora.
- The open space at the railway reserve next to Sivukile and the area next to Sivukile Extension 3 are threatened by informal settlements. These informal settlements should be relocated on vacant land within Sivukile, Sivukile Extension 1 and Sivukile Extension 4 or should be settled in the proposed Agri-Village

### **Thuthukani**

The natural open space system in Thuthukani mostly consist of the following elements:

- Three sites zoned for public open space
- Natural open spaces traversing Thuthukani Proper
- An area of environmental sensitivity dividing Thuthukani and Thuthukani Extension 1.
- Sports fields

### **Mpumalanga Biodiversity Sector Plan**

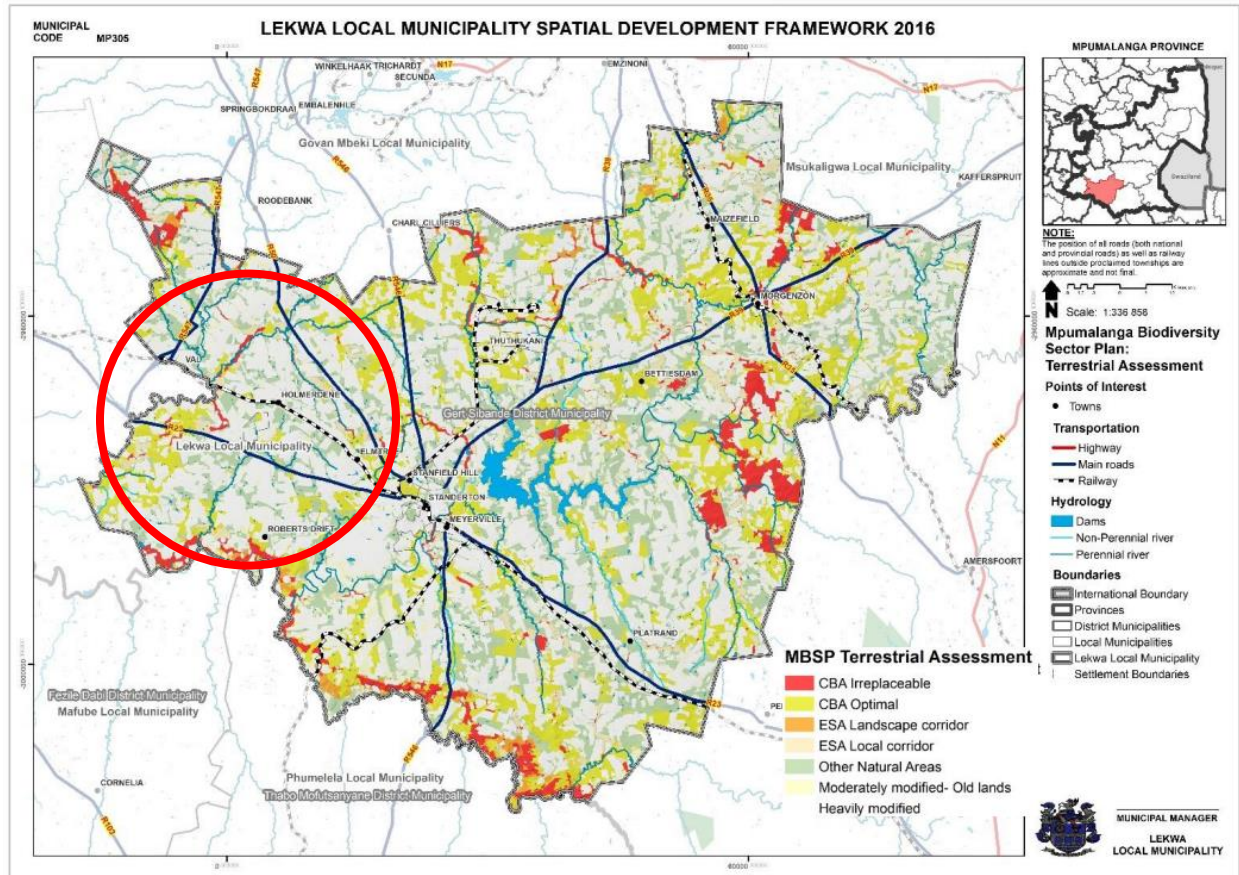

---

The municipality does not have a biodiversity plan and is yet to establish a biodiversity budget. However, the Mpumalanga Biodiversity Sector Plan refers to Lekwa LM. The Mpumalanga Biodiversity Sector Plan (MBSP) terrestrial assessment is based on a systematic biodiversity planning approach to identify spatial priority areas that meet both national and provincial targets in the most efficient way possible, while trying to avoid conflict with other land-uses. It actively tries to build-in landscape resilience to a changing climate. These spatial priorities are used to inform sustainable development within Mpumalanga.

The MBSP terrestrial assessment is meant to serve as an important land-use decision support tool, and the foundation for the development of any Bioregional plans within Mpumalanga. The broad categories recognized are: Protected Areas (PA), Critical Biodiversity Areas (CBAs), Ecological Support Areas (ESAs), Other Natural Areas (ONA), and Modified Areas.

The largest part of the Lekwa LM is defined by the Mpumalanga Biodiversity Sector Plan as heavily or moderately modified (55.33% of the municipality) as illustrated in the map it can be assumed that these areas represent all the cultivated agricultural fields and urban built-up areas in the municipality. This is followed by critical biodiversity (CBAs) covering 21.76% of the municipality and ecological support areas (ESAs) covering 4.38% of the municipality and other natural areas covering 18.54% of the municipal area. There are no protected areas within the municipality.

Map 20: Mpumalanga Biodiversity Sector Plan: Terrestrial Assessment

Table 23: MBSP Terrestrial Assessment

MBSP Terrestrial Assessment	Hectare	% of the Municipality
<b>CBA Irreplaceable</b>	20897	4.56%
<b>CBA Optimal</b>	78858	17.20%
<b>ESA Landscape corridor</b>	4470	0.97%
<b>ESA Local corridor</b>	15593	3.40%
<b>Heavily modified</b>	207205	45.19%
<b>Moderately modified- Old lands</b>	46513	10.14%
<b>Other Natural Areas</b>	85003	18.54%

Source: (MTPA, 2014)

### Implications for land use management

#### Critical Biodiversity Areas (CBA's)

- o Further development highly discouraged
- o Maintain in a natural or near-natural state with no loss of natural habitat.

### Ecological Support Areas (ESA's)

- Areas that are the ideal or best option to support existing biodiversity.
- Should be considered within further development.
- As far as possible maintain ecological functionality in support of biodiversity and connectivity by retaining existing natural vegetation.

### Environmental Impact Assessments

---

The Lekwa LM SPLUM by-law indicates that applications lodging any land use application should indicate the environmental implications of the proposed land development. The by-law further highlights that an applicant must indicate whether an application must be made for environmental authorization in terms of the National Environmental Management Act (Act 107 of 1998). To this effect, certain applications due contain EIA studies as mandated by the by-law.

#### **Municipal projects triggering EIA**

- Township establishment of Morgenzon Extension 5
- Township establishment Extension 10 & 11
- Standerton mall development
- Township establishment Portion 11 and 4 Rooikoppen
- Regional cemeteries, Standerton, Thuthukani & Morgenzon
- Upgrade of Standerton and Morgenzon landfill site

### SAWIS reporting

---

The municipality is reporting manually and is yet to register on SAWIS as required by the National Environmental Management Waste Act.

## **4.8 STATUS QUO ASSESSMENT OF PUBLIC PARTICIPATION AND GOOD GOVERNANCE**

### **Public participation and good governance policy framework**

Public participation in local government is the core of democracy, and it is institutionalised through pieces of legislature. According to the Constitution of the Republic of South Africa section 152(e) one of the objects of local government is "to encourage the involvement of communities and community organisations in the matters of local government" and sections 195 (e) states that "People's needs must be responded to, and the public must be encouraged to participate in policy-making". Municipal systems act 32 of 2000 section 16 (1) (a) states that "A municipality must develop a culture of municipal governance that complements formal representative government with a system of participatory governance, and must for this purpose- (a) encourage, and create conditions for, the local community to participate in the affairs of the municipality". According to Municipal structures act 117 of 1998 section 19 (3) "A municipal council must develop mechanisms to consult the community and community organisations in performing its functions and exercising its powers". These three pieces of legislation govern public participation in local government, and

a broader view of community participation the Legislation on Local Government set clear mechanism for the establishment of the Ward Committees as a structure to liaise with the Municipalities.

Municipalities are obliged to develop lasting and successful models by ensuring that participation takes place through these established structures and as are institutionalised. They are a creation of legislation, the Municipal Structures Act, giving effect to the Constitution of the South Africa. Its role is to facilitate participatory democracy, disseminate information; help rebuild partnership for better service delivery, and assist with problems experienced by the people at Ward level. To let participatory democracy work, Lekwa Municipality allocated for the budget.

### **Audit committee and internal audit committee**

Section 166 of the MFMA, Act No 56 of 2003 requires from the Audit Committee amongst other matters:

"To advise the Municipal Council, Political office bearers, the accounting officer and management staff on matters relating to:

- Performance management and evaluation,
- Internal financial control and internal audits.
- Risk Management.
- Accounting policies.
- The adequacy, reliability and accuracy of financial reporting and information.
- Effective governance
- Compliance with MFMA, DORA and any other applicable legislation."

The Internal Audit Unit operates in terms of a three-year risk-based rolling audit plan as well as an annual operational plan. These plans are based on the risk exposure of the municipality. Part of the function of Internal Audit is to evaluate whether the audit recovery plan based on the management report of the Auditor General, are implemented by management. The findings of Internal Audit as well as the comments from management are tabled to the Audit Committee on a quarterly basis.

The Audit Committee usually make the following most important recommendations to Council:

To ensure a better audit outcome:

- The financial statements to be provided to the Audit Committee in advance for the review.
- No leave to be taken by officials in management positions.
- Better communication channels between the office of the AG and the municipal officials.
- Efficient monitoring of the audit recovery plan by Council, Audit Committee and management.
- Implementation of the recommendations by Internal Audit as the AG made the same findings.
- The data logger be purchased for updating of the asset register.
- The municipality must purchase a software program for compilation of financial statements.
- To ensure implementation of the findings and recommendations of Internal Audit, management must:
- Audit reports to be a KPI for performance measurements of Section 56 employees.

- Ensure that Internal Audit and Risk Management is a standing item on all meetings in the directorates.
- Implement disciplinary actions against managers who refuse to respond to audit queries or fail to address audit findings.
- Attend Audit Committee meetings when audit reports are discussed.
- The findings of Internal Audit regarding performance information are addressed by management.
- That the contractual stipulations of Section 56 be in line with the Performance regulations.
- That the expenditure regarding the music festival and the findings by Internal Audit are a great concern and that a legal process unfolds.
- All Section 71 reports must be submitted to the Audit Committee members.

### **Fraud and corruption prevention strategy**

Internal audit is responsible for assisting management in the prevention of fraud and corruption by examining and evaluating the adequacy and effectiveness of the system of internal control. The role of Internal Audit pertaining to fraud investigations refer to in paragraph 9 is the following:

- Assess the probable level of complicity in the fraud within the Council in order to protect information and evaluate the credibility of information provided.
- Determine the knowledge, skills and disciplines needed to effectively carry out the investigation.
- Co-ordinate the investigation with management, legal counsel, and other specialists as may be appropriate.
- Be aware of the rights of alleged perpetrators and personnel involved in the investigation.
- On conclusion of the investigation the internal auditors should determine whether controls need to be implemented or improved in order to reduce future vulnerability.

### **Lekwa LM risk management overview**

Risk Management Committee was established by the Municipality (Municipality) to assist the Municipal Manager to fulfil her/his Enterprise Risk Management (ERM) and control responsibilities in accordance with the requirements of the Municipal Finance Management Act (MFMA), 2003 and to assist Council regarding matters set out in this document. Purpose of Risk Management Committee:

- The Risk Committee will provide oversight of the risk management process.
- The Risk Committee will monitor the management of significant risks which may prevent the Municipality from meeting its objectives
- The Risk Committee will facilitate communication between all parties engaged in risk management activities.
- The Risk Committee will report to the Municipal Manager on the risk management work undertaken and the extent of any action taken by management to address areas identified for improvement

In terms of the Municipality Financial Management Act, act no 56 of 2003, Section 62(1)(c) of the MFMA, states that the Accounting Officer must ensure that the municipality has and maintain an effective, efficient and transparent systems of risk management. In compliance to this requirement the Municipal Manager has appointed a Risk Management, Anti-Fraud, Anti-corruption Committee (RMAFACC) to advise the Lekwa Local Municipality on risks that can affect the achievement of Strategic (IDP) and Operational (SDBIP) objectives for the Municipality.

The Committee is constituted by the Head of Departments of the Municipality and chaired by an external independent Chairperson, the Provincial Treasury and Municipal District representatives are also invited to the meetings. The meetings sit four times per financial year and reports to the Municipal Manager, Audit Committee and Municipal Council quarterly on the progress made on Risk, Compliance and Fraud Management. Departmental representatives are appointed to assume the responsibility of being "Gate keepers" for the implementation of risk management, compliance and fraud management activities in their respective departments. Risk management champions hold their meetings chaired by the Chief Risk Officer and report quarterly to the Management and RMAFACC.

Based on the constitutional mandate of the Municipality and the applicable regulation requirements, the following type of risk are identified, analysed and evaluated, monitored, reviewed and reported to relevant oversight committees on quarterly basis.

- Risk management process
- Fraud and Corruption prevention process
- Compliance Management process
- Business Continuity Management process
- On best practise in remedial and intervention actions
- Covid-19 Pandemic Prevention and Combating

Risk management process is comprehensive as it should be, meetings are held as per the schedule and the effectiveness of the Committee is evaluated against predetermined objectives of risk management. This concludes that the risk management initiative implemented in the Municipality is at a matured level as far as best practises in Risk Management is concerned.

### **Public Participation Strategy**

---

The municipality approved a Draft Public Participation Strategy in the 2022/23. The strategy aims to ensure that the gap between the municipality and community is reduced. The plan also attempts to assist elected representatives to know and understand the views, needs and aspirations of their constituency whenever they are making decisions on their behalf. Furthermore, the plan assists the municipality to illicit participation of the public during programme and project planning and development as well as implementation to strengthen the relationship between the municipality and its community, sector government departments as well as neighbouring municipalities.

The municipality has developed affordable and efficient communication systems to communicate regularly with communities and disseminate urgent information. The basic measures to be monitored include:

- The functionality of Ward committees;
- Full functionality of war rooms in all wards;
- The number of effective public participation programmes conducted by Councils;
- Sittings of public meetings as per legislation requirement;
- The regularity of community satisfaction surveys.

### Defining the “public” in the case of Lekwa Local municipality

It is for the purposes of this plan that the following is considered as the public whose participation is sought:

- Community interest organizations
- The business community
- Community members of the municipal area in general
- The youth of Lekwa
- The women of Lekwa
- The man of Lekwa
- The people living with disabilities
- The Elderly people
- The children
- The Pastors organisations

### Means of communicating with communities

- Meetings
- Established structures in the wards
- Hailing
- Community Radio
- WhatsApp group,
- Bulk SMS,
- Notices
- Facebook
- Flyers

### The scope of public participation

The following issues are prioritized for public participation in this municipality: 1. Annual planning processes (IDP review) 2. Annual budgeting processes (Budget review) 3. Performance management system 4. Policies and By-laws development and implementation 5. Project planning, implementation and monitoring. 6. Long term strategic planning for the municipal area

## **Complaints Management**

---

The municipality procured a complaints management system through MunSoft when the institution was placed under administration in 2019. Trainings were provided from November 2021 and 2023 for document management and customer care was one of the modules provided. However, to date, complaint management is not yet automated due to unreliable internet connection and a proper telephone system. A service provides has been appointed and is currently busy with installing internet and a telephone system. The municipality has customer care system (DMS) procured in 2019, however complaints management still operates manually. The municipality keeps a book to record all complaints received which are then referred to the relevant department through the call centre.

## Organizational Structure

Unit	Number of Posts	Number of Posts Filled	Number of Posts Vacant	Vacancy Rate
Risk Management	3	2	1	33%
Performance Management	3	2	1	33%
Internal Audit	4	3	1	25%
Office of the Speaker & Public Participation	8	5	3	38%
Office of the Executive Mayor	7	7	0	0%
Office of the Whip of Council	1	1	0	0%
<b>Department Totals</b>	<b>26</b>	<b>20</b>	<b>6</b>	<b>23.1%</b>

## IGR matters

The communications and IGR units coordinate the local government communications forum (IGCF) meetings on a monthly basis but the municipality does not have none.

The IGCF was launched and chaired by the speaker of municipality

- All government departments, parastatals (Eskom, Telkom, and SA Post Office) and non-governmental organizations to attend the monthly meeting. The meetings serve as a platform for NGOs and government common programmes that are aimed of improving service delivery at all levels of government
- The manager of communications and IGR to attend all district communication forum (DCF) quarterly meetings.
- The communications and units to do all the marketing for the public participation processes for the IDP, budget, imbizo and all municipal events. Marketing tools that are used by the municipality's internal and external be used for this purpose

## Gender development

Lekwa Municipality is taking the issue of gender seriously. Gender refers to the socially determined and evaluated identities and roles of men and women, and is usually distinguished from their biological or sex differences. Gender equality, gender and women's empowerment are thus the outcomes of effective gender mainstreaming and interventions.

This shows that Lekwa is affording women and men the equal opportunities and benefits to develop their full human potential and meet development needs. This implies that everyone in Lekwa is equal before the law and may not be discriminated against based on gender, sex, disability, age, and marital status. The Constitution espouses substantive equality for women and men in social political and economic life. Human Rights: Women's rights are human rights as enshrined in the Bill of Rights. Customary, cultural, and religious practices are subject to the right to equality.

All persons have the right to enjoy and practice religious and cultural beliefs. However, these practices should not discriminate based on gender. Empowerment of women refers to the capacity of women to access and control economic resources and makes decision for improving their quality-of-life Entitlement to the right of integrity and security of person. Consideration in Lekwa is given to selection and recruitment policy targets for ensuring equal participation of decision making.

To this effect, the Lekwa Local Municipality held a Gender Based Violence on the 8<sup>th</sup> of December 2022 to raise awareness on the matter. More GBV related projects are planned by the Wellness office.

### **Persons with disability**

---

The municipality is in support of programmes aimed at person with disabilities such as:

- Promote and project rights of persons with disabilities with special focus on children
- Increase capacity in protective workshops to ensure sustainability and economic participation in partnership with other stakeholders.

### **Youth Development**

---

The municipality is in support of programmes aimed at Youth development;

- Facilitation of social change and activation of youth through a basket of service in youth centers - linking them with relevant stakeholders
- Facilitation of sustainable economic activities for the youth in CRDP sites in collaboration with NYDA, NDA, DRDLR, DARDLA and DEDET

### **Oversight committees**

---

The oversight role of Council is an important component of the financial reforms and it is achieved through the separation of roles and responsibilities between Council, the Executive (Mayor and Executive Committee) and administration. Good governance, effective accountability and oversight can only be achieved if there is a clear distinction between the functions performed by the different role players.

Non-executive Councillors are required to maintain oversight on the performance of specific responsibilities and delegated powers that they have given to the (Mayor). In other words, in exchange for the powers in which Council have delegated to the Executive, Council retains a monitoring and oversight role ensuring that there is accountability for the performance or non-performance of the municipality. The Municipal Finance Management Act (MFMA) vests in Council specific powers of approval and oversight.

- Approval of budgets
- Approval of Budget related Policies
- Review of the Annual Report and adoption of the Oversight Report

### **Municipal public accounts committees**

---

Lekwa Municipality has a fully functional and established Municipal Public Accounts Committee, referred to as the Municipal SCOPA. Considering there is a need for enhanced financial management oversight capacity, it is therefore recommended that an oversight committee is established with functions similar to a MPAC within municipality. The MPAC report directly to Council through the Speaker as any other form of reporting line will compromise the committee's independence, authority, and integrity.

## 4.9 STATUS QUO ASSESSMENT OF MUNICIPAL TRANSFORMATION AND INSTITUTIONAL DEVELOPMENT

### Municipal transformation and institutional development policy framework

The Department draws its mandate from the following legislation:

- Section 152 & 153 of the Constitution of the Republic of South Africa
- Chapter 4,5,7, & 8 of the Municipal Systems Act 32 of 2000
- The Local Government Structures Act
- Labour Relations Act, 66 of 1995
- Employment Equity Act, 55 of 1998
- Skills Development Act, 97 of 1998
- Occupational Health and Safety Act. 85 of 1993
- National Archives Act, 43 of 1996
- SALGBC Collective Agreements
- Promotion of Access to Information Act, 2 of 2000
- Intergovernmental Framework Act, 13 of 2005
- Municipal Service Standards
- Batho – Pele principles

### Organizational structure

DIVISION	NUMBER OF POSITIONS	TOTAL FILLED	NUMBER OF POSITIONS VACANT	VACANCY RATE
Information Communication Technology	6	3	3	50%
Human Resources	16	6	10	63%
Legal Services	3	2	1	33%
Customer Care	13	5	8	62%
Secretariat	41	27	14	34%
Communications	5	1	4	80%
<b>Total positions</b>	<b>84</b>	<b>44</b>	<b>40</b>	<b>48%</b>

## Recommendations

- Filling of vacant funded positions
- Adherence to the approved Council schedule
- Approval of litigation strategy and contract management policy
- Ensure that Customer Care is incorporated in the IDP, budget and functional
- Organogram aligned with IDP and SDBIP and financial recovery plan
- That budget provision be made for ICT infrastructure
- Ensure compliance with Covid-19 regulations

## Status Quo of Policies, by-laws, and plans

No.	Name of Policy	Status	Financial Year
<b>KPA 1: BASIC SERVICE DELIVERY AND INFRASTRUCTURE DEVELOPMENT</b>			
1.	Draft Integrated Waste Management Plan	Approved	2022/23
2.	Draft Lekwa Cemetery By-law	Approved	2022/23
3.	Draft Traffic By-Law	Approved	2022/23
4.	Draft Waste Management Bylaw	Approved	2022/23
5.	Service Standards and Service Charter	Approved	2022/23
<b>KPA 2: MUNICIPAL TRANSFORMATION AND INSTITUTIONAL DEVELOPMENT</b>			
6.	Acting Appointment Policy	Approved – To be reviewed to align and amended to align with Municipal Staff Regulations	2022/23
7.	Affirmative Action	Forms part of the Employment Equity Policy	--
8.	Annual Leave Policy	Approved	2018/19
9.	Attendance and Punctuality Policy	To be reviewed	2018/19
10.	Backup and Recovery Policy	Approved	2021/22
11.	Bereavement Policy	To be reviewed	2018/19
12.	Bursary Policy for Employees of Council	To be reviewed to align with Municipal Staff Regulations	2018/19
13.	Bursary Policy for External Candidates	To be reviewed	2018/19
14.	Cellphone Policy	Approved	2021/22
15.	Change Management Policy	Approved	2021/22

## 4.10 STATUS QUO OF OFFICE OF THE MUNICIPAL MANAGER

### Office of the Municipal Manager Policy framework

Section 152 of the Constitution of the Republic of South Africa outlines the objects of local government as follows;

- To provide democratic and accountable government for local communities;
- To ensure the provision of services to communities in a sustainable manner;
- To promote social and economic development;
- To promote a safe and healthy environment; and
- To encourage

### Powers and functions

As head of administration the municipal manager of a municipality is, subject to the policy directions of the municipal council, responsible and accountable for:

- The formation and development of an economical, effective, efficient, and accountable administration-
- Equipped to carry out the task of implementing the municipality's integrated development plan in accordance with Chapter 5;
- Operating in accordance with the municipality's performance management system in accordance with Chapter 6; and
- Responsive to the needs of the local community to participate in the affairs of the municipality;
- The management of the municipality's administration in accordance with this Act and other legislation applicable to the municipality
- The implementation of the municipality's integrated development plan, and the monitoring of progress with implementation of the plan
- The management of the provision of services to the local community in a sustainable and equitable manner;
- The appointment of staff other than those referred to in section 56 (a), subject to the Employment Equity Act, 1998 (Act 55 of 1998);

#### Functions

- Manage technical services.
- Manage social development services.
- Coordinate municipal planning.
- Manage financial matters.
- Render corporate services.
- Manage internal audit and risk management service

#### Organizational structure

Unit	Number of Posts	Number of Posts Filled	Number of Posts Vacant	Vacancy Rate
Risk Management	3	2	1	33%
Performance Management	3	2	1	33%
Internal Audit	4	3	1	25%

## 4.11 STATUS QUO ASSESSMENT OF FINANCIAL VIABILITY AND MANAGEMENT

### Financial viability policy framework

- Constitution
- Municipal Finance Management Act
- Municipal Systems Act
- Municipal Property Rates Act
- Division of Revenue Act
- Municipal Structures Act
- Municipal Budgets and Reporting regulations
- Supply Chain Management Regulations
- Risk Management Framework, National Treasury
- Financial Management Capability Maturity Model, Office of the Accountant General – Model
- Treasury Regulations
- MFMA circulars
- GRAP – Accounting Standards
- Protection Of Personal Information Act

### Functions

- Manage municipal budget and financial reporting.
- Render revenue management services.
- Manage expenditure services.
- Render supply chain management services.
- Manage municipal assets

### Organizational structure

## Recommendations

- Investment in infrastructure
- Identification of land for disposal
- Employee retention & incentives strategy
- Cascading of PMS to level below HODs
- Implementation of the revenue enhancement strategy
- Centralisation of SCM
- Rapid implementation of FRP & Long-Term Financial Plan

## 4.12 COMMUNITY CONSULTATION

### Methodology

Lekwa Local Municipality embarked on an all-inclusive and thorough public participation programme with its local community members in the process of reviewing the five-year 2022/27 IDP for the 2023/24 financial year. The public participation primarily focused on community engagements through physical meetings across all fifteen (15) wards. The Executive Mayor, councillors, Municipal Manager, Heads of Departments and Divisional Managers attended the various meetings. The meetings took place in the months of November and December 2022 and April/May 2023. The municipality used a hailing system to notify residents of the consultations. In addition, the schedule of meetings was published on the municipality's social media page.

### Attendance And Participation Rate

According to attendance registers populated during consultations, the meetings are attended by the elderly and youth. Consultations are mainly attended by the African population as the wards are dominated by African groups.

Ward	Number of Attendees during Consultation 1 – Situational Analysis Phase	Number of Attendees during Consultation 2 – Draft IDP Consultation
Ward 1	111	99
Ward 2	89	76
Ward 3	58	100
Ward 4	39	33
Ward 5	130	Not achieved – no attendance register
Ward 6	95	124
Ward 7	80	123
Ward 8	48	36
Ward 9 Ext.8	120	143
Ward 9 Rural	28	76
Ward 10 Town	8	32
Ward 10 Voda	125	98
Ward 11	230	206
Ward 12	133	51
Ward 13	26	97
Ward 14	82	Not achieved – no attendance register
Ward 15	139	141

### Performance Report

The table below reflects the performance of Lekwa LM in implementing its IDP consultation programme. All fifteen wards were consulted. Challenges encountered were addressed through rescheduling sessions.

#### Consultations during situational analysis phase

Ward	Date	Venue and Time	Achieved / Not achieved
1	08/11/2022	Social Centre/17:00 pm	Achieved
2	09/11/2022	Social Centre/17:00 pm	Achieved
3	10/11/2022	Stanwest Hall/ 17:00 pm	Achieved
4	14/12/2022	Azalea Community Hall/17:00 pm	Achieved

10	22/05/2023	Ext.6 Community Hall	Achieved
11	03/05/2023	Rooikoppen Hall/ 17:00 pm	Achieved

12	07/05/2023	Thuthukani Hall/10:00 am	Achieved
13	23/04/20023	Qondulwazi Secondary School School//10:00 am	Achieved
14	23/05/2023	Sivukile Community Hall/17:00 pm	Not Achieved
15	23/05/2023	Community Hall Ward 15/:17:00	Achieved

### Community Issues

The table below indicates all community issues raised during consultations per ward. The issues are categorised into service delivery category. The issues will be utilised to formulate the situational analysis and will determine priorities, projects and budgets. The issues will also assist the municipality in determining the type of assistance to request through the district development model.

#### Ranking scale

<b>Critical</b>
<b>High</b>
<b>Medium</b>
<b>Low</b>

## 2023/24 Critical ward priority issues as prioritised per ward

Community issue		Problem description (Extent of the problem)	Affected Ward	Proposed Intervention	Responsible Department
<b>KPA: BASIC SERVICE DELIVERY AND INFRASTRUCTURE</b>					
<b>Water</b>	Access to water	No water for long periods of time, years, months etc. in various areas	1, 2, 3, 4, 7, 8, 9 (Ext8), 10 (Voda), 11, 12, 13, 15	Upgrade water infrastructure	Technical Services
		Interrupted water supply during power outage/ loadshedding.	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 15	Procure backup generator for water pumps. Explore solar for backup generator	
		Alternative water sources in informal settlements and rural wards	7, 11, 13, 15,	Provide electric pumps for windmills. Drill boreholes deeper. Provide jojo tanks at informal settlements	
		High laying areas in the municipality do not get water supply. These areas used to have water in the past. No water in certain farms	4, 5, 11, 9	Water pressure pumps for high laying areas Construct satellite water plant	
<b>Electricity</b>	Unclean water	Water from the tap is unclean (muddy).	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 13, 14, 15	Clean water and continue with lab testing services offered by GSDM	
	Water trucks	Water trucks do not deliver water to all residents equally. Water from the trucks also unclean.	1, 2, 3, 4, 5, 6, 7, 9 (Ext8), 10 (Voda), 15	Monitor water trucks to ensure that residents receive water equally	
	Smart Meters	Clarity/ consultation on the installation of smart meters	1, 2, 3, 4, 6, 7, 8, 9, 10, 11, 13, 15,	Provide information on smart meters	
	Interrupted power supply/ Internal loadshedding	Electricity is not switched back on equally for all sections after loadshedding.	1, 2, 5	Upgrade electrical power infrastructure	
		Non – functional high mast and street lights. (Increased crime)	2, 4, 5, 6, 7, 8, 9, 11, 12, 15	Provide high-mast and street lights	
		Some households do not have access to electricity.	4, 7, 9 (Ext 8 & Holm), 12, 13	Connect electricity from powerlines to houses without	

Sanitation	Sewer spillages	Provision and maintenance of toilets.	9, 3 (Stanwest Hall), 7, 12, 13	Provide toilets for dwelling units without	
		Toilets are full and need to be desludged.	9, 11, 6 Slovo, 9, 10, 12, 13, 14	Procure equipment and machinery needed to desludge toilets. Have a schedule similar to the refuse removal schedule.	
		Sewer spillages overflow into streets. Pollution of streets and complaints of smells.	1, 2, 3, 4, 6, 9 (ext. 08), 10 (Town) 11, 14, 15	Upgrade sewage pipes and treatment plant	
		Sewer pipes were installed but never functional	1, 6	Install sewer pipes that were left unattended	
Roads and stormwater	Gravelling and paving of roads	Gravel and pave streets. Streets are muddy when it rains, preventing cars from accessing. Ambulances, taxis, and other emergency vehicles cannot access houses when it rains. Taxis refuse to fetch people with the bad road conditions.	1, 2, 4, 7, 9, 10 (Voda), 12, 13, 15	Pave and gravel roads frequently.	Technical Services
	Fix potholes	Many internal tar roads have potholes; only main roads are being fixed e.g. Hlongwane Drive.	1, 2, 3, 4, 5, 6, 7, 8, 9, 11, 12, 13, 14, 15	Fix potholes for both internal and main roads	
	Stormwater drainages and management	Houses and streets are flooding due to no stormwater drainages. Some areas had trenches dug to channel runoff water, however these have closed due to dirt and illegal dumping.	1, 3, 4, 5, 6, 7, 8, 9 (ext. 8), 10, 11, 12, 14, 15	Provide stormwater drainages. Unclog blocked drainages and maintain stormwater drainages.	
	Road signages and traffic calming measures	No traffic calming measures on high order roads such as Hlongwane Drive. Puts road users at risk for accidents as there are no signs or measures to stop people from speeding.	1, 3, 5, 11, 13, 15,	Provide road signages and traffic calming measures such as speed humps on high order roads	

Waste	Waste removal	Illegal dumping sites	1, 2, 3, 4, 5, 7, 9, 10 (Town), 11, 14, 15	Develop and implement by-laws to penalise illegal dumping. Ensure that waste is collected and provide skipper bins at communal spots	Community Services
		Frequent waste collection	1, 3, 4, 5, 6, 7, 8, 9 (ext. 08), 10, 11, 12, 15	Notify residents when waste will not be collected	
KPA: LOCAL ECONOMIC DEVELOPMENT					
Employment	High unemployment rate	Employment opportunities for local people. Locals should benefit from projects. Corporations around Standerton should give first preference to locals especially for work that does not require specialised skills.	1,2,3,5,6,7,8,9,10,11, 12,13,14,15	Explore ways to create a conducive environment for job creation, to attract investment and encourage local economic development	Planning and Economic Development
SMME Support	Subcontract SMMEs	Subcontract SMMEs in the projects	1, 2, 12, 9 (Holm), 10	Explore ways to subcontract SMMEs in local projects	
	Skills development for SMMEs	Provision of SMME trainings	2, 7,	Provide SMMEs with training to capacitate companies	
	Funding and support for businesses	Support is mainly given to business, NPOs are neglected. Some races are not notified of opportunities.	1,4,9,10,11,14	Open up support to different entities and all population groups in all wards	
KPA: SPATIAL RATIONAL					
Housing	RDP houses	Many community members registered for RDP houses a long time ago but no houses were constructed.	1, 2, 3, 4, 5, 6, 7, 9, 10, 11, 12, 13, 14, 15	Liaise with the Department of Human Settlements and acquire land	Planning and Economic Development
	Title deeds	Residents request title deeds as they cannot transfer properties, borrow against their houses etc.	1, 2, 3, 4, 5, 7, 9 (ext. 8),12, 13	Finalize the appointment of lawyers to assist with title deeds. Open up township registers and proclaim townships.	

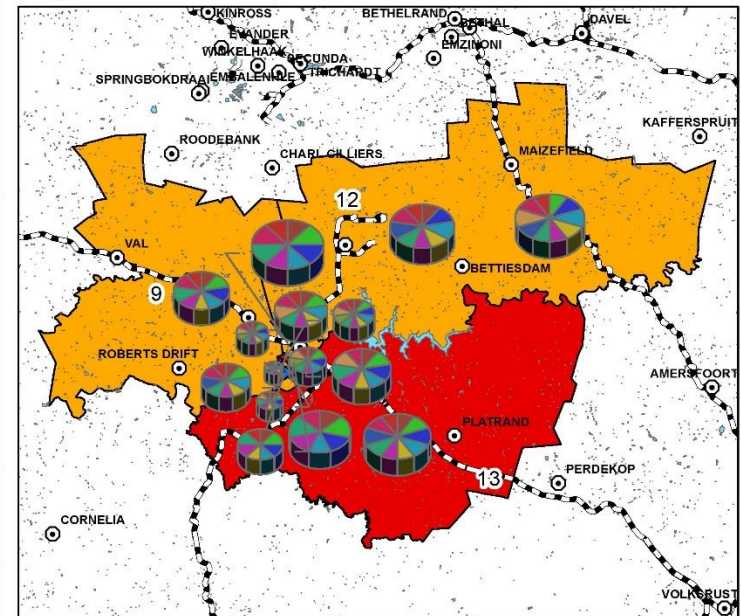

Vacant sites	Sites for development	Most RDP beneficiaries demolish RDPs and build their own houses. There is a need for serviced stands for people to build their own houses.	1, 3,4, 7,12,13,14	Township establishment (Subdivision) and acquire land. Liaise with sector departments to assist with servicing sites.	
Informal settlement	Upgrade/ Formalization of Informal Settlements	Some residents live in informal settlements without basic services. Mostly affected by floods and the inability of emergency vehicles to gain entry during emergencies.	2,3,4,5, 7, 10 (Voda), 11	Relocate households living in areas not suitable. Provide basic services and formalize suitable areas.	
KPA: FINANCIAL VIABILITY AND MANAGEMENT					
Billing	Incorrect billing	Residents are billed incorrectly. In some instances, residential sites are billed the same amount as business sites. Error in the system	1,2,4, 8, 10, 14, 15	Procure and integrate finance and spatial software to bill residents correctly	BTO
	Meter readers	Some households do not have meters making it difficult to get accurate readings.	1,4, 5, 11	Installation of functional meters and hire meter readers	BTO
	Amnesty for accounts	Some residents have municipal accounts in arrears and request the municipal to grant them amnesty.	1,2,8	Explore arrangements for residents to pay their municipal account debt	
KPA: GOOD GOVERNANCE AND PUBLIC PARTICIPATION					
Recreational	Inadequate recreational facilities	There are no recreational facilities for young people to keep busy. Existing parks are not maintained.	3, 10, 11,12, 13, 14, 15	Provide recreational facilities that accommodate various activities other than sporting codes such as soccer and netball.	Community and Corporate services
Social amenities	Inadequate social amenities	Schools	5,7,8,9,13	Liaise with sector departments on the possibility of constructing new schools, satellite police station and a rehabilitation centre for those struggling with addiction.	Sector Departments
		Mobile clinic	12, 13		
		Community Hall	4		
		Satellite police station	12		

		Rehabilitation centre	5		
<b>KPA: MUNICIPAL TRANSFORMATION AND INSTITUTIONAL DEVELOPMENT</b>					
<b>Communication</b>	Communication between residents and municipality	Communication between residents and the municipality: <ul style="list-style-type: none"> <li>- Hail to let the community know about water cuts.</li> <li>- Update the community on refuse removal schedule</li> <li>- Communicate the start and progress of projects 1,</li> </ul>	1, 2, 3, 4, 5, 6, 7, 8, 9, 12, 13, 14, 15	Explore other means to communicate with residents other than the Facebook page and municipal website as not all residents have access to these platforms.	Corporate Services

### 4.13 SWOT Analysis

STRENGTHS	WEAKNESSES
<ul style="list-style-type: none"> <li>• Recreational Facilities that can enhance revenue to the municipality e.g., River Park, Grootdraai dam.</li> <li>• New political leadership/Stability</li> <li>• Availability of information management system (Housing needs register/Mun soft, ArcGIS)</li> <li>• Availability of legislative policy LUS/SDFs</li> <li>• High youth rate – contributes to economy</li> <li>• Availability of regulatory frameworks (LED Strategy, Business licencing)</li> <li>• Functional Risk and Audit committee governance structures</li> <li>• Budget related policies</li> <li>• SDBP is approved</li> <li>• Adequate cash flow management</li> <li>• MFMA compliance</li> <li>• Revenue enhancement strategy</li> <li>• Litigation Management policy.</li> <li>• Presenting complex legal issues in easy-to-understand manner.</li> <li>• Quickly vetting of contracts whenever needed.</li> <li>• Effective public participation</li> <li>• Functional ward committees</li> <li>• Functional oversight committee</li> <li>• Customer Care System Procured</li> <li>• Customer Care Unit established</li> <li>• Cordial Working Relationship between the Employer and Employees (Based on the responses from the Employee Satisfaction Survey)</li> </ul>	<ul style="list-style-type: none"> <li>• Shortage of fleet and personnel to perform duties.</li> <li>• High level of vehicle and machinery breakdown.</li> <li>• Inadequate electronic operating system to assist in spatial planning</li> <li>• Non availability of land for development</li> <li>• Inadequate bulk infrastructure</li> <li>• Inadequate capacity (Human Resources)</li> <li>• Low population negatively affects economic growth</li> <li>• Undiversified township economy (Tuckshops)</li> <li>• Poor relationship with business communities</li> <li>• Influx of illegal migrants</li> <li>• Lack of regulatory framework to regulate informal business</li> <li>• Ineffective internal controls</li> <li>• Outdated BTO structure – No customer care unit</li> <li>• Poor implementation of policies &amp; strategies</li> <li>• High vacancy rates</li> <li>• Inadequate skill – Overall reliance of contracted services</li> <li>• Lack of career pathing and low staff morale</li> <li>• Inadequate performance agreement for personnel – PMS not cascaded</li> <li>• Inadequate Monitoring</li> <li>• Inadequate contract Management</li> <li>• Inability to pay Creditors on time</li> <li>• Tempering with electricity supply - metering</li> <li>• Inadequate control over expenditure – Capital &amp; Operations</li> <li>• Inadequate adherence to SCM process</li> <li>• By-laws on credit control &amp; debt collection not promulgated</li> <li>• Completeness and accuracy of billing information</li> <li>• Insufficient awareness of policies implemented – Activities</li> <li>• Inadequate consequence management</li> <li>• Poor spending of grants (Mandatory Grant)</li> <li>• Misplacement of Skills</li> <li>• Cascading of PMS to lower positions</li> <li>• Tools of trades shortage.</li> <li>• Lack of budget to implement all envisaged programs of youth, gender and disability</li> <li>• Lack of feedback report to Community</li> </ul>

	<ul style="list-style-type: none"> <li>• Lack of oversight for service delivery</li> </ul>
OPPORTUNITIES	THREATS
<ul style="list-style-type: none"> <li>• Collaborations and best practice benchmarking to improve organisational efficiency</li> <li>• Through communications unit to tap into building effective stakeholder relations and improve the image and reputation of the institution</li> <li>• Appoint company for smart metering – Increased revenue collection</li> <li>• Increased revenue through investment -</li> <li>• Extension of MPRA to levy property rates on Agriculture property &amp; Public Services Infrastructure</li> <li>• Better use of technology – Automated Reporting</li> <li>• Recycling initiatives – Paying for disposal of waste</li> <li>• Working relationship with other Stakeholders on Skills Development with GS College; Seriti and Sasol</li> <li>• Current State of Affairs in the Municipality – SETAs and Government Departments willing to support and assist the Municipality</li> <li>• Contract management policy implemented</li> <li>• Access to external funding for historically disadvantaged community development projects</li> <li>• Contract management policy implemented.</li> <li>• Access of external funding for historically disadvantaged community development projects</li> <li>• Economic Development</li> <li>• Natural resources (Grootdraai dam and Vaal River (Eco-tourism)</li> <li>• Availability of informal businesses contributes to economic growth</li> <li>• Strategic location of the municipality</li> <li>• Arable land for agriculture</li> <li>• Geographic location/ connectivity network (Roads and freight)</li> <li>• Economic Industries/drivers (Mining &amp; Agriculture)</li> <li>• Identified as growth point area by provincial SDF</li> <li>• Technology for efficiency in spatial planning</li> </ul>	<ul style="list-style-type: none"> <li>• Inability to effectively transition to an institution taking full advantage of 4IR</li> <li>• Cash flow constraints to effectively implement programmes</li> <li>• Disinvestment by private sector – Electricity &amp; Water Supply, unavailability of land</li> <li>• Difficulty in attracting best-qualified people – Competing with Seriti and Eskom (Artisans)</li> <li>• High Labour Turnover (Death, resignation)</li> <li>• Compliance on Regulation on appointment of staff</li> <li>• Resistance to change from all in the organisation</li> <li>• Disservice by Consultation forums (Non-sitting of HRD and OHS Committees</li> <li>• Customer Demand (High expectation from the Community – enhancement of service delivery to meet their demands)</li> <li>• Financial instability.</li> <li>• Lack of participation on matters of governance and lack of trust</li> <li>• Default on payment leading to disconnection of the Systems procured</li> <li>• Lack of resources at Technical Services to resolve the complaints reported.</li> <li>• New political leadership</li> <li>• Mismatch between skills base and economic sector demands</li> <li>• High level of unemployment</li> <li>• Mushrooming of informal businesses</li> <li>• Political instability and instigated land invasion</li> <li>• Coalition government/unstable</li> <li>• Poor Business relationship with business communities</li> <li>• Vandalism of technological infrastructure affects efficiency</li> </ul>

## 5.

**CHAPTER FIVE: DEVELOPMENT OF STRATEGIES****5.1 Vision**

"To be the leading, people centered municipality excelling in economic growth, development and governance"

Lekwa shall be the best achievable living space with the equally distributed infrastructure and service of the highest quality and standard, affording its people human development for a healthy and safe livelihood to live, work and play within a well-planned and sustainable environment.

**5.2 Mission**

They must be able to see:

- Transparent and accountable governance
- Accelerated customer focused affordable service delivery
- Creation of conducive environment for economic development and growth
- Sustainable infrastructural development and maintenance
- Enhance community participation in the affairs of the municipality
- To initiate ground breaking innovations in the way we conduct our business

**5.3 Corporate Values**

- Excellence
- Trustworthiness
- Timeous responsiveness
- Transparency
- Batho-Pele principles

**5.4 Strategic Goals**

- Revenue enhancement
- Revenue enhancement and Clean Audit outcome
- Improved access to water, sanitation, electricity, and waste removal
- Increased Economic growth
- Improved provision of transparent, accountable, effective, and efficient leadership.
- Improved organizational performance.
- Promoting spatial and environmental management

**5.5 Strategic Objectives**

- Generate 100% revenue
- Provision of basic services (water 100%, sanitation 100%, electricity 100%, waste 100% and roads 100%)
- Grow Local economy by 2-3%
- Enhance and strengthen Community Participation
- Reduce debt by 100%
- Provision of sustainable Integrated Human Settlements

- Ensure a financially viable and sustainable municipality
- Ensure participative, transparent, and accountable governance
- Facilitate a creation of a disaster ready communities
- Reduce unemployment rate by 5% over 5 years

## 5.6 Key Performance Areas

- Infrastructure Development and Service Delivery
- Municipal Transformation and Institutional Development
- Spatial Rationale and Local Economic Development
- Public Participation and Good Governance
- Financial viability

## 6.

## CHAPTER SIX: INTEGRATED HUMAN SETTLEMENTS CHAPTER

### 6.1 Housing Vision, Mission, and Development

#### MUNICIPAL VISION

**“Lekwa shall be an ultimate place for living a first-class life.**

*Lekwa shall be the best achievable living space with the equally distributed infrastructure and service of the highest quality and standard, affording its people human development for a healthy and safe livelihood to live, work and play within a well-planned and sustainable environment.”*

#### MISSION STATEMENT

“Lekwa Municipality exists to be a leading, people-centered, and responsive center of local governance that facilitates and provides sustainable infrastructural development and basic services whilst promoting socio-economic development for all the people of Lekwa through:

- A customer focused infrastructure development and service delivery.
- A transparent, accountable, effective, and efficient governance that enhances community participation in the municipal affairs.
- The promotion of human development to create a conducive environment for socioeconomic development and growth.
- The promotion of a spatial and environmental management.

It is evident from the Mission Statement that the municipality is focused on the promotion of human development to create a conducive environment for socio-economic development and growth.

The IDP further provides the following strategic objectives:

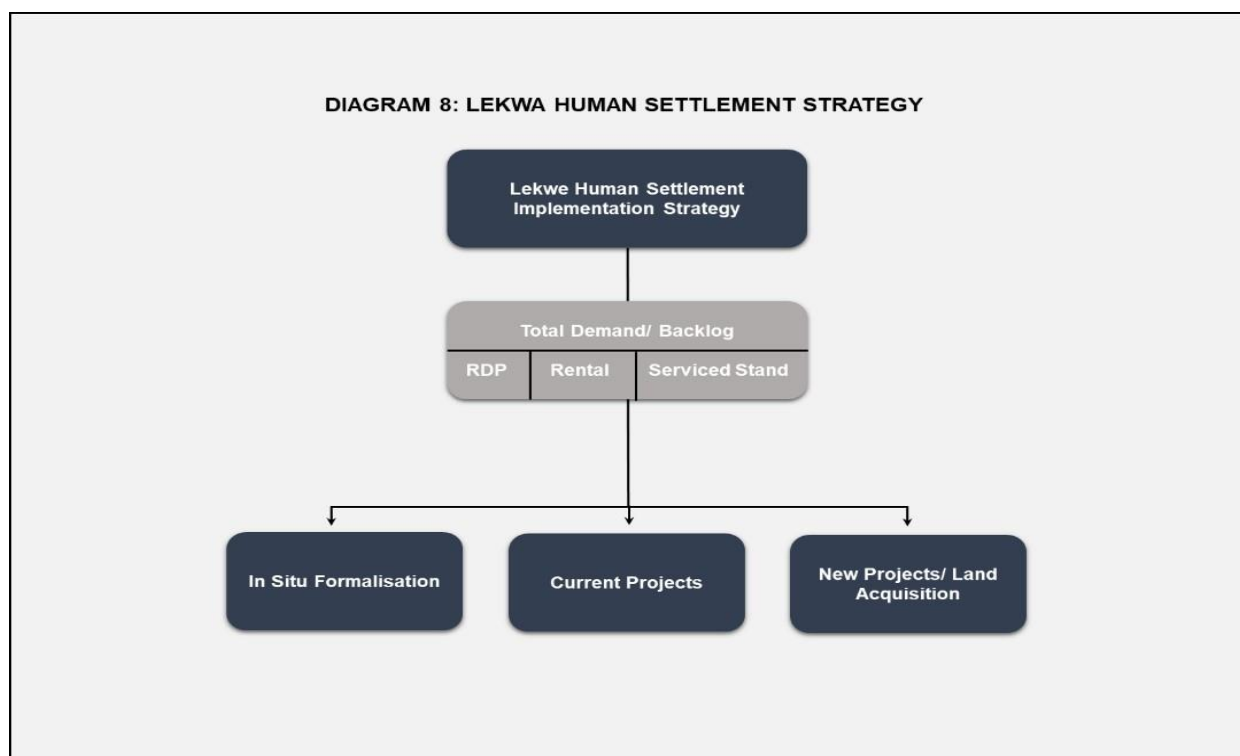

- Improved provision of all basic infrastructure and services;
- Improved provision of all social services and infrastructure;
- Ensure a sustainable working environment;
- Ensure a financially viable and sustainable municipality;
- Ensure participative, transparent, and accountable governance;
- Achieve a holistic human development and capacitation for the realization of skilled and employable workforce;
- Create employment opportunities;

- Realize a complete environmental protection;
- Facilitate a creation of a disaster ready community; and
- Ensure an integrated and aligned development planning.

The Lekwa LM IDP Housing Chapter must ensure these principles and contributions towards the achievement of the above.

## 6.2 Implementation Strategy

Diagram below illustrates the structure of the Lekwa Human Settlement Implementation Strategy. The strategy aims to deal with the total demand/backlog which totals 19,927 units up to 2035.

**Figure 40 Lekwa Human Settlements Strategy**

The strategy deals incrementally with the demand/backlog by firstly providing an overview of all the settlements earmarked for in-situ formalization (Section 5.2.1). The in-situ formalization strategy addresses a certain percentage of the total demand. The section also addresses the additional informal settlements identified.

### Informal settlement upgrading strategy

The National Upgrading Settlement Programme (NUSP) for the Lekwa Local Municipality was completed in September 2021. The main objective of the programme is to facilitate the structured in-situ upgrading of 13 informal settlements in the Municipality.

During the NUSP initiative detailed upgrading plans were compiled in order to determine the capacity of each settlement and the number of units to be relocated to receiving areas. Table below provides the breakdown of possible number of units that could be accommodated and the units that need to be relocated to a conclusive receiving area. 2,738 Units can possibly formalize in-situ, while 661 units need to be relocated in the long term and 266 units need to be relocated as a matter of urgency due to life threatening structures, i.e., flood lines, electrical servitudes, etc. Table 19 below also provides the budgeting and prioritization for the proposed upgrade of informal settlements. The budget provides an amount for interim services and an amount for permanent services.

### Lekwa LM Housing needs register

Lekwa LM Commissioned a survey to determine the housing needs within the Local Municipality. Table below outlines the results of the survey. Based on the survey data from (207 – 2021) a demand for 8,895 was determined with most respondents opting for a Greenfields own-a-house option.

	HH by area	Land to build on (Land or plot to build own dwelling)	Greenfield (own a house in this area)	House on own site (Other, please specify)	Total	%
1	AZALEA	8	37	4	49	1%

**Table 54 NUSP Strategy: Priorities**

Below is the strategy for the proposed relocation of the units that cannot be accommodated in-situ. The receiving area is Portions 2 and 11 of the farm Rooikoppen which is owned by the Municipality. The high number of units are structured in flood lines which are required for the relocation of units, and in certain areas the densities are too high for single residential erven which require relocation.

Map 25 Strategy for proposed relocation of units

Apart from the 13 settlements addressed through the NUSP initiative, 18 additional settlements were identified. Table below provides the strategy for the additional 18 settlements. The strategy proposed which settlements can be formulized in-situ, which must be relocated in the long term, immediate relocations (flood lines) and the settlements that require further investigation.

**Lekwa LM: Additional Strategy: Priority**

		DEMAND		STRATEGY						PRIORITY	
#		Existing Informal Units and Infill		In situ	Move later	Move immediately situated in flood line/servitude	Further investigation needed	Subtotal	Short	Medium	Long

88% of all vacant residential erven belongs to Lekwa LM

Available number of vacant erven: 1 901

Calculated potential number of units: 5 516

The third component to the human settlement strategy relates to the acquisition of land. The first step in this regard would be to conduct feasibility studies on various pockets of land at average cost of R650,000 each per area. Such feasibility assessment should cover the following aspects: Title Deed Search, Geotechnical Report, Engineering Services Report, Environmental Scan, and a Land Use (Existing Potential) Report.

Emphases should be placed on the availability of services and the administrative matters to procure the land. The ownership structure should be scrutinized to determine the complexity of obtaining buy-in from the owners to sell the land. This aspect is especially important for CPA owned land.

### Land acquisition

Priority	Property Description	Ownership	Responsibility	Cost
1	Part of Remainder of Ptn 21 of the farm Rooikoppen 408 IS	Siza Kancane Communal Prop Assoc	Mpumalanga	R 650,000.00
2	Portion 12 of the farm Rooikoppen 408 IS	Impumelelo Communal Prop Assoc	Mpumalanga	R 650,000.00
3	Portion 13 of the farm Rooikoppen 408 IS	Impumelelo Communal Prop Assoc	Mpumalanga	R 650,000.00
4	Remainder of Ptn 4 of the farm Rooikoppen 408 IS	Lekwa Local Municipality	Mpumalanga	R 650,000.00

**Table 58 Land acquisition**

### Consolidated strategy

**Table below** provides the overall strategy to address the informal settlements, the housing backlog, and the expected growth of the Municipality. The table is provided in three Sections. Section 1 represents the strategy for the 13 informal settlements that was planned through the NUSP initiative and the additional 18 settlements. Section 2 of the document addresses the housing backlog which was informed by the surveys undertaken by the Municipality. Section 3 addresses the expected population growth and subsequent demand for housing.

**Section 1:** The strategy for the first 11 settlements in Standerton and 2 in Morgenzon is addressed through the upgrading plans and SDA 1 has been earmarked to receive the Standerton surplus units that cannot be accommodated, and SDA 4 will serve as the receiving area for Morgenzon. Approximately 886 units will need to be relocated to SDA 1 from the 11 settlements and 321 units to SDA 4. The additional informal units in and around Standerton/ Sakhile can be partially formulated in-situ, while the remainder can be relocated to SDA 1. SDA 1 will still have a surplus of 6,844 units, following the relocation of the current informal settlements. SDA 4 will only have a surplus of 129 units, following the relocation of the existing informal units at Morgenzon/ Sivukile. Thuthukani has 35 informal units and 265 vacant erven. Clarity needs to be obtained if the vacant erven can be utilized for the accommodation of the current informal units.

**Section 2:** The housing backlog informed by the LM survey indicated a need for 8,895 housing opportunities in Standerton, Morgenzon and Thuthukani. The IDH Housing Chapter proposes that the existing vacant erven coupled with densification (rezoning/ subdivision, existing erven) be utilized for parts of the backlog. Sections of SDA 1, 2 and 4 can also be utilized to accommodate the backlog. Morgenzon is the only subplace area which has a deficient in terms of land/erven supply.

**Section 3:** The expected population growth for the next 15 years (2035) can be accommodated with the utilization of the remainder of SDA 1 and SDA 2. A small shortfall of 300 erven is at Morgenzon, however, it is anticipated that additional developments can take place in the next 15 years that should be able to address the need. The strategy further outlines that it may not be necessary to activate SDA 3 or any of the land acquisition (LA 1 – 4) in the short- to medium-term to address the human settlement challenges.

### Engineering services Demand: Water and sewer

The bulk engineering supply challenges need to be addressed in order to successfully develop the planned human settlement projects.

Resolving the bulk capacity will unlock several housing opportunities and other possible investment opportunities. The municipality drafted the budget for the remainder of the MTREF until 2025. Table 25 below provides an outline of the planned engineering services project.

### Planned engineering service upgrade

Project Name	MTREF_2023	MTREF_2024	MTREF_2025	Total MTREF	Responsible Department
Water Treatment Works: Upgrade Standerton water supply scheme	14 224 800	-	-	14 224 800	Water Services

**Table 64 Strategy summary**

Table below provides a summary of the possible supply at the vacant municipal owned properties, SDAs, and long-term land acquisitions.

**Supply summary.**

Supply	Units	Allocated	Surplus
--------	-------	-----------	---------

Potential on Vacant Land	5 583	5 271	312
Potential on SDA's	13 800	10 488	3 312
Potential on LA's	5 620	-	5 620
<b>TOTAL</b>	<b>25 003</b>	<b>15 759</b>	<b>9 244</b>

Table 65 Supply summary

## 5.1 Guidelines Towards Sustainability

The primary aim is to create integrated and functional settlements; characterized by a sustainable and expanding local economic base, providing for local job creation and entrepreneurial support, and where the needs of all residents are met in a safe, healthy, and sustainable environment.

Human settlements should thus be livable, satisfying more than just the basic needs of its residents, also addressing the degree to which the communities' and individual's needs for social amenity, well-being and health are being met. It is thus closely linked to the concept of quality of life, or the level of satisfaction experienced by the inhabitants.

Consequently, human settlement projects in Lekwa should be characterized by the following qualities:

- **Opportunity generation** – offer a range of economic, social, cultural, and recreational opportunities. Opportunity should be generated by the way the settlement is planned and designed.
- **Access** – the settlements should be characterized by equitable, easy, and convenient access to opportunities and facilities. Road layout and locations of facilities should ensure that facilities and urban opportunities are accessible by the greatest number of people – the road network should prioritize pedestrian movement and public transport.
- **Place-making** – the settlement should reflect an environment with a unique sense of place based on the nature of its natural and cultural setting, creating identifiable and memorable places.

### Development principles

The following development principles should guide the future development of human settlements in Lekwa LM:

- **Respecting the Site and Natural Setting**

Layout Plans and Urban Development Frameworks should respond and be sensitive to the natural features of the area as identified and demarcated. These include features like ridges; the natural drainage lines; the natural orientation of the site; and the density limits imposed by the geotechnical conditions of the site. These elements should be functionally incorporated into the structure of the township area to ensure that it is in harmony with its natural setting.

- **Enhancing Orientation and Place Making**

How a township is put together and how its functional parts relate to each other is important in helping people to find their way around and understand how the area works.

Legibility and a sense of orientation should be further improved by placement of landmark buildings or structures like vistas and concentrating land use activities like commercial, community and civic activities to allow constructive and functionally effective interaction between them.

Focal points positioned at the entrances to the area or at major transport interchanges, should serve to welcome people with a sense of arrival within the area.

Emphasizing the profile of nodes in the area through **physical form** such as height, density, landmarks and **activity patterns** like shopping, business and leisure will also help define the identity of the area.

- **Making Connections and Creating a Balanced Movement Network**

Development sustainability depends on the level of connectivity provided to surrounding communities and the regional economy. It implies accessibility, appropriate connections, availability of public transport and links to locations of desired activities within the area, but also to surrounding nodes of desired activities.

- **Local Connectivity**

On a local development scale, the street network within should be connected as it permits ease of movement. Connected or 'permeable' networks encourage walking and cycling and make places easier to navigate through. The proposed street network should be supplemented with a network of exclusive pedestrian walkways.

Streets give order and structure, their purpose is to facilitate communication, access, and transport, and help people know where they are, in relationship to the community and the larger region.

- **An Integrated Network of Streets**

Circulation of all movement should follow a clearly organized system of streets and open spaces comprising a comprehensive movement network, including:

- Regional Connectors;
- Local Connectors;
- Local Streets;
- Pedestrian and Non-Motorized Routes;
- Boulevards;
- Neighborhood Streets.

- **Pedestrian Prioritization**

Every successful street is one that invites leisurely, safe walking. Exclusive pedestrian and non-motorized routes should be developed to promote safety, access, and circulation to and

through the area. To encourage pedestrian and cycle friendly streets the following aspects need to be addressed:

- Make crossing points visually prominent;
- Minimize street widths at crossings;
- Introduce elements that reduce vehicle speeds and encourage walking and cycling.

- **Creating a Functional Nodal Network**

- **Nodal Network Characteristics**

Pedestrian proximity is the measure by which the nodal network within the entire urban structure should be determined.

- **Benefits of nodal concepts**

- A node represents a management tool that can accommodate change in development patterns, scale, or size;
- It is an urban building unit that ensures unique identity among communities in different geographic areas;
- It is an effective mechanism from which development and the proposed public transport network can cluster and focus around;
- It helps limit and concentrate infrastructure expenditure;
- Provide SMME development opportunities and LED support.

All basic daily needs, public amenities, transport access and recreation should be within a seven to-ten-minute walk or  $\pm$  750-800 m radius from any point within the area. Each local node should develop its own distinct character and predominant use and provide a spectrum of amenities:

- A mixture of plot sizes - smaller sites / finer grain should be located at the centre of nodes while large land parcels are to be located at the nodal edges;
- The most prominent 'public square' and community facilities should be positioned in or near the centre;
- Local shops, leisure and other social amenities with public transport stops should be positioned along primary routes serving the nodal areas;
- Parks and recreation areas should define the outer edges of such local nodal areas;
- Small parks, play grounds and squares should spread throughout surrounding residential areas.

- ❖ **Variety in Land Use**

Broadening the mixture and variety of land uses and activities increases choice which in turn implies an urban form that empowers - giving most residents more choices and greater accessibility to basic amenities without being dependent on vehicular transport.

The integration of housing with other urban activities is a powerful mechanism to enrich peoples living environment.

#### ❖ **Variety in Housing Typologies and Tenure Alternatives**

One of the points of departure to residential developments in Lekwa LM should be to include a variety of housing typologies, ranging from limited single residential units to semi-detached and detached row housing; two-, three and four storey walk-up apartments and even flats (limited).

Variety should also be offered in terms of tenure – providing for full title, sectional title, and rental stock.

#### ❖ **Implications of Greater Variety**

- Requires variety in layout, plot sizes and land uses;
- Creates places with varied uses, varied building types and varied form;
- Variety attracts varied people, comprising varied income groups for varied reasons;
- Broadening variety is to increase choice – choice for investors, tenants, residents, and visitors;
- Mixture of land parcel sizes increases choice for investors, which in turn increases the vitality and sustainability of the development.

#### ❖ **Investing in the Public Environment and Services**

- Public open space not only refers to the grid of streets, but also to the squares, parks, and landscaped areas within an area.

#### ❖ **Defined Public Open Spaces**

- Good public space has important underlying characteristics: they have definition, they have boundaries, usually consist of buildings that clearly communicate where the edges are and which sets the public space apart from the private space.

#### ❖ **Benefits to Defined Space**

- Defining the public realm within the built-up fabric has various advantages over that of the typical pavilion type developments that withdraw from the public edge;
- They ensure active street edges, '**eyes on the street**' therefore contribute to a safer urban environment;
- Clear **definition between public and private** improves management, control, and security over the public spaces;
- **Perimeter buildings** engage with the precinct/environment and not withdraw from it;
- Creates a **sense of enclosure** and protection;
- Well defined and managed public space enhances private investor confidence which supports local economic development.

#### ❖ **Guidelines for Efficient Public Space**

- Focus on public space as the main structuring element in any nodal area;
- Define hard open spaces and link with soft open spaces;
- Provide accessible public spaces which create opportunity for collective activity;

- Cluster collective services around public spaces and market areas, e.g., informal trade stalls at modal transfer facilities;
- Cluster facilities to enable resource sharing and agglomeration advantages;
- Develop public open spaces as social and environmental assets;
- Ensure that the settlement provides all the social and educational facilities and services required to its inhabitants;
- Develop recreation facilities of various types and maintain it.

### **Design Guidelines: Informal Trade**

Informal trade represents a very important component of the economic base of any township area, and as such it is proposed that formal structures for trading/ hawker stalls be incorporated into the design of public spaces from the outset. Micro and small businesses tend to create more jobs per rand turnover than larger businesses. Furthermore, to many households it may be the only means of income.

It is therefore recommended that the informal sector be actively supported by means of land use planning and infrastructure provision. A variety of trading stalls may be provided at strategic locations including close to (or combined with) retail activity within activity nodes, at public transport facilities (including multi-nodal transfer, bus stop and taxi ranks), and at major intersections within the township. This should go hand in hand with skills training, as well as proper management and regulation of designated informal trade areas.

It is further recommended that a developmental approach be followed concerning informal trade which is as much about minimizing barriers to entry into this sector for the unemployed as it is about assisting people in this group to grow their enterprise.

The first 'level' of structures that could be provided are very basic – comprising non-permanent structures, e.g., wooden shelves on which goods may be displayed (retail); as well as small individual units to accommodate basic service industry activities.

Level 2 structures are typically larger and more permanent additional features. This allows for more comprehensive retail activities, including food preparation, as well as larger service industries.

### **Human Settlements Unit**

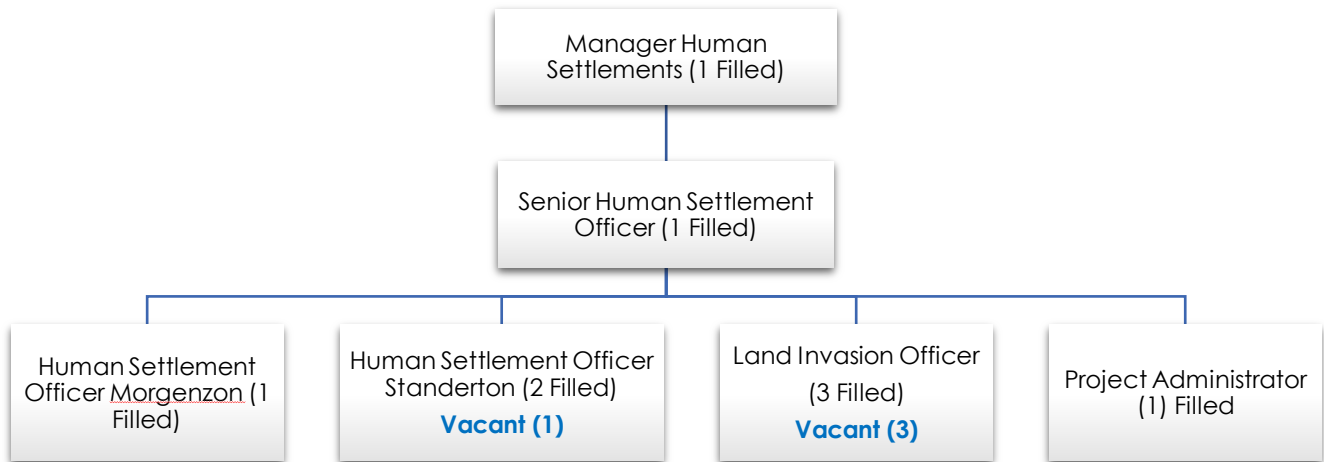

---

The municipality has an established Human Settlements unit that falls under the Planning and Economic Development department. The Unit has 9 positions filled out of 16 positions which equates to a vacancy rate of 47.06%. The unit works in collaboration with the Department of Human Settlements for housing development. However, the municipality is not the implementing agent, thus no budget is allocated for housing within the municipality.

#### Functions of the Unit:

- Facilitate the identification and registration of potential beneficiaries
- Conduct consumer education services
- Develop and maintain data of informal settlements

- Render human settlements planning
- Rendering of rental housing stock
- Manage and monitor housing projects

#### **Lekwa LM Municipal Management and Control of Informal Settlements By-law, 2018**

The municipality adopted the Municipal Management and Control of Informal Settlements by-law in 2018. The by-law seeks to provide for the prevention, regulation, monitoring and control of informal settlements. The by-law also makes provisions for the control and management land invasion incidences.

## 7.

## CHAPTER SEVEN: IMPLEMENTATION PLANS PER KPA

## 7.1 KPA 1: BASIC SERVICE DELIVERY AND INFRASTRUCTURE DELIVERY

Table “A” Integrated Development Plans

DEPARTMENT: COMMUNITY SERVICES AND SAFETY	
<b>Municipal KPA</b>	Basic Service Delivery and Infrastructure Development (Community Services & Safety)
<b>Problem Statement and root causes per KPA</b>	<p>Inadequate access to basic services. The municipality has infrastructure that is not coping with demand and is poorly maintained. This situation is likely to subject the community to severe inconvenience and even danger without prompt attention.</p> <p><b>Solid waste management:</b> Inadequate refuse trucks to collect entire municipality; frequent breakdown of refuse trucks; high vacancy rate; challenges with licensing landfill sites, lack of by-laws to control illegal dumping.</p> <p><b>Fire and emergency services:</b> Limited fire and rescue equipment and machinery; continues breakdown of fire engines; slow pace on maintenance of fire engines.</p> <p><b>Traffic control:</b> Shortage of traffic officers</p> <p><b>Parks, library services, recreational facilities:</b> limited machinery to cut grass and vel trees; cemetery full – need for new burial space; lack of facility maintenance due to high vacancy rate; dilapidated recreational facilities</p>
<b>One Plan Transformation Area</b>	<p>Improve provision of solid waste management services</p> <p>Improve provision of fire and emergency services</p> <p>Improve traffic control and law enforcement</p> <p>Improve access to cemetery services.</p> <p>Improve fleet management</p> <p>Improve library services, parks, and recreational facilities provision.</p>
<b>2019-24 MTSF Priority</b>	Improved access to basic services (Solid Waste Removal by 100%, emergency fire, Traffic Control, Disaster, Parks & Recreational Facilities and Libraries)
<b>Municipal Priority</b>	<p>Provision of efficient and effective solid waste management service</p> <p>Provision of safe and dependable roads</p>
<b>Strategic Objective</b>	Provision of basic services (solid waste removal by 100%, emergency fire, Traffic Control, Disaster, Parks & Recreational Facilities and Libraries)
Impact statement: Improved quality of life and safe living	MTSF Target: Improved access to basic services such as waste 100% emergency fire, Traffic Control, Disaster, Parks & Recreational Facilities and Libraries)

Outcome	Outcome Indicator	Baseline	Situational Analysis	5-year IDP target	Intervention/ Programme	DDM Intervention	ANNUAL IMPLEMENTATION				
							2022/23 Outputs	2023/24 Outputs	2024/25 Outputs	2025/26 Outputs	2026/27 Outputs
<b>Improved access to Solid Waste removal</b>	Increased number of households with access to basic refuse removal services	30518 HH (81%) with access to Solid Waste removal	<ul style="list-style-type: none"> <li>- Irregular refuse collection</li> <li>- Illegal dumping</li> <li>- Not enough refuse collection fleet</li> </ul>	37334 HH (100%) access to Solid waste removal	<ul style="list-style-type: none"> <li>- Procurement of Six additional refuse trucks</li> <li>- Development of IWMP</li> <li>- Rehabilitation of Standerton &amp; Morgenzon landfill sites</li> </ul>	None	Development of IWMP	32222 HH (86%) access to Solid waste removal	33926 HH (91%) access to Solid waste removal	35630 HH (95%) access to Solid waste removal	37334 HH (100%) access to Solid waste removal
<b>Mitigated effects of fires</b>	Improved provision of comprehensive fire services	83 fire incidences reported per quarter	<ul style="list-style-type: none"> <li>- High rate of fire incidences</li> <li>- Inaccessibility of informal settlements during fire</li> </ul>	Reduce the quarterly incidence by 20% per year	<ul style="list-style-type: none"> <li>- Reduce response time to fire call outs</li> <li>- Building of new fire station</li> </ul>	Construction of satellite fire station and Funding for procurement of machinery and equipment	Quarterly fire incidences reduced to 67	Quarterly fire incidences reduced to 50	Quarterly fire incidences reduced to 34	Quarterly fire incidences reduced to 18	Quarterly fire incidences reduced to 2
<b>Improved road safety</b>	Reduced number of road accidents	34 accidents reported per quarter	<ul style="list-style-type: none"> <li>- High number of accidents</li> <li>- Shortage of personnel</li> </ul>	Reduce road accidents to 10 per quarter	<ul style="list-style-type: none"> <li>- Increase number of roadblocks</li> <li>- Improve road markings and signage</li> </ul>	Recruitment of Traffic Officers (Internal)	Road accidents reduced to 30 per quarter	Road accidents reduced to 25 per quarter	Road accidents reduced to 20 per quarter	Road accidents reduced to 15 per quarter	Road accidents reduced to 10 per quarter
<b>Improved access to parks and recreational facilities</b>	Improved maintenance of parks and recreational facilities	28 parks and recreational facilities to be maintained	<ul style="list-style-type: none"> <li>- Shortage of equipment and machinery</li> <li>- Shortage of PPE</li> </ul>	Improved Parks and recreation facilities maintenance	<ul style="list-style-type: none"> <li>- Procurement of machinery and fleet</li> <li>- Recruitment of personnel</li> <li>- Procurement of PPE</li> </ul>	Budget allocation during 2023/24 financial year. No traffic calming measures	Speed humps and road signage	1, 3, 4, 5, 7, 9, 11, 14, 15	<ul style="list-style-type: none"> <li>Installation of Speed humps and road signage</li> <li>Provision of traffic lights</li> </ul>	MIG/ INTERNAL

Table “D” Service Delivery and Budget Implementation Plan

## DEPARTMENT: TECHNICAL SERVICES

KPI	5 Year Target	2022/23 Annual Target	Quarter 1	Quarter 2	Quarter 3	Quarter 4
<b>100% access to water</b>	Water Master Plan developed	Water Master Plan developed	Follow up on the appointment of Service Provider by DBSA	Water master plan @25%	Water master plan @50%	Water master plan @100%
	WCWDM developed	Develop a water conservation and water demand strategy.	Develop and submit business plan			

KPI	5 Year Target	2022/23 Annual Target	Quarter 1	Quarter 2	Quarter 3	Quarter 4
		Repair and calibrate 5 pressure reducing valves	Procurement of service provider	1 pressure reducing valves repaired and calibrated	1 pressure reducing valves repaired and calibrated	3 pressure reducing valves repaired and calibrated
		Install check meters on strategic billing meters;	Develop and submit business plan		Follow up on confirmation of funding	
		Calibration of 10 Bulk Meters @ WTW	Procurement of service provider	Calibration of 3 Bulk Meters @ WTW	Calibration of 3 Bulk Meters @ WTW	àz0071
	Reduce water losses	Repair of 1000 water leaks	250 water leaks repaired	250 water leaks repaired	250 water leaks repaired	250 water leaks repaired
	Review water safety plan	Source funding	Develop and submit business plan		Follow up on confirmation of funding	
	Upgrade bulk water infrastructure	Source funding for upgrade of bulk pipelines	Develop and submit business plan		Follow up on confirmation of funding	
	Construction of reservoirs	Construction of Kiesser reservoir and pressure tower	Procurement of Contractor	Construction @25%	Construction @50%	Construction @100%
	Upgrade of Standerton and Morgenzon WTWs	Source funding for upgrade of WTWs	Develop and submit business plan		Follow up on confirmation of funding	
	Provision of water to areas without access	Source funding to eradicate backlogs	Develop and submit business plan		Follow up on confirmation of funding	
<b>100% access to sanitation</b>	Sanitation Master Plan developed	Sanitation Master Plan developed	Follow up on the appointment of Service Provider by DBSA	Sanitation master plan @25%	Sanitation master plan @50%	Sanitation master plan @100%

KPI	5 Year Target	2022/23 Annual Target	Quarter 1	Quarter 2	Quarter 3	Quarter 4
	Develop Operation and Maintenance Plan	Source funding	Develop and submit business plan		Follow up on confirmation of funding	
	Review waste water risk abatement plan	Source funding to review risk abatement plan	Develop and submit business plan		Follow up on confirmation of funding	
	Construction of Coligny sewer line	Construction of Coligny 2,3km sewer line	Procurement of Contractor	Construction @25%	Construction @50%	Construction @100%
	Standerton and Morgenzon Waste Water treatment works upgraded	Confirmation of funding	Develop and submit business plan		Follow up on confirmation of funding	
<b>100% access to electricity</b>	Electricity Master Plan developed	Electricity Master Plan developed	Procurement of Service Provider	Electricity master plan @25%	Electricity master plan @50%	Electricity master plan @100%
	40 Km of bulk electricity infrastructure upgraded	Source funding for upgrading electricity lines	Develop and submit business to DMRE		Follow up on confirmation of funding	
	A, B & C Substations upgraded	A substation upgraded PHASE 1 Source funding for upgrade of B substation	Procurement of Service Providers Develop and submit business to DMRE	Construction @25%	Construction @70%	Construction @100%
	NMD upgraded to 110MVA	Expansion of SCADA system	Source funding for SCADA to include 35 electricity panels		Follow up on confirmation of funding	
	Improve street lighting	Repair 500 street lights	125 street lights repaired	125 street lights repaired	125 street lights repaired	125 street lights repaired
		Repair 20 high mast lights	5 high mast lights repaired	5 high mast lights repaired	5 high mast lights repaired	5 high mast lights repaired

KPI	5 Year Target	2022/23 Annual Target	Quarter 1	Quarter 2	Quarter 3	Quarter 4
	Develop and Implement EDMS Strategy Document	EDMS Strategy Document developed and implemented	EDMS Strategy Document developed	EDMS Strategy implemented	EDMS Strategy implemented	EDMS Strategy implemented
	Development of Electricity Maintenance Plan	Development of Electricity Maintenance Plan	Electricity Maintenance Plan developed			
<b>192 km of Roads paved/tarred</b>	Roads and Storm water Master Plan Developed	Roads and Storm water Master Plan Developed	Procurement of Service Provider	Roads & Storm water master plan @25%	Roads & Storm water master plan @50%	Roads & Storm water master plan @100%
	20km road constructed	4km road constructed	Develop and submit business plan		Follow up on confirmation of funding	
	20km road rehabilitated	4km road rehabilitated	Procurement of Service Provider	Construction @25%	Construction @70%	Construction @100% (4km road rehabilitated)
<b>Dependable fleet management</b>	30 vehicles procured	Source funding	Develop and submit business plan		Follow up on confirmation of funding	
	Disposal of 40 vehicles	Disposal of 8 vehicles	Identify and submit list of vehicles for disposal	Follow up on progress of disposal	Follow up on progress of disposal	Disposal of 8 vehicles. Transfer of vehicles to new owners.
	Develop maintenance plan	Maintenance plan developed	Draft maintenance plan developed	Draft maintenance plan reviewed	Maintenance plan developed	Maintenance plan approved.

## 7.2 KPA 2: MUNICIPAL TRANSFORMATION AND INSTITUTIONAL DEVELOPMENT

Table “A” Integrated Development Plans

DEPARTMENT: OFFICE OF THE MUNICIPAL MANAGER & CORPORATE SERVICES	
<b>Municipal KPA</b>	Municipal Transformation and Institutional Development
<b>Problem statement and root causes per KPA:</b>	Lekwa Municipality does not exhibit a transparent, accountable, effective and efficient leadership. It therefore this reason that we see numerous incidents of political factions and infighting on the expense of service delivery. This institution requires Organizational restructuring and Good Human resource management in order to ensure a sustainable working environment, maintain and improve the municipal policies and improve performance.
<b>One Plan Transformation Area</b>	Improve technological skills for the 4IR
<b>2019-24 MTSF Priority</b>	A Capable, Ethical and Developmental State
<b>Municipal Priority</b>	Improved and capable institution Customer Care
	Improved individual and organizational performance
	Municipal employees and councillors trained – compliance and adherence to the approved WSP
<b>Impact statement:</b>	Improved organizational performance
	MTSF Target: A Capable, Ethical and Developmental State

Outcome (Strategic Goals)	Outcome indicator (Strategic Objectives)	Baseline	Situational analysis	5 - year IDP target	Intervention/Programme	DDM Stakeholder Intervention	ANNUAL TARGETS				
							2022/23 Outputs	2023/24 Outputs	2024/25 Outputs	2025/26 Outputs	2026/27 Outputs
<b>Legal services</b>	Effective and efficient handling of legal matters	Delays on finalizing legal matters	Delays on finalizing legal matters	% reduction of litigations	Effective and efficient handling of legal matters	Internal	% Reduction of litigations	% reduction of litigations	% reduction of litigations	% reduction of litigations	% Reduction of litigations
<b>Reduction of vacancy in service delivery</b>	Improved Service Delivery	58% Vacancy Rate	Insufficient human resource	100% filling of critical position	Filling of critical vacant positions	Internal	20%	20%	20%	20%	20%

Outcome (Strategic Goals)	Outcome indicator (Strategic Objective s)	Baseline	Situational analysis	5 - year IDP target	Intervention/ Program me	DDM Stakeholder Intervention	ANNUAL TARGETS				
							2022/23 Outputs	2023/24 Outputs	2024/25 Outputs	2025/26 Outputs	2026/27 Outputs
<b>departments</b>											
<b>Review the organization to properly align with the IDP, MSR and budget(d ate)</b>	Reviewed organizational Structure	Approved organizational Structure	Current organization not in line with the current IDP	Alignment of IDP and organization	Develop the organizational Structure to aligned to IDP, Budget and Municipal Staff Relation	COGTA and the Office of the Premier	1				
<b>Conduct skills audit</b>	Skills Audit Conducted	Skills Audit not Conducted	Not all employees' skills known to the municipality	Correct placement of employees and full utilization of HR	Conduct Skills Audit	COGTA and the Office of the Premier	1				
<b>Cascading individual organizational performance to individual performance</b>	Implementation of logic model	organizational Performance in Place	Only senior managers performance measured/ assessed	Cascading organizational performance to all employees	Implementation of the Individual Performance Management System using task grades	Internal	1	1	1	1	1
<b>Improved efficiency on</b>	Installation of Documents	2% automation of administrative	Manual systems	100% automation of systems	Automated Administrative	National and Provincial	50%	50%

## 9.

## CHAPTER NINE: ORGANIZATIONAL STRUCTURE 2023/24

### 9.1 Human Resource Strategy

---

#### **Organizational Structure**

An analysis of the workforce profile of the Lekwa Local Municipality as at 2022-05-30 (last reporting cycle for the Employment Equity Report) reveals the following:

One of the main objectives of the Municipality is to achieve equity in the workplace through the promotion of equal opportunities and fair treatment for all its employees, as well as applicants for employment by:

- Eliminating unfair discrimination that may exist in policies, practices, procedures, and the work environment.
- Implementing affirmative action measures to redress the disadvantages experienced by designated groups in the past.
- Promoting diversity and respect for all employees.
- Achieving equitable representation of all demographic groups at all levels and in all categories of the workforce as ultimate tangible objective.

To this end the following key human resources policies will be put in place in order to guide all human resources related activities of the Municipality:

#### **Recruitment, Selection and Appointment Policy**

This policy is intended to create a framework for decision-making in respect of employment practice/s in the Lekwa Local Municipality. As such it attempts to establish a set of rules for the consistent interpretation and application of collective agreements and legislation governing the acquisition of staff by the Lekwa Local Municipality.

#### **The municipality shall develop the strategy to:**

- reduce turnaround times for filling of approved vacant funded posts;
- fill all funded vacant posts on the staff establishment within six months of a funded post becoming vacant.
- at all times have the capacity and capability to perform its functions.
- The strategy must include timeframes for the various activities included in the recruitment and selection processes

#### **Human Resources Development Policy**

The Lekwa Local Municipality believes that its employees form the cornerstone of service delivery to the communities within the Municipality. It therefore adopts a policy of giving priority to the training and development of its staff, within the parameters of what is feasible and sensible in the

context of the municipality's resource deployment requirements. It will identify and assess the training needs and potential of staff, match it with the requirements of the Municipality and afford all employees the opportunity to develop their potential, improve their performance and advance their career prospects within the municipality. Special attention will be paid to training and development opportunities for employees belonging to designated groups.

**Skills development activities of the municipality shall strive:**

- To support the achievement of the municipality's goals set out in the Integrated Development Plan by providing critical skills that ensure the delivery of quality services;
- To promote the development and retention of competent municipal staff, including the development of technical, professional and specialist staff who have the required qualifications and skills;
- To support the employment equity objectives of the municipality;
- To be based on high quality provision and effective workplace learning and development practices, including coaching, mentoring, on-the-job learning, and opportunities for the practical application of skills in the workplace

**The municipality shall support its staff members by:**

- clarifying the skills required for jobs, identifying relevant skills needs and developing opportunities to satisfy the skills needs;
- identifying new skills and knowledge required by staff to support their career growth and progression; o creating learning opportunities which will allow their staff to develop the skills and expertise to enable them to compete effectively for placement in new or vacant posts;
- ensuring that skills development is a KPA in senior managers and supervisors performance agreements.

**Staff Retention Policy**

Staff retention is a process of ensuring that employees with valued or needed skills or experience in a scarce/critical field where recruitment is difficult are kept within the service of the Municipality by using various techniques. The Municipality recognizes that its most asset is its human resources. A great deal of time and money is invested in the recruitment, training, and development of employees and, as such, every effort should be made to retain those employees who have scarce or critical skills.

**Performance Management Policy**

The objectives of implementing a performance management system include:

- Facilitates strategy (IDP) deployment throughout the municipality and align the organization in executing its

**strategic objectives;**

- Facilitate increased accountability;

- Continuous and sustainable service delivery improvement;
- Create an organizational performance culture;
- Provide early warning signals;
- Develop open and constructive relationship between customers, leadership, and employees;
- Encourage reward for good performance;
- Manage and improve poor performance;
- Link performance to skills development and career planning, therefore encourage learning and growth; and
- Comply with legislative framework.

**PMDS shall, were reasonably practicable, link to:**

- the municipality's strategic objectives, integrated development plan and the SDBIP of the relevant municipal department; and to the senior manager's performance plan and the performance plans of the staff members within that senior manager's department.

The system shall be developmental, while allowing for:

- an effective response and relevant measures to manage substandard performance;
- recognition and reinforcement of fully effective performance, performance significantly above expectations and outstanding performance

**Occupational Health and Safety Policy**

The Lekwa Local Municipality and its staff believe that the prevention of injuries and exposure to disease of all the employees is of paramount importance to the organization in its quest to be a leader in health and safety. Furthermore, management acknowledges its responsibility and moral obligation to provide a safe and healthy workplace. The Municipality will strive to be proactive in the recognition of risks with the objective of reducing exposure to injury and disease. Involvement will be at all levels and the responsibility will be shared by everyone, in order to reach the objectives.

**Employment Equity Policy**

The purpose of this policy is to state the broad principles of employment equity to which the Lekwa Municipality is committed and to describe in general how the Municipality seeks to realize these principles. This policy document does not constitute the Employment Equity Plan of the Lekwa Local Municipality, but simply sets out the framework and guiding philosophy that will govern an Employment Equity Plan.

## 9.2 HUMAN RESOURCE PLAN

The Human Resource Plan focuses mainly on three levels: entry level, internal environment management level and exit level.

<b>ENTRY OF PEOPLE (Recruitment, selection, induction and orientation, remuneration, and benefits)</b>				
	<b>PRIORITY PROJECTS</b>	<b>OUTPUT</b>	<b>DUE DATE</b>	<b>BUDGET</b>
<b>ENTRY LEVEL</b>	Review the organizational structure	Revised organizational structure	June 2023	R0
	Introduce and publicize all new and review human resource policies annually	Human Resource Policies and Employee Handbook	Jun 2022, 2023, 2024 and 2025	R8 000
	Ensure qualitative implementation of the Employment Equity Plan	Realization of set employment equity targets regarding gender and people with disabilities for each year of the plan	Jun 2022, 2023, 2024 and 2025	R 30 000 per annum
	Ensure minimum leave (24 or 27 days) is taken by each employee annually	Leave Report	Jun 2022, 2023, 2024 and 2025	R0
	Reduce and manage excess leave to within 48 days per employee and current only	Excess leave to be within provisions of the collective agreement and current only	Jun 2022, 2023, 2024 and 2025	R0
	Provide Employee Wellness services	Implementation of wellness programs	Annually	R 500 000 per annum
<b>DEVELOPMENT OF PEOPLE (Training, Promotion and Progression, Performance and Talent Management, Culture, Leadership etc.)</b>				
	<b>PRIORITY PROJECTS</b>	<b>OUTPUT</b>	<b>DUE DATE</b>	<b>BUDGET</b>
<b>INTERNAL ENVIRONMENT MANAGEMENT LEVEL</b>	Develop Comprehensive Human Resource Development Strategy	Human Resource Development Strategy	Jun 2023	R80 000
	Ensure all Job Descriptions are updated in line with the provisions of the policy	Job Descriptions	Every five years from August 2022	R0
	Ensure implementation of the Workplace Skills Plan to at least 80% of planned training	Workplace Skills Plan and Training Report	April 2023, April 2024, and June 2025	R0

	Communicate reviewed and newly adopted Human Resource Policies	Register of inducted employees	Dec 2022, 2023, 2024 and 2025	R0

**Table 69: Total planned beneficiaries for 1 May 2023 - 30 April 2024**

### **IPMS – Integrated Performance Management System**

Lekwa LM does not have a IPMS system in place. However, the municipality intends on developing and approving an IPMS system for the 2023/24 financial year as part of the HRM operational plan. The strategic goal of the HRM operational plan is to promote a culture of performance in the municipality. The human resources division will develop a project to cascade IPMS to all municipal employees. The municipality is busy consulting with relevant stakeholders on the draft policy for cascading performance management.

### **9.4 Organizational Structure 2023/24**

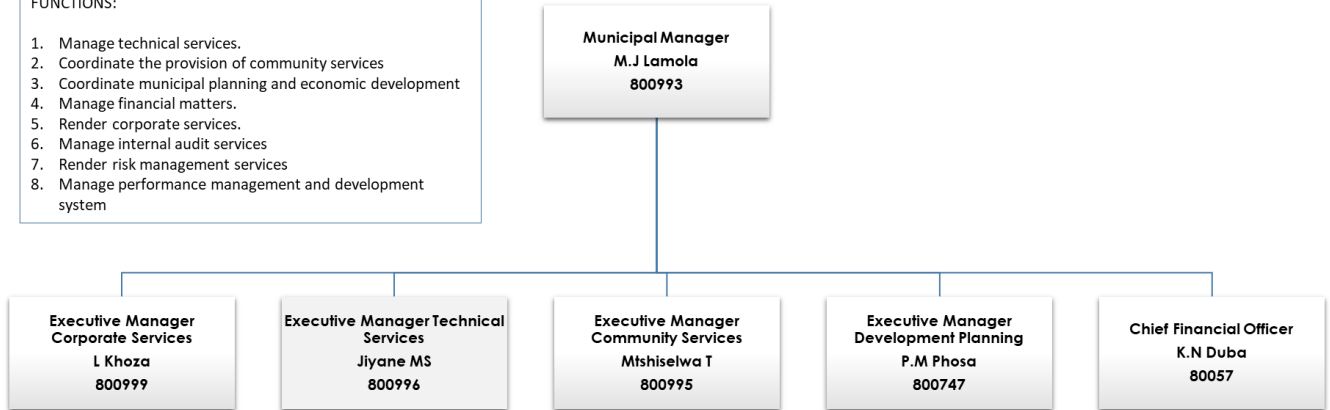

The organogram outlines how certain activities are directed in order to achieve the set Municipal IDP objectives. This concept attempts to promote the correct utilisation of the abilities, knowledge, and skills of the staff, and other resources. The employee-related cost for the financial year is at (25%) of the total operating expenditure budget which is below the 35% of the National Treasury determined norm.

#### **Vacancies to be filled in the 2022/23 and 2023/24 financial year:**

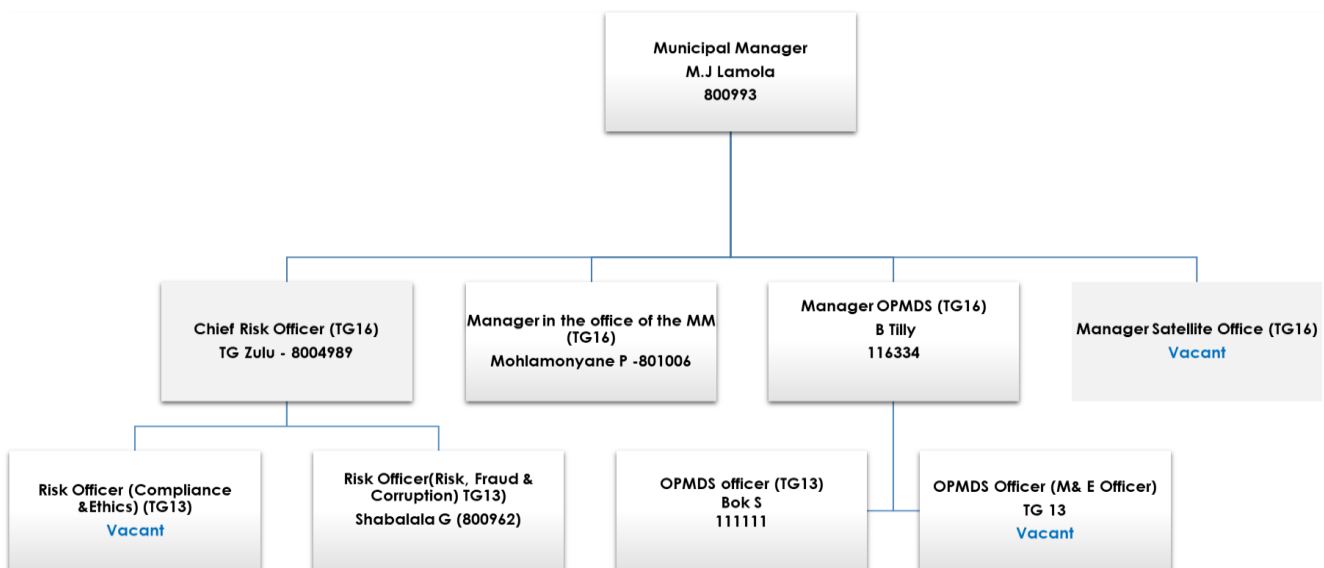

- Manager Income/ Revenue
- Project Management Unit Technician – Civil Engineering
- Manager office of the Municipal Manager
- LED Officer
- Town Planner x 2
- Property and Facilities Management Officer
- Manager Communications & Marketing
- Accountant Financial System Administrator
- Accountant Movable Assets
- Accountant Expenditure
- Various positions within the technical services department

PURPOSE: TO PROVIDE ADMINISTRATIVE AND SERVICE DELIVERY NEEDS OF THE MUNICIPALITY IN ACCORDANCE WITH THE LEGISLATION GOVERNING LOCAL GOVERNMENT.  
FUNCTIONS:

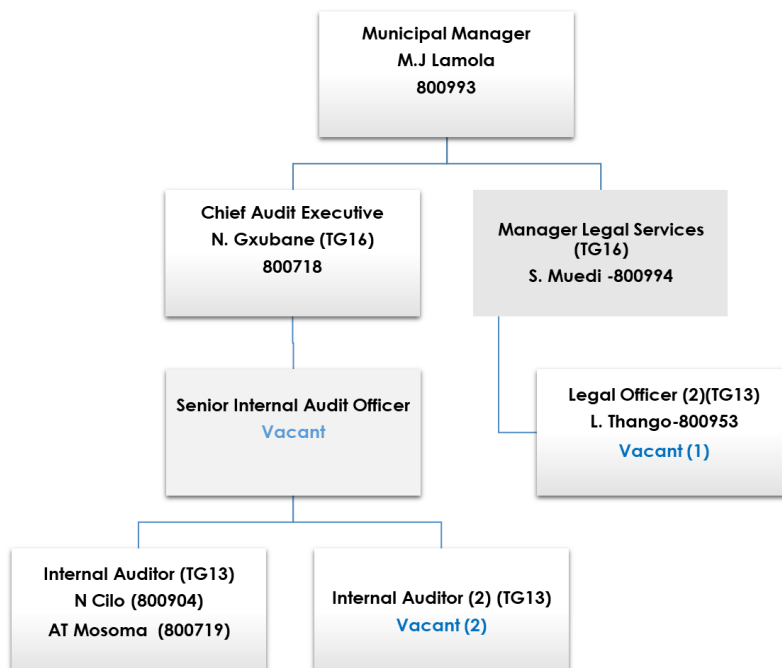

1. Manage technical services.
2. Coordinate the provision of community services
3. Coordinate municipal planning and economic development
4. Manage financial matters.
5. Render corporate services.
6. Manage internal audit services
7. Render risk management services
8. Manage performance management and development system

## CHAPTER TEN: MUNICIPAL BUDGET 2023/24

## 10.1 2023 - 2024 Budget/ Medium Term Revenue and Expenditure Framework (MTRF)

**Executive Summary**

The application of sound financial management principles for the compilation of the Municipality's financial plan is essential and critical to ensure that the Municipality remains financially viable and that municipal services are provided sustainably, economically and equitably to all communities.

The Municipality's business and service delivery priorities were reviewed as part of this year's planning and budget process. Where appropriate, funds were transferred from low- to high-priority programmes to maintain sound financial stewardship. A critical review was also undertaken of expenditures on noncore and 'nice to have' items.

In line with section 16 of the Municipal Budget & Reporting Regulations, the Municipality has considered the views of stakeholders received during the IDP & budget consultations. It is worth mentioning that though there were numerous priority areas that were listed the Municipality still needed to ensure that it remains sustainable.

During the community consultation on the IDP & budget that will be implemented with effect from 1st July 2023, the community raised key service delivery priorities that the Municipality has taken into consideration when preparing both the IDP & the budget. The key priority areas included but not limited to the following:

- That there are areas that have inconsistent water supply
- That there are areas that do not have access to water supply
- That there are areas that have inadequate electricity supply
- There are areas that have high illegal connections and
- That there is inadequate roads maintenance thus resulting in potholes & roads that are not drivable
- Inadequate billing and meter reading.
- Refuse collection and illegal dumping
- Non-functional high-mast lights

It will not be possible to finance all the key service delivery issues raised in one financial year however systems and strategies will need to be implemented overtime to ensure the provision of services to communities in a sustainable manner as enshrined in section 152 (b) of the Constitution of the Republic of South Africa, 1996.

The Municipality had budget engagement with the Provincial Treasury to assess the credibility, relevancy and sustainability of the budget.

The objective for credibility is to determine if the budget is funded in terms of Section 18 of the MFMA perspective. In assessing the credibility of the budget, the revenue planning framework and associated assumptions are interrogated to determine if they are realistic and indicative of multi-year budgeting.

The objective for relevancy is to:

- Test if the budget is aligned to the Integrated Development Plan (IDP) of the Municipality and the extent to which the National Development Plan and provincial priorities, including MFMA Circulars were considered.
- Determine whether the Municipality adopted a budget process with evidence of sufficient political oversight and public participation.
- Ensure political oversight and guidance is crucial for the budget process as the approval of the budget is the responsibility of Council and not that of the Budget and Treasury Office. The budget brings effect to Council priorities and hence these priorities should be funded and Council must ensure that its priorities are affordable from a budgeting perspective.

The following were some of the key observations made by Provincial Treasury:

- The operational revenue budget has been increased by 14.8 percent from the adjusted budget. Own revenue generation contribute 87 percent of the R1.3 billion operational budget;
- The budget for sale of goods and rendering of service has been increased by 23.4 percent, which is above the 5.3 percent guide of circular 123 of the MFMA (It should be noted that this is as a result of the municipality identifying new sources of revenue)
- The tabled operational budget for the municipality has a deficit of R315 million;
- The total operating expenditure for the municipality is projected to increase by 8.1 percent from the adjusted budget of R1,2 billion in 2022/23 to R1,3 billion for 2023/24 financial year;
- The employee related costs have been increased by 2.2 percent and remuneration of councillors by 0.3 percent which is below the CPI of 5.3 percent as guided by circular 123 of the MFMA;
- Bulk purchases have been increased by 13.7 percent which is below the 18.7 percent as guided by circular 123 of the MFMA;
- Depreciation and amortization decreased by 5.0 percent from the adjusted budget of R 85,6 million to R81,4 million for the budget year 2023/24;
- Debt impairment remained unchanged from the adjusted budget of R69,3 million to the current financial year budget amount of R69,3 million;
- Irrecoverable debt written off increased by 5.7 percent from the adjusted budget amount of R1,0 million to R1,1 million for the current budget year;
- The tabled budget for other expenditure will increase by 2 percent which is below the CPI of 5.3 percent as per circular 123;

In principle Provincial Treasury notes that it will take the Municipality number of yes to get the budget to be funded. The engagements has further revealed that the Municipality should ensure that the unfunded position reduces overtime through the constant implementation of the budget funding plans.

## 10.2 Progress on the implementation of the Financial Recovery

---

Key Findings and Conclusions drawn from the 2022 FRP Update

### **Demographic, Economic and Household Infrastructure**

- Lekwa LM's economy expanded by 2.04% in 2022, while GVA per capita increased modestly to R88 274 p.a. The 5-year average growth rate of 3.69% is indicative of reasonable economic growth since 2018.

- The population growth rate came in at 1.08%, with a 5-year average rate of 1.04%. This is reasonably low.
- Lekwa LM has the third lowest population density in the Gert Sibande District, with 27.4 people per km<sup>2</sup>.
- The official unemployment rate dropped to 22.1% in 2022; This is the lowest rate in the district and is low in the provincial (36.1%) and national (33.9%) contexts. It must be noted that the current narrow definition of the unemployment rate excludes discouraged workers - thus it is reasonable to assume that the true figure, upon inclusion of discouraged workers, is far higher.
- The total number of employment opportunities grew by 499 jobs during 2022, with community services remaining the predominant provider of employment, followed by trade and finance.
- The Tress Index of 32.40 indicates a well-diversified economy. The top three contributing sectors to GVA are: Community Services (17.7%), Mining (13.7%) and Trade (13.2%). The higher the degree of economic diversification, the lower the level of risk should adverse economic conditions arise.
- Tourism spend increased for the second consecutive year, with an increase of R121.6 million (27.31%) in 2022. The tourism sector's contribution to GVA in 2022 amounted to just 2.87%. Total tourism trips totalled 57 600 trips, an increase of 16.5% from 2021.
- Household formation saw over the assessment period amounted to 11.4% or 3 586 additional households in absolute terms. The municipality has been able to maintain its infrastructure index of 0.82; indicative of its ability to keep up with the rate of household formation. This score is high relative to the national index of 0.77. The infrastructure index is, however, limited to the extent that it only provides a view on access to basic level of services and not the security and/or quality of the service provision.
- 20.3% of households fall below the Equitable Share Bracket, while 82.4% of households receive a level of service above the RDP level of service.

### **Historic Financial Assessment**

The historical analysis shows:

- Lekwa LM's liquidity position remains in a dire state. The liquidity ratio as at FYE2021/22 was just 0.09:1. This indicates a severely constraint liquidity position and in which the municipality will not be able to meet its short-term obligations as and when they fall due.
- The outstanding creditors balance increased by R266.5 million to an astonishing total of R2.39 billion as at FYE2021/22. Considering the municipality's total income for FY2021/22 totalled R917.8 million, this is the predominant threat to the financial sustainability of the municipality.
- An operating deficit (excluding capital grants) of R372.8 million was posted in FY2021/22; increasing from R244.1 million posted in FY2020/21. The municipality has posted accounting and operating deficits throughout the review period.
- Cash was utilised by operations for the second consecutive year, to the value of R27.3 million. Concerning to note, this is despite an increase of R266.5 million in the outstanding creditors balance.
- The collection rate declined to 64% as at FYE2021/22 from 68% at the prior year-end. This is a prominent factor in the lack of cash generation.
- Creditors' days totalled 1 395 days as at FYE2021/22. This is reflected in the significant increases in the creditors balance. Negotiations must take place with creditors to attempt to discuss possible extension of payment terms and to limit the amount of interest incurred on outstanding debt.

- Electricity distribution losses totalled 26.8% in FY2021/22. Water distribution losses were exorbitantly high in FY2021/22, amounting to 77.1%. Both metrics well-exceed their respective NT norms.
- Total grants received (R164.9 million) constituted 18% of total revenue (R917.8 million) in FY2021/22.
- The municipality's unencumbered cash of R15.5 million fell well short of the NT and statutory minimum liquidity requirements of R121.7 million - resulting in a cash shortfall of R106.2 million. The municipality has posted cash shortfalls throughout the review period.
- The municipality finds itself in a dire financial position, it is of critical importance that the municipality follows the recommendations provided in this update, to get itself on a path to stabilising its distressed financial situation.

### **Financial Recovery Plan Update**

Based on the results of the Long-Term Financial Model, it is recommended that Lekwa:

1. Limits the capital investment programme to capital grants received, as the municipality is not currently in a position to utilise own cash to fund capital investment.
2. Maintain a balanced approach for the long-term capital investment programme which prioritises investments that contribute to economic growth and revenue generation and prioritise timeous investment in bulk infrastructure.
3. Formalise a capital investment prioritisation and tracking system to optimise management's capital investment decisions and mitigate the risk of underspending on capital projects. Priority must be given to upgrading water bulk infrastructure in an attempt to curtail extensive distribution losses.
4. The outstanding creditors balance must be reduced as a priority. It is of absolute importance that the municipality applies for participation in the Eskom Municipal Debt Relief programme and upon doing so, strictly adheres to the conditions of the programme to ensure the benefits are reaped. This will give a significant boost to the dire liquidity position.
5. Develop a cost-reflective tariff structure that is underpinned by a detailed, thorough tariff modelling process. Tariff increases, over which the municipality has control, must reflect annual inflation related input costs reflected in bulk purchases and operating expenditure.
6. Achieve and maintain a higher collection rate by prioritising decisions and actions that will support and improve the low collection rate without compromising profitability / surpluses.
7. Employ a prioritised, efficient and targeted approach to operating expenditure, with a view of restricting growth in and reducing operating expenditure items where possible, to curtail deficits.
8. Finally, Lekwa's current distressed financial position is as a result of a long period of sustained deficits, a low collection rate and the consistent non-payment of creditors. The municipality needs to fundamentally and formally commit to and institutionalise full financial recovery, prioritising the implementation of improved financial and operational management, to bring the municipality into a stable financial environment. Once a sense of stability has been reached, the municipality can begin to shift its focus towards growth and development.

This is further evident from the quantification of the Financial Recovery Plan that suggested that it will take the Municipality anything between 5 – 7 years to get the budget to be funded. That with the intervention that the Municipality is receiving this should assist with the reduction of the deficit. The Municipality must have clear revenue raising targets with clear deadlines to all for adequate oversight.

The Municipality has embarked on implementing a range of revenue collection strategies to optimize the collection of debt owed by consumers. This includes but not limited to;

- Data Enrichment
- Property Valuation Roll reconciliation and billing reconciliation
- Account corrections (linking service tariffs to accounts)
- Credit Control
- Meter audit and replacement of faulty meters (both electrical and water meters)
- Implementing a project for eradication of illegal electricity connection
- Indigent Management including building capacity within the indigent registration unit
- Improve meter reading

The Municipality has established governance structure that are functional these includes Council, Mayoral Committee, Section 79 & 80 Committees as well as the Audit Committee. The stability within the governance structure will assist immensely in ensuring that the Municipality is able to implement the Financial Recovery Plan thus enabling the financial stability and provision of sustainable basic services.

In terms of section 18 of the MFMA the municipality may only fund its budget from realistically anticipated revenue to be collected as well as cash-backed surpluses. Therefore the municipality must provide for expenditure in line with the revenue that can be collected and don't overstate the revenue as this will result in cash flow challenges.

The budget has to be cash-backed in order for the municipality to be able to implements its Service Delivery Budget Implementation Plans,

National Treasury has issued Municipal Finance Management Act (MFMA) circular numbers 122 and 123 to guide the compilation of the 2023/2024 medium term revenue and expenditure framework (MTREF) which emphasises that during this tough economical period the municipalities should tighten their spending and reduced unnecessary or nice to have expenditures, improve and prioritise service delivery.

The National Treasury projects real economic growth of 0.9 per cent in 2023. Real GDP growth is expected to moderate to 1.8 per cent over the medium term.

The municipality has fallen into financial distress and face liquidity problems. These include the municipality being unable to meet their payment obligations to Eskom, water boards and other creditors. There is a need for municipality to focus on collecting revenues owed to it, and eliminate wasteful and non-core spending.

The non-payment of creditors is a symptom of underlying problems which include, among others, weaknesses in revenue collection and underinvestment in asset maintenance and renewal, which compromises the reliability of delivering basic services. In order to achieve financial sustainability, the municipality must demonstrate the political & administrative will to implement the changes required to improve the performance.

The Municipality must ensure that expenditure is limited to the maximum revenue collected and not spend on money that it does not have. The municipality is reminded that, the local government equitable share allocation is mainly to fund the costs of free basic services and to subsidise some of the administrative costs. The increasing unemployment and growth in the

number of persons per household means that the revenue foregone in respect of free basic services will likely increase and it will become even more difficult to collect revenue. The household budget will be under pressure and trade-offs will be applied as it may be unaffordable to pay all household expenses with regularity.

The Risks to the fiscal framework in the compilation of the 2023/2024 MTREF can be summarized as follows:

- The ongoing difficulties in the national and local economy;
- Slowing global and domestic economic growth (exacerbated by the war between Russia and Ukraine)
- The need for permanent increase in social protection (Indigent support) that exceed available resources.
- Pressures from employee related costs that contribute 24% of the total operating expenditure budget.
- Pressure from the increased cost of bulk electricity that contributes 39% of the total operating expenditure budget (due to tariff increases from Eskom), which is placing upward pressure on service tariffs to residents. Continuous high tariff increases are not sustainable - as there will be point where services will no-longer be affordable;
- Aging and poorly maintained water, roads and electricity infrastructure;
- The need to reprioritise projects and expenditure within the existing resource envelope given the cash flow realities and declining cash position of the municipality;
- Affordability of capital projects – original allocations had to be reduced and the operational expenditure associated with prior year's capital investments needed to be factored into the budget as part of the 2023/24 MTREF process; and
- The increase in unemployment due to slow economic growth within Lekwa
- Demand for increased bulk infrastructure (electricity, water, and sanitation) to stimulate growth and unlock developments
- Reprioritization of projects and expenditures given the cash flow realities of the municipality
- Revenue recovery, credit control and declining revenue base due to the current economic environment

The application of sound financial management principles is essential to ensure the municipality remains financially viable and the municipal services are provided economically and sustainably.

#### **Overview of the proposed 2023/24 Medium-term Revenue and Expenditure Framework:**

The operating revenue decreased from R 1 174 166 000 in the 2022/23 financial year to R 1 133 123 000 in the 2023/24 financial period. This reflects a revenue decrease of 3.4% or R41 million over the period.

The main revenue projections are contributed to the following revenue streams:

- Property Rates R 203 million (17%)
- Electricity R 467 million (47%)
- Water R 84 million (7%)
- Sanitation R 42 million (4%)
- Solid Waste R 33 million (3%)
- Grants & Subsidies R 173 million (15%)

From the above it is evident that electricity is the main revenue sources, thus requires and compels that the stream should be nurtured and protected in order to ensure that the service is profitable. The Municipality should ensure that mechanisms are in place including but not limited to:

- Eradication of illegal electricity connection
- Replacement of bridged, faulty & tempered electricity meters
- Installation of meters to areas that are not metered
- Ensuring that all properties are billed correct tariffs
- Constant reviewing of electricity to ensure cost reflecting whilst ensuring affordability by consumers
- Investigating the possibility of collect arrears debt through the prepaid vending system
- The municipality should also consider investing in technologies that will reduce the impact of loadshedding on businesses and community in general, this may include deployment of renewable energy technologies and storage systems, smart load management (peak load shifting; shedding off non critical loads).

The operating expenditure has increased from R 1 279 915 000 in 2022/23 to R 1 361 480 000 in the 2023/2024 financial year. This reflects an increase of R 81 million (6.3%) on expenditure. The increase in expenditure is attributed mainly to employee related costs increase amounting to R 22 million and bulk purchases increase R 62 million.

The main expenditure projections are contributed to the following expenditure streams:

- Employee related costs R326 million (24%)
- Bulk Purchases R 531 million (39%)
- Other Material R 80 million (6%)
- Contracted services R 124 million (9%)

The capital budget amounts to R 75 million in the 2023/24 financial year.

## Operating Revenue Framework

Revenue management is fundamental to the financial sustainability of the Municipality. The reality is that we are faced with development backlogs and poverty and therefore the municipal revenue strategy is built around the following key components:

- To seek alternative sources of own revenue to increase the municipal revenue base (rental of properties, outdoor advertising, sales of stands etc)
- Tightening credit control measures and increase debt collection targets
- Improve customer relations and promote a culture of payment of services
- Create an environment which enhances growth, development and service delivery
- Implementation of the indigent support policy to provide free basic services to poor households and protect them from the worst impacts of the economy; and
- Implementation of Revenue Enhancement Strategy
- Implementation of Financial Recovery Plan
- Creation of Job Opportunities
- Installation and Replacement of Meters including meter audit
- Ensure all tariffs are fully cost reflective.

Total operating revenue decreased from R 1 174 166 000 to 1 133 123 000 when compared to the 2022/23 adjustments budget, which will increase to R 1 265 436 000 in the 2025/2026 financial year. The effects of Loadshedding are evident in the performance of municipalities in the financial year 2022/23. The municipality was equally affected, this is when looking at the performance of the municipality in the 2022/23 MTREF mainly because during loadshedding the municipality stops generating revenue. It is based on among other the above that National Treasury has Advised municipalities to reduce the budget of sales to municipal consumers

Table 70: Budgeted Financial Performance

**Figure 41: 2023-2024 Final Budget**

### Impact of the Revenue Budget on the Municipal Budget

The local government equitable share allocation is mainly to fund the costs of free basic services and to subsidise the administrative costs of the smaller and more rural municipalities. The increasing unemployment and growth in the number of persons per household means that the revenue foregone in respect of free basic services will likely increase, and it will become even more difficult to collect revenue. Household budgets are becoming increasingly under more pressure, and trade-offs might be applied when it becomes unaffordable to pay all household expenses on a monthly basis.

Municipalities must ensure that they render basic services, maintain their assets and clean environment. Furthermore, there must be continuous communication with the community and other stakeholders to improve the municipality's reputation. This will assist in attracting investment in the local economy which may result in reduced unemployment. Some municipalities are experiencing serious liquidity challenges.

It is essential that municipalities reconcile their most recent valuation roll data to that of the billing system to ensure that revenue anticipated from property rates are accurate. Municipalities should undertake this exercise as a routine practice during the budget process so that supplementary adjustments to the valuation roll are kept up to date. The list of exceptions derived from this reconciliation will indicate where the municipality may be compromising its revenue generation in respect of property rates. A further test would be to reconcile this information with the Deeds Office registry.

Loadshedding not only affects the electricity service but also some municipalities' ability to pump water, thereby negatively impacting the stability of water supplies and the related functioning of the wastewater reticulation network. Municipalities are always asked to try to balance full cost recovery on services with affordability for their residents. In practice, this means that where the full increase in the cost of a service is not passed on to consumers, municipalities must offset the increased costs through savings identified elsewhere in their operations. Therefore, reducing/ limiting overall expenditure is a key part of budgeting for the

response to loadshedding. The municipality should stick to its core mandate and functions and carefully review overall expenditure to manage the net effect. Measures should include aggressively cutting costs, frills, and vanity projects, dealing with bloated administrations and structures possibly duplicated across Municipal Manager and Mayoral offices, and applying for exemptions from the annual salary increases if these are not affordable

The setting of cost-reflective tariffs is a requirement of Section 74(2) of the Municipal Systems Act which is meant to ensure that municipalities set tariffs that enable them to recover the full cost of rendering the service. This forms the basis of compiling a credible budget. A credible budget is one that ensures the funding of all approved items and is anchored in sound, timely and reliable information on expenditure and service delivery (FFC, 2011).

Municipality must adopt a tariff setting methodology that achieves an appropriate balance between the interest of poor households and other customers while ensuring financial sustainability of the municipality

When setting tariffs the following was considered:

- cost of bulk purchases and the fluctuation of seasonal consumption;
- consumption patterns to enable better planning;
- cost of providing services; and
- Sound baseline information.

The proposed tariffs are contained in the draft resolution and attached schedule which provides a comparison of proposed tariffs with the previous financial year. During the IDP and budget consultation held during the months of April to May 2023, the community sighted that the Municipal Tariffs are unaffordable in comparison to the level of service as the unreliable service provision the community inputted that the Municipality should not increase the tariffs whilst improving service delivery. In terms of section 152 (b) of the Constitution of the Republic of South Africa, 1996 - Chapter 7: Local Government that the Municipality object are to ensure the provision of services to communities in a sustainable manner.

The Municipality needs to ensure that there is improvement on the level of services thus rebuilding the trust and confidence of the Municipality thus ensuring that the communities are willingly paying for services.

The Municipality for the 2023/24 financial year will be increasing tariffs for the services charges on an average of 5.3% (water, sanitation, refuse and other sundry services) an electricity will be increased with 15% in line with the NERSA guidelines.

### **Proposed Tariffs Increases**

#### Property rates

An average increase of 5.3%.

The tariff structure is in accordance with the different categories in the valuation roll as per the Municipal Property Rates Act, adjustments will be made to the business tariffs as well as the introduction of a new tariff for guesthouse and accommodations establishments.

#### Sewerage tariffs

An average increase of 5.3%.

#### Refuse tariffs

An average increase of 5.3%.

### Water tariffs

An average increase of 5.3%.

### Electricity tariffs

An average increase of 15 %.

## **Operating Expenditure Framework**

National Treasury has again emphasized in the MFMA circular that municipalities must implement cost containment measures and eliminate non-priority spending and the cost containment measures were regulated in Government

### **Employee related costs**

Pressures from the municipal employee related that contribute 24% of the total operating expenditure budget. Provision has been made for salary increases of 5.4% in line with the collective agreement. The Municipality needs to find alternative ways to reducing the employee related costs this includes amongst other:

- Organizational restructuring
- Performance of skills audit & job placement
- Strick monitoring of the overtime and standby allowance
- Reviewing scares skills policy in line with the skills sector plans
- Reviewing of acting, travelling allowance amongst other benefit
- Prioritisation of recruitment process

## **Operating Expenditure**

The Municipality will be reducing some of the operating costs inline with the cost curtailment policy which includes but not limited to:

- Ensuring value for money through the procurement process
- The affordability of providing free basic services to all households
- Use of consultants.
- Travel and subsistence according to maximum limits set by National Treasury.
- No credit cards are allowed.
- No sponsorships or municipal funds may be used for social functions, team building, year-end functions such as staff year-end functions, staff wellness and attendance of sporting events by municipal officials.
- Catering to be provided only when meetings exceed five (5) hours.
- Communication to be done in an electronic format, such as internal newsletters et cetera.
- Curbing the consumption of water and electricity by the indigents to ensure that they do not exceed their allocation
- Not taking on unfunded mandates

The Municipality has further implemented the following cost curtailment measure to reduce expenditure:

- Monitor employee related costs by ensuring employees only work 40 hrs overtime
- Prioritising of filling of critical post that have impact on revenue generation and reduces overtime

- Enforce all procurement to be undertaken through and by SCM Unit only
- Manage all procurement through Cashflow Management Committee on procurement below R 200 000.00 including contracted services

The operating expenditure increased from R 1 297 101 000 to R 1 361 480 000 when compared to the 2022/23 adjustments budget and will subsequently increase to R 1 480 250 000 in the 2025/26.

VEHICLE REPAIRS	4 367 990.00	3 689 550.43	3 889 397.55
WATER NETWORK	10 840 400.00	10 868 400.00	10 897 968.00
<b>Grand Total</b>	<b>69 257 270.00</b>	<b>69 342 140.13</b>	<b>71 684 372.23</b>

In terms of the National Treasury Norms and Standards the municipality should provide for at least 8% of the budget towards repairs and maintenance. The municipality has budgeted 5% of the budget towards repairs and maintenance, whilst a provision of R 7 million has been allocated towards maintenance of roads network, R 33 million to address electricity network, R 10 million towards water network and R 4 million towards addressing sewer network related challenges.

The Municipality needs additional budget for the Electricity maintenance that amounts to R 164.9 million to stabilise the current electricity challenges over the medium term. The Municipality further needs to additional funding for the Sewer network, water network and roads maintenance estimated to be in excess of R 400 million.

**Bulk Purchases**

National Treasury recommended Municipalities to budget for reduced bulk purchases and sales to municipal customers based on loadshedding assumptions. Municipalities are also advised to carefully monitor their Eskom accounts for any penalties that result from increased demand immediately after a period of loadshedding is ended. Eskom has indicated that they will reverse any penalties for exceeding notified maximum demand that results from the implementation of loadshedding. This should be factored into the tariff calculation to ensure that consumers are not overcharged.

During 2018/19, intense work had been undertaken to resolve systemic and structural issues pertaining to the electricity function in municipalities. Core to this work was addressing the escalating Eskom debt that threatened the sustainability of Eskom as well as that of municipalities

During the process, Eskom was engaged on providing relieve in certain areas. Municipalities must be made aware that the following concessions were agreed upon:

- Reducing the interest rate charged on overdue municipal bulk accounts from prime plus 5 per cent to prime plus 2.5 per cent;
- Payment terms being extended from 15 days to 30 days for municipal bulk accounts; and
- Payments received from municipalities will be allocated to capital first and then the interest.

These concessions are aligned to the MFMA and are meant to curb the growing debt levels by allowing municipalities a more conducive payment regime than what was previously employed. In addition, municipalities are encouraged to budget for bulk services and honour their current account payments religiously to avoid stringent application of the bulk suppliers' credit control policy.

Municipalities are also advised to enforce a culture of payment for services through their normal credit control processes. In this regard it should be noted that municipalities are only compensated for free basic services based on an indigent user component calculation through the equitable share. As such, a municipality's allocation of free basic services to all of the municipality's consumers is not funded in the equitable share. Every municipality, during the budget process, must consider the affordability to the municipality when allocating free basic services above the national norm and to consumers other than indigent consumers. If a municipality has any arrears on any of its bulk supplier's accounts, it must limit its provision of free basic services to registered indigent consumers only. In this regard municipalities are reminded to take note of the Constitutional Court decision in

The National Energy Regulator of South Africa (NERSA) is responsible for the price determination of the bulk costs of electricity. In January 2023, NERSA approved tariff increases of 18.7 per cent in 2023/24 and 12.7 per cent increase in 2024/25. For purposes of calculating the free basic energy subsidy in the local government equitable share formula, the National Treasury has added 2 per cent to these increases. This is in anticipation of higher increases than those published in January, for municipalities, due to the difference in the financial years of Eskom customers and municipalities meaning that Eskom only has nine months to collect the allowable revenue from municipalities. R1.1 billion is added to the free basic energy subcomponent of the free basic services component of the local government equitable share formula to fund these higher tariff increases. To this end, the free basic electricity subsidy in the local government equitable share is calculated based on a 20.7 per cent tariff increase in 2023/24 and a 14.7 per cent increase in 2024/25. In the absence of an approved tariff increase in the outer year of the MTEF period, the formula assumes an increase of 17.7 per cent in 2025/26. This is the average of the estimated increases for the first two years of the MTEF period

The Municipality should ensure that measures & systems are put in place and continue to be implemented which includes amongst others aggressive revenue improvement strategy, employee related cost reduction, phasing out contracted services, better contract management, reduction in material losses, decreasing of general expenditure in line with the cost curtailment measures as well as the implementation of the Financial Recovery Plan.

### **Municipal Debt Relief**

An optimally designed debt solution for Eskom can leverage the structural reform of the electricity sector that is needed both on the Eskom side and the municipal side, however, the municipal debt owed to Eskom pose a material risk to any Eskom debt relief package. In parallel the challenge of inability to honour the current account cannot be separated from a consumer culture to not pay for services.

Municipal Debt Relief that is conditional and application based, has therefore been sanctioned. The relief is aimed to correct the underlying behaviour and operational practices in defaulting municipalities and Eskom while in parallel, progressively introducing a smart metering solution to change consumer behaviour by instilling a culture of payment for services consumed. The proposal consists of 4 elements:

- I. Eskom will write-off all debt municipalities owe as on 31 March 2023 (excluding the March 2023 current account). This will be done over three national financial years and require as a critical qualification that municipalities monthly honour their current

(monthly consumption) Eskom and water accounts going forward and maintain a minimum average quarterly collection, etc;

- II. Secondly, new mechanisms are explored to resolve non-payment – this to include a dispute ombud mechanism and re-assigning the license of persistent defaulters;
- III. Thirdly, Eskom will continue to implement a regime of installation of pre-paid meters in Eskom supplied areas to improve Eskom collection. Municipalities are additionally encouraged to adopt a similar operating regime; and
- IV. Lastly, the National Treasury will continue to implement municipal revenue enhancement initiatives, including a transversal tender for a smart pre-paid meter solution to change to a forward looking culture of payment of the consolidated municipal bill.

The municipality's exorbitant outstanding creditors balance, the majority of which is owed to Eskom, must be reduced as a priority. This is a trend within the municipal sector, with the total outstanding municipal debt amounting to over R56 billion. Considering this and the low likelihood of repayment, Eskom and NT announced a Municipal Debt Relief programme earlier this year.

Considering the municipality's current debt owed to Eskom, it is recommended that Lekwa LM jumps at this opportunity and applies for participation in the debt relief scheme. The benefits thereof are tremendous. Should the municipality comply with the conditions for a consecutive 12-month period, Eskom will write off a third of the municipality's debt annually. The conditions include but are not limited to; the regular payment of the current Eskom bill, the adoption of a realistic and funded budget, disconnection of defaulting consumers' water and electricity supply and a collection rate of at least 80%. It must be stated that failure to adhere to any of the conditions will result in the municipality's participation being voided, in which case the municipality must reapply for participation.

In light of this, a scenario was run to indicate the impact of the municipality's participation in this debt relief scheme. In running the scenario, the LTFM indicated that an 80% collection rate was insufficient for Lekwa LM. As such, the collection rate in this scenario is assumed to improve to 90% within 3 years, as in the Base Case. Furthermore, the outstanding creditors balance was substantially reduced in FY2023/24.

The outcomes of this scenario are reflected in the table below. This scenario is built around the premise that the conditions as stated will be met, with a particular focus on servicing the current Eskom account. Considering this fact, it is likely that there will not be a significant impact on the municipality's cash position, as indicated in the planning period-end bank balance that is on par with the Base Case.

The most prevalent and important outcome of this scenario is the significant improvement to the liquidity position. The planning period-end forecast liquidity ratio of 0.6:1 is a marked improvement on the Base Case. While the ratio is still forecast to be below 1:1, this provides a stable platform for the municipality to begin to achieve growth and move into an environment of financial sustainability.

The positive impact of such a scenario on a municipality in as dire a financial state as Lekwa LM, cannot be understated. The municipality is urged to apply for and commit to the debt relief scheme. The municipality's long-term financial sustainability is currently at risk, to a large extent due to the municipality's outstanding creditors balance and this programme provides an opportunity to alleviate this risk.

**Scenario 4: Eskom Debt Relief**

Outcome	Base Case	Eskom Debt Relief
Average annual % increase in Revenue	6,0%	6,0%
Average annual % increase in Expenditure	2,7%	2,7%
Accounting Surplus accumulated during Planning. Period (Rm)	-R 677	-R 677
Operating Surplus accumulated during Planning. Period (Rm)	-R 1 120	-R 1 120
Cash generated by Operations during Planning. Period (Rm)	-R 182	-R 36,8
Average annual increase in Gross Consumer Debtors	2,0%	2,0%
Capital investment programme during Planning. Period (Rm)	R 458	R 458
External Loan Financing during Planning Period (Rm)	R 0	R 0
Cash and Cash Equivalents at the end of the Planning Period (Rm)	R 65	R 64
No of Months Cash Cover at the end of the Planning Period (Rm)	0,5	0,5
Liquidity Ratio at the end of the Planning Period	0,1 : 1	0,6 : 1
Gearing at the end of the Planning Period	0,0%	0,0%
Debt Service to Total Expense Ratio at the end of the Planning Period	0,0%	0,0%

The positive outcomes of this scenario are significant. The main threat to the financial sustainability of the municipality is the liquidity position, and this is addressed in this scenario. The planning period-end liquidity ratio of 0.6:1, while remaining low, is indicative of Lekwa being on a path towards achieving financial stability.

The participation in the Municipal Debt Relief programme is of absolute importance to the long-term financial sustainability of the municipality. It is not realistic to think that the municipality will be able to service its historic debt owed to Eskom, considering its current liquidity position as well as the extent to which this debt has been allowed to grow. It is crucial that the municipality applies for participation in this programme, and then strictly adheres to the conditions to reap the benefits of this programme.

## Overview of the Revenue & Expenditure

MP305 Lekwa - Table A4 Budgeted Financial Performance (revenue and expenditure)

## Overview of Trading Services

It should be noted that trading & economic services are operating at a loss of R 191 million in the 2023/24 financial period and the loss will reduce in the 2024/25 financial year. The municipality is experiencing poor revenue collection as the Municipality is delivering the electricity service at a gross loss due to meter tampering, unmetered properties, and faulty meters, lack of bulk meters and vandalism and theft. Not all domestic and big consumers are getting metered. The Municipality should continue to introduce and implementation of adequate measures to properly sustain the funding of the trading & economic Services. The Municipality needs to fulfil the obligations of correcting accounts and metering all services correctly as this will ensure that the deficit is reduced.

Function	2023-24 Final Budget	2024-25 Final Budget	2025-26 Final Budget

Table 74: Budgeted Cash flows

The following were taken into consideration and would require significant oversight.

- Increased revenue through revenue enhancement
- Increased collection rate from 65% to 85%
- Adequate Expenditure Management and reduction of non-essential expenditure

Table 76: Budgeted Capital Expenditure

## Capital Projects Framework

One of the greatest challenges facing municipalities is the public perception in service delivery. Investment in municipal infrastructure is critical to sustaining growth, rehabilitating ageing infrastructure and eradicating service delivery backlogs. Therefore the capital financing strategies taken into consideration are:

- Ensure capital programme is based on priorities, programmes and projects of the IDP;
- Expedite spending on capital budget especially projects that are funded from conditional grants;
- Explore new ways to fund capital expenditure from own revenue contribution;
- Analyze feasibility and impact on operating budget before capital projects are approved

## Municipal Infrastructure Program Funded Projects

IDP No	Project name	2023/2024 FY	2024/2025 FY	2025/2026 FY	Scope for 2023/2024 FY	Planned job opportunities for 2023/2024 FY	Ward Location	Ward/s Benefitting

## 11.

**CHAPTER ELEVEN: DISASTER MANAGEMENT PLAN****Disaster Management Plan**

The Disaster Management Act (No 57 of 2002) requires of local government to develop a disaster management policy and establish a disaster management centre in accordance to the national and provincial frameworks. The main responsibility for disaster management is assigned to District Municipalities in consultation with the local municipality to determine the level of the establishment of the Disaster Management Centre and its Disaster Management Plan. However, the Municipal Systems Act, no 32 of 2000 requires the compilation of a Disaster Management Plan as part of the IDP. In order to comply with the requirements of the Municipal Systems Act, a disaster management statement is prepared

**Role and Purpose of Disaster Management**

The purpose of a Disaster Management Plan is to enhance the capacity of the municipality to prevent and to deal with disasters and to avoid developments, which are subject to high risk of disasters.

Disaster Management Framework, Plan and Centre are interrelated. The scope of disaster management as required by the Act, broadly entails three domains as outlined hereunder:

**Disaster Planning**

- Hazard identification
- Risk and Vulnerability assessment
- Prevention, mitigation, preparedness strategies
- Contingency planning
- The monitoring and evaluation of disaster planning Key Performance Indicators.

**Disaster Preparedness and Response**

- Monitoring of threats
- Activating contingency plans
- Informing National & Provincial centre
- Deploying response resources to the scene of incident
- Managing the resources
- Monitoring of disaster intervention activities
- Declaring of a "State of Disaster"

**Disaster Recovery**

- Planning for the recovery
- Disaster recovery activities

- Monitoring of disaster recovery activities
- Documentation of disaster occurrences and actions taken
- Post-mortem analysis to improve systems, plans and methodologies

Because the local municipality is not the responsible agency for disaster management, but form an integral part of disaster management within the district, a disaster management plan is produced. This plan addresses only the local municipal area of jurisdiction and will be aligned with the Disaster Management Plan of the Gert Sibande District and Mpumalanga Provincial Centre, once it is published.

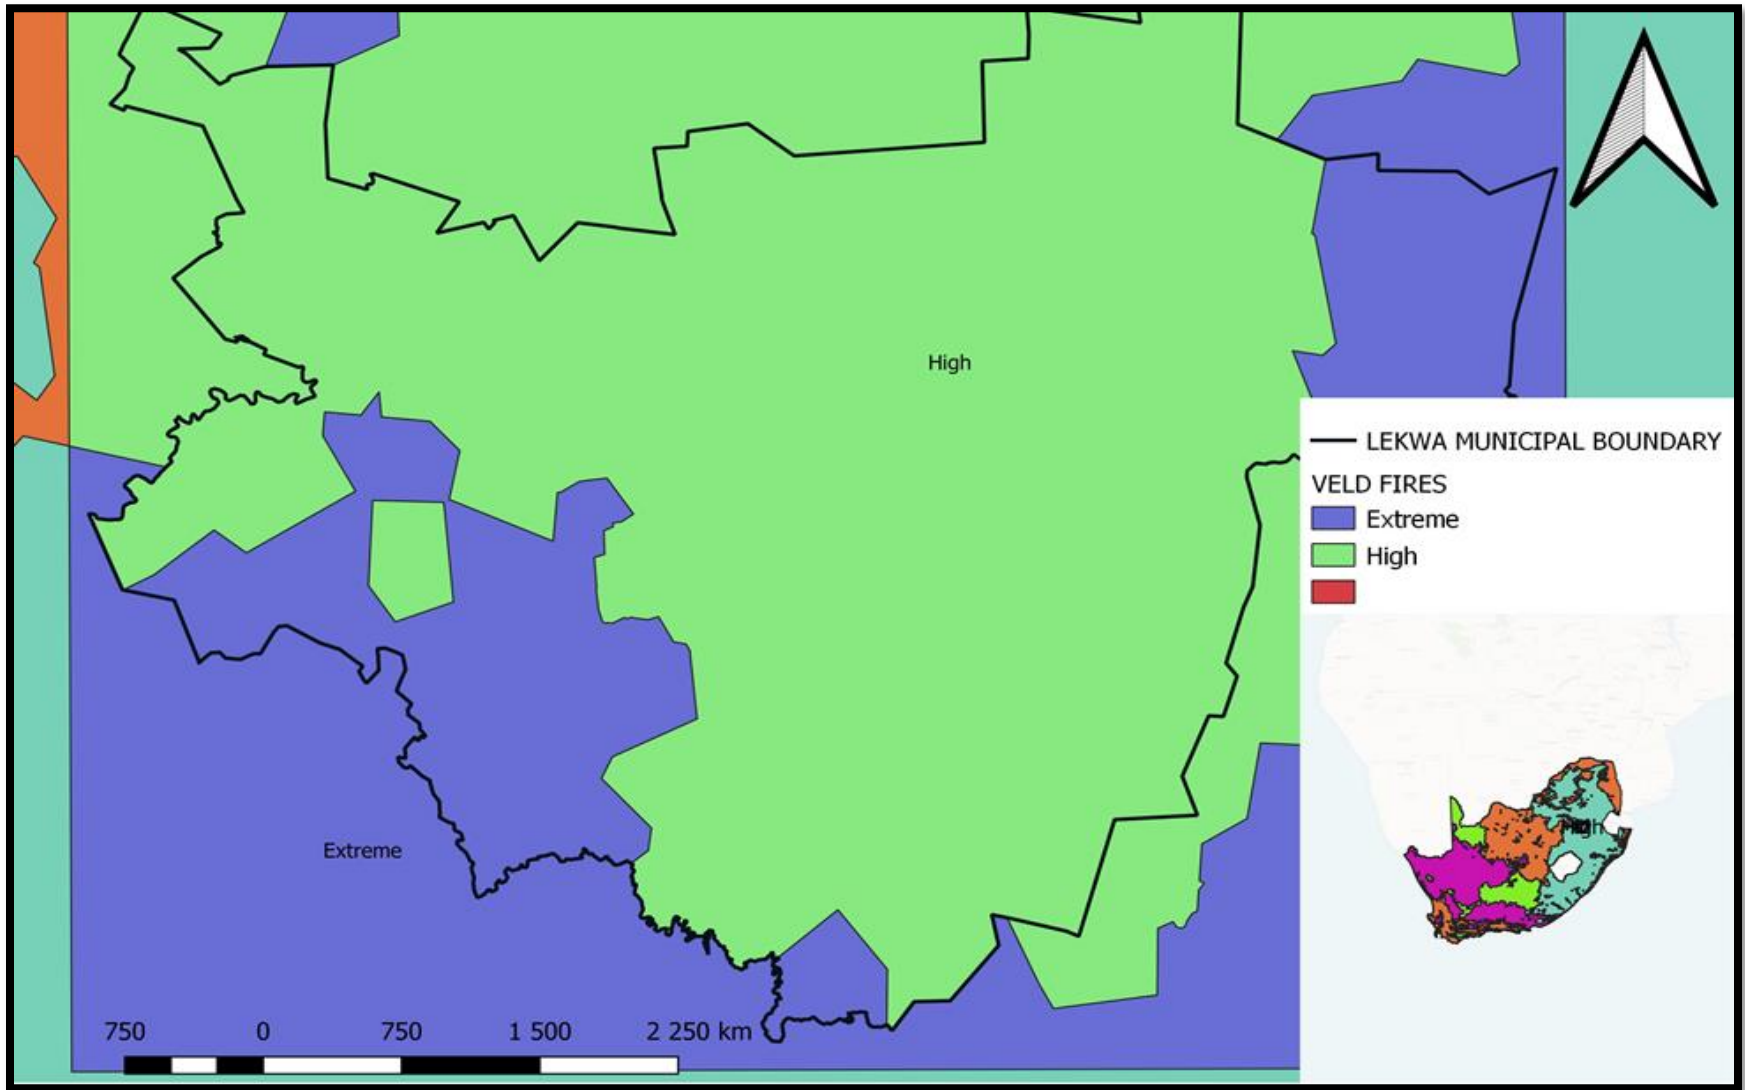

### **Objectives of the disaster management plan**

- Prevent or mitigate a disaster
- Maintain resources for rescue operations
- Maintain a 24 hours' day communication at all levels
- Support provincial, national and municipality when disaster overcome available resources
- Provide cooperation and mutual aid to neighboring countries and the world.
- Conduct research on issues relative to disaster and identify all communities at risk.
- Develop a risk profile and maintain a database for communication links, risk assessment and atlas.

### **Key Service a Disaster Management Plan must deliver**

- The prevention of disaster and the mitigation of softening the impact of those disasters that cannot be prevented.
- Preparedness for disaster in terms of contingency planning, exercise and planning, public education and readiness.
- Ensuring swift and efficient emergency services and related response to disasters linked with action to provide relief to affected communities.
- Coordinating assistance to communities in recovery and rehabilitation in order to return to the pre-disaster state.
- Facilitating reconstruction and development that ensures a reduction in vulnerability of the community against disaster

### Disaster prone areas in Lekwa LM

### The purpose of the disaster management plan

The purpose of a Disaster Management Plan is to enhance the capacity of the municipality to prevent and to deal with disasters and to avoid developments, which are subject to high risk of disasters. Disaster Management Framework, Plan and Centre are interrelated. The scope of disaster management as required by the Act broadly entails three domains as outlined hereunder:

Disaster Planning	Disaster Preparedness and Response	Disaster Recovery
Hazard identification Risk and Vulnerability assessment	Monitoring of threats Activating contingency plans Informing National & Provincial Centre Deploying response resources to the scene of incident Managing the resources Monitoring of disaster intervention activities Declaring of a "State of Disaster"	Planning for the recovery Disaster recovery activities Monitoring of disaster recovery activities Documentation of disaster occurrences and actions taken Post-mortem analysis to improve systems, plans and methodologies

Because the local municipality is not the responsible agency for disaster management, but form an integral part of disaster management within the district, a disaster management plan is produced. This plan addresses only the local municipal area of jurisdiction and will be aligned with the Disaster Management Plan of the Gert Sibande District and Mpumalanga Provincial Centre, once it is published.

### Possible types of disaster, communities at risk and effects

The following table indicates likely types of disasters, the communities at risk and the effects associated with these disasters:

TYPE OF DISASTER	COMMUNITY AT RISK	EFFECTS
Floods	Low laying areas in Lekwa Municipality.	Loss of life
		Loss of property and livestock
		Damage to infrastructure
		Leaking of hazardous substances, sewage, etc.
		Disruption of economic and social activities
		Lack of potable water
		Spreading of diseases
Heavy snowfalls	High lying areas, particularly along the borders and along the R23 and other areas within Lekwa municipality	Loss of life
		Loss of property and livestock
		Damage to infrastructure

		Disruption of economic and social activities
		Lack of food and warm clothing
Veld fires	Farming areas and informal settlements	Loss of life
		Loss of property and livestock
		Damage to infrastructure
		Spreading of diseases
		Disruption of economic and social activities
Drought	Lekwa local but farming areas	Loss of life
		Loss of property and livestock
		Damage to infrastructure
		Spreading of diseases
		Lack of food, Lack of potable water
Fires in built-up areas	Lekwa, particularly densely populated settlements and CBD	Loss of life
		Loss of property and livestock
		Damage to infrastructure
		Spreading of diseases
Transportation Accidents:	Lekwa along major transportation networks	Loss of life
- Rail		Loss of property and livestock
- Air		Damage to infrastructure
- Road		Spillage of hazardous substances
- Pipeline		
Spillage of hazardous and toxic substances	Lekwa along major transportation networks.	Pollution
		Health risks
		Loss of biodiversity, Loss of life
Diseases	Lekwa and the neighboring community	Health risks, Loss of life
		Loss of livestock
Unrest	Lekwa	Loss of life
Mass Events		Loss of property and livestock
		Damage to infrastructure

### Possible prevention and mitigation measures

The following table indicates likely types of disasters, the communities at risk and the possible mitigation measures to prevent disasters from happening:

TYPE OF DISASTER	COMMUNITY AT RISK	PREVENTION AND MITIGATION MEASURES
Floods	Low laying areas, Standerton, Sakhile, Rooikoppen, TLC and Sivukile.	Prevent illegal occupation of land in low laying areas
		Ensure that townships are established outside 1:50 year flood line
		Plan open spaces along rivers and water courses
Heavy snowfalls	High lying areas, particularly along the border	Ensure that buildings are properly constructed to cope

TYPE OF DISASTER	COMMUNITY AT RISK	PREVENTION AND MITIGATION MEASURES
		with weight of snow on roof structures
		Traffic accommodation
		Salt placement (National Road Agency)
		Early detection system
		Effective communication lines between service delivery agencies
		Information distribution
		Emergency shelter and meals
		Emergency patient treatment
		Emergency communication system
		Emergency rescue and extrication
		Emergency administration functions
		Emergency financial assistance
Veld fires	Farming areas and informal settlements	Awareness campaigns
		Pre-emptive burning
		Firebreaks
Drought	Lekwa but farming areas	Improved farming practices
		Storage of potable water source
		Irrigation scheme
Fires in built-up areas	Lekwa particularly densely populated settlements and CBD area	Fire hydrants
		Density control measures
		Fire walls between buildings
Transportation Accidents:	Lekwa along major transportation networks	Improved road conditions
- Rail		Regular maintenance of transportation infrastructure
- Air		
- Road		
- Pipeline		
Spillage of hazardous and toxic substances	Along major transportation networks and workstations such as Engine and Spoor net	Lower driving speed of hazardous substances
		Emergency response plan
Diseases	Lekwa and its neighboring community	Awareness campaigns
		Emergency response plan
Unrest	Lekwa	Emergency response plan
Mass Events	Lekwa, auditorium, stadiums, and public halls	Emergency response plan

### Preparedness and institutional capacity

The municipality has fire brigade and traffic control service based in Standerton and a satellite centre based in Sivukile which can be deployed as first responders to assist with disaster management. The institutional capacity is therefore limited and outside assistance will be required in cases of a disaster. It is also of utmost importance that the staff will attend further training in various aspects.

### **Appointment of Disaster Management Advisory Forum**

The Disaster Management Advisory Forum as outlined in the table below will constitute the Disaster Management Team in terms of the regulations of the Disaster Management Act.

#### **Members need to comply with the following:**

- Apply on the official form
- Authorization in terms of Section 8 of the Act.
- Residing within the area of jurisdiction of the local authority.
- The Chief Disaster Management declared him to be a member and fit, physically as well as mentally and Be 14 years of age and above.
- Commit him/her on the official application form to render services and to be trained.

### Roles and responsibilities

Designation	Roles and Responsibilities:
Chief Disaster Management	<p>The Chief Disaster Management shall be responsible for all decisions taken and he/she will be the only person to give instructions.</p> <p>Where possible, all decisions taken by the Head shall be in consensus with the Chief Disaster Management.</p> <p>The Chief Disaster Management or the Head of Centre shall conduct all enquiries and requests made to organization outside the area of jurisdiction.</p> <p>Members of Local Government Disaster Management of their authorized delegates shall man the Communication Center.</p> <p>The Chief Disaster Management/Head shall submit a report regarding all disasters and situations to the Provincial Administration and District Council.</p> <p>The Head in collaboration with the JOC control everything in his section and will be in constant contact with other role-players.</p> <p>Communication shall be conducted via the Communication Officer in consultation with the JOC.</p> <p>Information shall be disseminated to the community through Councillors and the Communication Officer.</p>

Head: Disaster Management	<p>Coordination of all information</p> <p>Interrelation to all other sections</p> <p>Communication with the media</p> <p>Promote an integrated and coordinated approach to disaster management with special emphasis to prevention and mitigation.</p> <p>Act as a repository of and conduit for information concerning disasters.</p> <p>Make recommendations regarding the funding of a disaster management.</p> <p>Promote and recruit training and participation of volunteers.</p> <p>Ensure that all departments are taking part on issues relating to disasters.</p>
Communication Convenor:	<p>Communicating with JOC, Province, and other sections. Release of information after consultation with JOC, communication to councillors.</p> <p>In collaboration with Section evacuation, feeding and clothing, safety and security, health services, traffic control, fire services, evacuation, animal care, emergency services, administration, fire protection associations, social services, agriculture, and public works.</p>
Accommodation Convenor: Housing Department	<p>Supplying of accommodation for victims in collaboration with Section communication, evacuation, safety, and security, feeding and clothing, spiritual care, health services, traffic control, fire- fighting, emergency services, administration, finance, essential services.</p>
Financial Convenor:	<p>Receipt of all collected monies, issuing of requisitions for purchases, keeping track of all income and expenditure, compiling statements.</p> <p>In collaboration with: Sectional communication, evacuation, safety, and security, feeding and clothing, health services, traffic control, firefighting, animal care, emergency services, administration, essential services.</p>
Corporate Services:	<p>The handling of all correspondence, writing of press release, collection of all reports from other sections, filling of all information/reports.</p> <p>Section evacuation, feeding and clothing, safety and security, health services, traffic control, fire services, evacuation, animal care, emergency services, communication, essential services.</p>
Community & Health Services	<p>Make provision of on-site, immediate post-disaster first aid. The provision of medical treatment for minor injuries and secondary illnesses. The treatment of more serious injuries and illnesses at district hospital. Co-ordinate among the health services, feeding, spiritual care, education in order to ensure effective recovery and rehabilitation services.</p> <p>Provide counselling to the affected persons and establish medical post. Identify and record injured persons &amp; arrange for immediate treatment. Introduce environmental health protocol. Mobilize clinic personnel ad establish mobile clinic.</p> <p>In collaboration with:</p>

	Section evacuation, feeding and clothing, safety and security, health services, traffic control, fire services, evacuation, animal care, emergency services, communication, essential services
Technical & Engineering	<p>Cancel leaves for all electrical service personnel in the areas likely to be affected.</p> <p>Review with staff precautions for protecting equipment and post-disaster procedures to be followed.</p> <p>Check emergency tool kits, assembling any other public service offices to make sure that they work properly.</p> <p>Fill department vehicles with fuel and part them in a protected area. Secure all electrical board buildings</p> <p>Cancel of leave for staff.</p> <p>Encourage people to store an emergency supply of drinking water.</p> <p>Establish temporary means of distributing water on an emergency basis.</p> <p>Cover pumps and rotors with timber to prevent damage from falling debris.</p> <p>Ensure that auxiliary generator and standby engines are in good working order.</p> <p>Acquire a buffer stock of fuel for motors and store in a protected place.</p> <p>Establish emergency work gangs for immediate post-disaster repairs.</p> <p>Supply water, sanitation, electricity or and any other form of lighting and heating, cleaning, storm water drainage, cemetery, and rubbish removal.</p>
Water & Sewer	
Traffic Management:	<p>Road closure, traffic control &amp; Assistance and transportation of victims in dangerous zones.</p> <p>In collaboration with: Section feeding and clothing, safety and security, accommodation, health services, essential services, education spiritual care, feeding and clothing, emergency services, finance.</p>
Transport Regulator	
Social Services:	Feeding and clothing, food parceling and distribution and education of children.

Department of Education:	<p>In collaboration with: Section communication, evacuation, safety and security, communication, spiritual care, health services, traffic control, fire- fighting, education, emergency services, administration, finances, essential services.</p> <p>Assemble students &amp; teachers and explain the disaster threat, likely effects, and precautionary measures. Close school and ensure that all children are safely returned to their families. Consider boarding students, send boarding students to their parents if possible. If not feasible, find a building that is not prone to damage in the disaster; ensure that adequate adult supervision is provided. Acquire stocks of emergency foods. Wrap all books, valuable documents, records, and paper supplies. Place all science equipment, teaching aids and other valuable equipment in wall cupboard or any safe compartment. Move all furniture on the first floor to the ground floor, where it is less likely to be damaged. Stalk all desks, chairs, and other furniture to one end of the building to minimize exposure. Secure any loose items on the school grounds to prevent them from being blown about by the wind. Secure water containers and cover well.</p>
Council of Churches:	<p>Taking care of Church services and spiritual condition of all affected people.</p> <p>In collaboration with: Sectional communication, evacuation, safety, and security, feeding and clothing, health services, traffic control, firefighting, other ministries, emergency services, administration, finance, essential services.</p>
Fire and Rescue / Emergency Convenor:	<p>Evacuation and relocation, search and rescue, contingency measures</p> <p>Utilization of material and personnel</p> <p>Tackle situation(s)</p> <p>Prevent and mitigate disaster</p> <p>Maintain resources for rescue operations</p> <p>Support provincial, National and District Council</p> <p>Provide cooperation.</p>
Health Service:	<p>Treatment, care, nursing and accommodation of injured victims, primary health care services, identification of suitable building in this area.</p> <p>Transportation of the sick and injured.</p> <p>Provide temporary first aid posts.</p>
Emergency Medical Services:	
Animal Care Convenor:	<p>Ensure safety of animals in stalls and safety environment.</p> <p>Give medical treatment</p>

SAPS:	Mobilize all resources to notify the public of the impending danger and provide information on recommended precautionary procedures. Supervise evacuation of communities in potentially dangerous areas, such as those areas prone to flooding or storm surge. Work in close collaboration with the Local Disaster management Centre. Mobilize police reserves and volunteers for immediate needs and in preparation for the post disaster situation. Recommend deploying of auxiliary military services of the disaster-prone areas for assistance in search and rescue, road clearing and emergency communications. Keep the government agencies informed of all relevant developments. Ensure that staff families are prepared for disaster and are in safe place. Protect records by wrapping them in polyethylene to protect them from rainwater damage. Protect all valuable equipment (such as radios, typewriters, furnishings, arms, and ammunitions) against possible damage. Close and cover all windows, check catches and bolts on all windows and doors. Check auxiliary generator, ensure that extra fuel is on hand, and protected. See to the safety of all victims. Protection of property In collaboration with: Section communication, evacuation, feeding and clothing, health services, traffic control, traffic control, essential services.
SANDF:	Protection of the community and property. Assist with evacuation and transportation to transit areas. Identify safety relocation area
Department of Home Affairs	Issue of documents that has been destroyed in disaster.
National Disaster Management Office:	Give support and establish funding to assist the disaster-stricken area. Give advice and mutual assistance. Facilitate reporting system in conjunction with the National Framework Assist provincial disaster management centre to ensure that all process of rehabilitation and recovery are arrived at.
Provincial Disaster Management Office:	Coordinate and establish communication links via the district council. Ensure that National Centre is aware of the current situation. Assist in funding and sheltering of the affected communities. Liaise with the local municipality and source possible assistance.

Each agency or state organ will be responsible for its own disaster management contingency plan which will be submitted to the Disaster Management Centre for inclusion in the Municipal IDP.

These should focus mainly on the following aspects:

- Planning and framework – the way in which the concept of disaster management is to be applied in its functional area, e.g., roles and responsibilities.
- Risk and vulnerability Assessment leading to needs analysis
- Evaluation and description of infrastructure
- Prevention through risk elimination – remove hazards/alternative processes.
- Mitigation through risk reduction – engineering solutions/legislative compliance/safety culture
- Preparedness planning for risks that cannot be eliminated (Risk Management) (a) contingency planning based on risk and vulnerability (b) emergency Organization, (c) response planning, (d) notification and activation, (e) recovery plans for business continuity.
- Contingency strategies and emergency procedures in the event of a disaster.
- Line of communication (Protocols) and liaison
- Awareness and education – (Before) prevention and mitigation: (During) notification and advisories: (After) Advisory, public information, and education.
- Evaluation and maintenance
